Agenda Item 2 – NRS Chapter 240 – Open Meeting Law Compliance

Treasurer Conine confirmed that they are in compliance with the Open Meeting Law.

Agenda Item 3 – Public Comment

Carson City Comments: Vice President Sara Adler with Belz and Case Government Affairs, representing Mariposa Academy Charter School shared her public comment. She stated that Mariposa submitted an application on August 17th for funding from the State Infrastructure Bank to purchase its current building in southeast Reno, a lower-income area of Washoe County. Mariposa Academy meets all eligibility requirements for the Charter School Revolving Fund. It also meets the criteria proposed by Opportunity 180 that will be presented. She noted that Mariposa is a Title 1 school with 100% of students meeting the requirements of the free or reduced lunch program. She stated the school is located in the low-income census tract and zip code, more than 90% of the Academy's students are minorities, and 45% of students are currently or have been English language learners. The school does not use any charter management organization and is a high-performing school, having received the highest test scores out of any other Title 1 school in Washoe County School District. She explained that the Opportunity 180 Facilities Fund is impressive and contains appropriate criteria for assessing academic, organizational, and financial criteria, necessary for the State Infrastructure Board (SIB) to be assured that the funding the SIB allocates to charter schools will be well-invested. She stated that is also terrific that it shows how it intends to leverage the charter fund into a 100 million lending pool. The intent of the governor and the legislature is that these charter school funds be available to serve Title 1 nonprofit schools in all areas of Nevada. Mariposa would like to note that the Opportunity 180 proposal shares phase 1 and phase 2 pipelines that list only schools in Clark County. Mariposa is eager to move forward with financing, in order to secure ownership of its building and be in greater control of its monthly costs in the future. She concluded her comment by noting Mariposa hopes that an application will not be held up to an undue extent while the establishment of a lending pool arrangement moves forward.

No public comment in Las Vegas or via Teams.

Agenda Item 4 – For discussion and possible action: Approval of the minutes from the State Infrastructure Bank Board of Directors meeting from August 12, 2022.

Motion to approve the meeting minutes from Member Reynolds and a second from Member Bobzien. Motion passed unanimously.

Agenda Item 5 – For discussion only: Welcome and introduction from the Executive Director of the Nevada State Infrastructure Bank

Asheesh Bhalla, Executive Director of the Nevada State Infrastructure Bank, took a moment to thank the board for their nomination and thanked the governor for the appointment. Mr. Bhalla also thanked Treasurer Conine, Deputy Jimenez, and the Treasurer's office for their hard work in putting together the financing and framework for this bank. moving forward with the evaluation of applications as quickly as possible. He stated the first application has moved through the statutory review phase for eligibility, and the bank is currently accepting and reviewing applications as they come into the bank. Finally, he noted he is working to develop standard processes and procedures for application, applicant and project review, and standard forms for loan origination and servicing. Motion to approve the amendment by Member Swallow, a second by Member Reynolds. Motion passed unanimously.

Agenda Item 9 - For discussion only: Presentation on the Desert Pines Master Planned Community and opportunities for partnership with the Nevada State Infrastructure Bank.

DRAFT

Daniel Falcon, from McCormack Baron Salazar, stated that his company has been around for 50 years, has communities in 29 states, has done $5 billion in developments, and helped house people in 2500 units with approximately 60,000 people. Their mission is to bring all types of people to a community where they can thrive regardless of background and income status. They also incorporate a design, and improvement process and use community outreach to make sure people can provide input for the neighborhoods. The company also looks to hire within the communities to reflect the cities that they are working in. They are committed to sustainability and building these types of developments to be environmentally safe. He noted this is important for long-term stability and helps to keep costs down. Financing includes about $1.8 billion in cash equity, $900 million in private debt, and another $900 million in federal grants, over $1 billion in local government support, and $200 million from various private foundations and corporations. The Desert Pines planned community incorporates the usage of a golf course located near the Las Vegas Strip, making this location ideal for the new mixed-use development. The company is trying to ensure that the development is around 1800 square feet and proposes to make this a mixed-income and mixed-use development. The mixed-income gives homeownership opportunities as well as multi-family rental opportunities. The current vision for the sight was approved by the City of Las Vegas and approved by the city council and mayor. They are looking to target more affordable income housing for this development, reflective of the needs of the community. The company is looking from the infrastructure bank including grading of the sight, providing streets utilities and all connections to make sure the neighborhood operates appropriately and long term, and having facilities available to everyone. They are looking to connect and expand the development to Cedars Trail, a pedestrian walking area. They are also looking at land usage around the development area. He stated that in terms of financing options, the cost will be around $500 million for the site and the infrastructure itself would be in the range of $35 to $40 million. They will also be looking at how to fund and finance the vertical components, using taxes, bond financing, and 4 percent low-income tax credits, potentially new market tax credits for commercial and education components, as well as the AFL-CIO Housing Investment Trust to help leverage the various components.

Ted Chandler, from AFL-CIO, stated they have a great deal of confidence in McCormack Baron Salazar and in particular, the quality of the communities that they construct. The AFL-CIO is pleased to have the opportunity to bring the resources to the development effort. The key point that would like to be communicated is the leverage that would be created thanks to the State Infrastructure Bank. The development is looking at a magnitude of half a billion dollars, and at least several million dollars of private pension capital to bring to Nevada and Clark County through the development of Desert Pines. The State Infrastructure Bank is looking at leveraging pension capital as much as 8 to 10 to 1, and a total development basis of 10 to 12 to 1.

Member Brown asked if the golf course supplies its own water or has water rights.

Mr. Falcon stated that they have their own water rights and are currently evaluating them as part of their planning. The City of Las Vegas currently owns the golf course.

Mr. Chandler continued with an update about 2 properties in Reno Nevada, to do a substantial rehabilitation and to preserve the affordability of 424 units in two properties. He reviewed there is one in Zephyr Point and the other in Carville Park, owned by Northern Nevada Development Corporation. These will serve over 900 residents, with half of the residents at 30% of the area median income and the rest at 60% of the area median income. The estimated total development cost is $110 million with HIT investment of a little over $70 million. The estimated applications to the Infrastructure Bank will call for $11 million where $2 million will be a short-term investment

paid back in 3 years, with the remainder to be paid back in less than 12 years. He noted from a leverage standpoint, the Infrastructure Bank can look at leveraging private pension capital at more than $6 for every $1 of infrastructure grant money, and $10 for every dollar for total development.

Member Reynolds thanked Mr. Chandler and Mr. Falcon for their presentation as these are much-needed projects for the area.

This is an informational item only and therefore did not require a vote of the members.

Agenda Item 10 - For discussion only: Presentation on the proposed Nevada Facilities Fund project requesting a loan from the Nevada State Infrastructure Bank.

Miles Dickson, from Opportunity 180 members presented their proposed project. When the State infrastructure bank announced its plan to make $15 million available to charter school facilities, Opportunity 180 wanted to bring the best proposal to the state. He stated through the Nevada facilities fund, Opportunity 180 would be able to bring more than $90 million in additional capital, on top of the $15 million, if provided by the State Infrastructure Bank, a total of $105 million. In addition to the capital that Opportunity 180 can bring, the company can bring expertise and community partnerships building a pipeline for eligible schools and projects for the communities that need them the most. He noted Opportunity 180 would like to thank the staff of the Treasurer's office for their help and would like to thank their partners at Equitable Facilities Fund and are excited to bring one of the nation's leaders and resources to Nevada.

Jana-Wilcox-Lavin with Opportunity 180 continued with the presentation, commenting on how they started focusing on charter schools and have evolved their mission over time. This partnership provides an opportunity to ensure there is more money going to kids and in classrooms supporting students, allowing to build a long-time workforce to ensure kids over time are contributing to the community long term in the State of Nevada. One goal reached by Opportunity 180 was to not only bring new philanthropy to the state but also, Opportunity 180 was a recipient of a $23 million federal grant, that allowed support for the expansion of high-quality, nonprofit charter schools serving children who need it most. She noted they are building relationships and have had a relationship with every school in Southern Nevada and are expanding to Northern Nevada. They are looking for another nonprofit mission-driven organization, within the Equitable Facilities Fund, so that more kids have access to great schools in their neighborhoods and find an opportunity to expand access to facilities at low-cost capital that would put more money into classrooms. In the current status of this project, they are on a long-term mission to ensure every child graduates high school, and college and is career ready, prepared to live the life they dream of. Opportunity 180 would like to see 100,000 more kids have access to a great public school in their neighborhood, whether that is a new public or expanded charter school, or an approved district school. As of now, 128,000 children need better options locally. She explained Opportunity 180 has set out to make sure that there are available facilities for schools to continue to invest in. They have found changes in the economy, infrastructure, and capital it is getting more difficult for schools to reduce the amount of money spent on facilities, and make sure the funds are being spent on teachers, students, and resources for the classrooms. She noted they are trying to reduce those costs by making sure there are more schools in neighborhoods and that this proposed partnership brings together what they believe is a meaningful opportunity.

Mike McGregor with Equitable Facilities Fund stated that they are grateful to be exploring a potential partnership. He explained that The Equitable Facilities Fund is a nonprofit national social

impact fund with a mission to save public schools as much money as possible on their facilities expenses. They believe that all children should have quality education and they are proud that they have been able to support this belief by investing close to $1 billion in low-cost with long-term loans in charter schools across the county to the schools that need quality education options the most. He reviewed that 95% of the schools that have been invested in outperform surrounding districts, 70% of students attending the schools are considered low-income, and 80% identify as students of color. The Equitable Facilities Fund appreciates the vision of the SIB and the possible $15 million commitment and is very pleased to propose what they believe is a high-leverage way to make it more affordable for schools to grow and thrive within the State of Nevada. With a $15 million investment from the SIB, the Equitable Facilities Fund proposes to leverage those funds 7 times and more over time as the fund continues to revolve, potentially up to 25 times over the course of 20 years, and to provide at least $100 million of low-cost affordable financing charter schools within Nevada. The $100 million will save the schools at least $20 million in savings before the fund starts to revolve. 7,500 students will attend schools that are financed by the initial round of funding and an estimated 10 or more projects will be completed. Mr. McGregor stated that they are proud collectively with a team of experts in the local community and experts in facilities. He stated it would be their pleasure to take on this commitment on behalf of the State of Nevada.

Ms. Wilcox-Lavin continued with the benefits, stating that they will collect as a nonprofit organization to raise the funds that it costs for time and to administer so that every dollar that is part of the process will go directly to financing facilities for schools, and will provide the labor costs raised separately. She outlined how this proposal will benefit the community, schools, and the state. They look forward to a very open and transparent dialog with the SIB team on the approach to economic and financial performance as well as how to continue to serve students over time. In addition, if savings are around $100,000 a year, that's another administrator or teacher, or more resources for the schools. Opportunity 180 would also like to seek to ensure that the portfolio itself would be serving students with the greatest needs and that those identified in the State public school authority needs assessment are the most at risk for dropping out. The pipeline that is shared in the proposal is estimated, and schools that are known and have worked with that have opportunities, but there is more room to identify more schools across the state and have added more schools as they build relationships.

This is an informational item only and therefore did not require a vote of the members.

Agenda Item 11 - For discussion and possible action: Conditional approval of project eligibility and proposed term sheet with Opportunity 180 for up to 15,000,000 from the Charter School Capital Needs Revolving Account to establish the Nevada Facilities Fund and direction to staff as appropriate.

Director Bhalla reviewed the process that the Bank is implementing for the proposal noting NRS 408.55074, which provides the requirement for loans. The first sub-section states that the qualified borrower that wishes to obtain a loan or other financial assistance from the bank to develop, construct, repair, improve, operate, maintain, decommission, or own an eligible project, must apply to the bank in the manner prescribed by the bank. Mr. Bhalla continued with section 2 of NRS 408.55074 which states that the Executive Director shall (a) review each application and determine whether the application is for an eligible project and (b) at the request of the Board of Directors, submit information to the Board of Directors concerning any eligible projects. Section 3 states that the board of directors shall, from time to time, designate qualified

projects from the amount the eligible projects. The Board of Directors may give preference to an eligible project that has demonstrated local financial support. After project eligibility has been determined, the application will go through the regulatory review phase, then develop a final formal contract that is approved by the Attorney General's Office, and then will come back to the board for final approval of the full terms and conditions.

Chief Policy Deputy Erik Jimenez, with the Treasurer's office, stated that there have been conversations with Opportunity 180 over the last 9 months. Since this would be the first loan that the SIB would potentially be moving forward with, that due diligence was taken to bring back a loan agreement for the board's consideration in an upcoming meeting. He referenced Appendix A, on page 49, of the packet noting a proposed term sheet with the results of the applicant and bank staff in that process. The State's financial advisor, the Debt Management team, leadership of the State Treasurer's Office, and Director Bhalla were involved in the conversations. The applicant is asking for $15 million from the Charter School Capital Needs Revolving Fund. He reviewed the loans that would be leveraged to support the Nevada Facilities Fund, of which the applicant would bring $85 million in outside capital, some in the form of private philanthropy, and some in the form of low-cost debt financing available to nonprofits to secure for the borrower. The maturity that is being proposed is a 20-year maturity and could discuss the maturity and the interest rate. This would be something that would be lower than traditional infrastructure projects. It's important to note that this would be keeping millions of dollars in public school classrooms and every dollar the bank may try to get for additional returns goes against the whole reason for the administration setting up the infrastructure bank and supporting social infrastructure as one of the eligible uses is to make sure whatever investments the bank makes has the highest return for the people of the state, particularly for communities of color and students who need help. A longer term has been proposed in the term sheet as well as a fixed rate of 1.5% per year. Additionally, it is recommended that there are two $7.5 million disbursements, the first being upon the loan closing and the second upon the first disbursement for the closing of the loan issued by the Nevada Facilities Fund. As outlined in the regulation, any borrower that is not using funds from the Affordable Housing Revolving Fund is required to make annual payments starting at the end of the first year to the bank. The payment has been structured with the fact that the money will go to school and be leveraged as effectively as possible to support students and keep the money in the classrooms while meeting regulatory requirements that are outlined in the regulation. The initial annual payment is set at 1 basis point of the outstanding loan balance. A balloon payment equal to the principal and accrued interest would be due at the maturity date. He noted on the last page of the packet, there is a model of what could happen with the initial State Infrastructure Bank loan of how those funds are leveraged with private philanthropy and tax-exempt bonding and how that fund could grow with additional philanthropy and tax-exempt bonding. The facilities fund would be administered by Opportunity 180 and the Equitable Facilities Fund. The Treasurer's Office recognizes that we do not have expertise in the charter school space, and are thankful to Director Feiden and her team at the State's Public Charter School Authority for working with the office on how this project can be structured, to ensure that the guidelines and approval are being met and recognizes that the Treasurer's Office does not have the financial expertise to understand what would be a risky loan to a charter school or an opportunity for a school that is looking to grow. He stated it is an administrative piece that is crucial to make sure that the bank can focus on housing and health care with money coming into the state. He noted there is a reporting requirement in the term sheet that the borrower would submit quarterly reports to the bank, which could be adjusted as needed or as projects are created.

Member Swallow was concerned about the terms of repayment and would like to see Director Bhalla investigate further before approving the loan.

Member Brown questioned if there is a national association that measured good performance on the financial end that would help board members understand if this is a good investment.

Ms. Wilcox-Lavin answered that there are two standards, one being the National Alliance for Public Charter Schools, and work to establish a set of criteria. The other is National Alliance Charter School Authorizers, which establishes criteria for good authorizing to establish standards for schools. As a reminder, when schools are opened in the community, the school has gone through multiple layers of diligence before they would get to the infrastructure bank for facilities financing. The schools have gone through the application and approval process and if they have received startup funding, they would have gone through the Opportunity 180's Charter School Program grant federal funding review process, the second level of evaluation, and the grant is publicly available.

Mr. McGregor added that the Equitable Facilities Fund has the most vigorous diligence process of any charter school in the country, which adheres to said national metrics. To date, 53 loans have zero defaults and intend to keep.

Member Bozien commented about the memo in the packet, that through the organization's philanthropy, the resources would be obtained for administering the funds and handling the administrative overhead. Question number 12 relates to the board's duties to ensure that the bank is consistent with labor and wage standards in NRS 338. Question 12 on the August memo being Opportunity 180 and EFF provide a commitment to the labor standards required for all schools that receive funds through the Nevada Facilities Fund. The response is that Opportunity 180 will require all school borrowers to adhere to applicable labor and wage standards. He asked if the Director of Staff has thought through how those obligations and requirements flow through the bank to the applicant to the subsequent borrowers and how as a board they monitor the compliance to ensure the board is doing their job.

Director Bhalla stated that the board has been thinking about this but at this time does not have a firm answer on how the board would be assuring compliance. The bank would be willing to take any recommendations or guidance and will be part of the final contract.

Deputy Jimenez stated that labor and wage standards are a priority for staff as they work through the regulatory process. All projects are required to pay state prevailing wage rates and some apprenticeship thresholds that need to be met as well for any type of project that would be conducted through Infrastructure bank financing. Staff will be making sure that they are followed through for each project. If different types of reporting thresholds, the board would like to make sure that they work with the labor commissioner.

Member Reynolds commented that there would be a contract agreement that lays out the prevailing rates that would be paid on the project and the apprenticeship agreement for the project and/or labor if applicable. He noted it would be done upfront before the project begins and continue to monitor as the project is completed which is usually done with public works and projects to ensure they meet the requirements under the law.

Member Bobzien commented he would like to see this mapped out before final approval. He

questioned if the application itself needs or supports the goals of the Nevada climate strategy, but he doesn't see how the project would meet the strategy. He expresses they should move forward, whether it is energy efficient construction or emphasis on building techniques but doesn't see anything in the materials to substantiate a response and looks forward as the project progresses.

Member Swallow would like to move to approve the project for statutory eligibility and Director Bhalla to review the term sheet and anything else applicable to the conversation of the meeting.

Motion to approve the agenda item by Member Swallow, a second by Member Bobzien. Chair Conine abstained from voting on the motion. Motion passed with four members in favor and Chair Conine abstaining.

Agenda Item 12 – Public Comment
No public comment in Carson City or Las Vegas. No written public comment.

Meeting adjourned at 4:12 pm.

Re: State Infrastructure Bank – Agenda Item 5 – Staff Report

The following report has been prepared by Bank Staff to detail the administration and operations of the Nevada State Infrastructure Bank since the last meeting of the Board of Directors in 2022.

Administration / Operations:

Senate Bill 10 from the 82nd Session of the Nevada Legislature made several changes to the administration of the Bank. Most notably, the bill moved the administration of the Bank from the Nevada Department of Transportation into the State Treasurer's Office. The bill also made the State Treasurer the permanent Chair of the Board of Directors.

Additionally, SB 10 revised the makeup the Board of Directors to the Bank, while also increasing the Board to nine members. Since the passage and approval of the bill, eight of the nine board seats have been filled. The Board of Directors now consists of:

- State Treasurer - *Zach Conine, Chair*
- Director of the Department of Business and Industry - *Terry Reynolds*
- Executive Director of the Governor's Office of Economic Development – *Tom Burns*
- Gubernatorial Appointment (County less than 700,000) – *Jesse Haw*
- Gubernatorial Appointment (County less than 100,000) – *Blayne Osborn*
- Senate Majority Leader Appointment (Building Trades Unions) – *Tracy Holland*
- Senate Majority Leader Appointment (Housing and/or hospitality) – *Ken Liu*
- Assembly Speaker Appointment (Banking) – *Matt Kershaw*
- Assembly Speaker Appointment (Tribal Representative) – *Vacant*

Since the passage of the SB 10, the Treasurer's Office staff has worked to ensure that the Bank's operations have continued seamlessly by working to service the Bank's public-facing website, serving as staff to the Board of Directors, evaluating financing applications that have been submitted by potential borrowers, and working to increase the awareness of the Bank to local governments, Tribal governments, and non-profit organizations.

Since Governor Lombardo has not yet named an individual to serve as the new Executive Director of the Bank, the Treasurer's Office staff will continue to perform these functions as long as necessary.

2024-2025 Legislatively Approved Budget:

As a result of budget decisions made during the 82nd Session of the Nevada Legislature, the Bank's operational expenses will continue to be funded from the Consolidated Bond Interest and Redemption Fund (Budget Account 1082) for the 2024-2025 biennium.

The total operational expenses available to the Bank for this biennium are:

- Fiscal Year 2024: $273,874
- Fiscal Year 2025: $258,681

Total Financial Resources Available to the Bank:

In April 2022, the State Treasurer's Office Completed the sale of $75 million in limited-tax General Obligation Bonds to initially capitalize the State Infrastructure Bank.

As part of this bond issuance $40,000,000 was issued in Series 2022A and $35,000,000 was issued as part of Series 2022B (Social Bonds). The cost of issuance for both series of bonds was $238,288, which left the Bank with the net proceeds of $74,761,712 to utilize for loans and other financial assistance to provide to qualified borrowers.

Since the bond sale was completed in 2022, the State Treasurer's Office has invested the funds available to the State Infrastructure Bank in accordance with the investment policy previously adopted by the Board of Directors. As a result of actions made by the Federal Reserve coupled with changing market conditions, the Treasurer's Office has seen significant increases in overall investment returns for the State.

As of October 13, 2023, the Treasurer's Office has generated an additional $1,885,493 on initial bond proceeds for the State Infrastructure Bank. This brings the total amount of funds available for the Bank to provide loans and other financial assistance to qualified borrowers to $76,647,205.

The account balances for the Bank's various loan accounts as of October 13, 2023, are as follows:

- The Affordable Housing Revolving Account *(Budget Account 4673)* - $20,436,046
- The Charter School Capital Needs Revolving Account *(Budget Account 4674)* - $15,328,822
- The Federal Infrastructure Matching Account (Budget Account 4675) - ~~$41,4~~ $40,882,337

Additionally, in the 35th Special Session of the Nevada Legislature, Senate Bill 1 appropriated a transfer of $14,000,000 from the State's General Fund to the Bank. This appropriation is authorized to serve as a credit enhancement for the bonds that will be issued by Clark County in the event that Major League Baseball approves a plan for one of teams to relocate to Southern

Nevada. This $14,000,000 is being held in Budget Account 4672, which is the primary account for the Bank.

Staffing / Positions:

The Bank has two approved positions for the Fiscal Year 2024-2025 biennium which include:

- An unclassified Executive Director (appointed by the Governor); and
- A classified Administrative Assistant III position.

Since Governor Lombardo has not yet made a new appointment for the Executive Director of the Bank, the staff from the State Treasurer's Office has been performing the functions of the Executive Director position in the interim.

To ensure that a newly appointed Executive Director can hit the ground running, the Treasurer's Office posted the Administrative Assistant III position and has been interviewing potential candidates over the last several weeks. The Treasurer's Office expects to make a hiring decision on the Administrative Assistant III position soon.

Re: Agenda Item 6 - Update on financing applications received by the Nevada State Infrastructure Bank

---

Since the Board of Directors for the Nevada State Infrastructure Bank ("Bank") last met on October 12, 2022, the Bank has received three additional financing applications from prospective borrowers.

Pursuant to NRS 408.55063, a qualified borrower that is eligible to receive a loan or other financial assistance from the Bank is defined as "a governmental unit, an Indian reservation or Indian colony or a private nonprofit entity created for charitable or educational purposes."

Bank staff has preliminarily reviewed these applications and will be working on the full regulatory review of these applications as required under LCB File No. R017-22 after the conclusion of the October 2023 meeting of the Bank's Board of Directors.

Application #1: Carville Park Apartments

- **Applicant:** Northern Nevada Building and Construction Trades Council Development Corporation
- **Project:** Carville Park Apartments
- **Location:** 1224 Carville Park, Reno, NV 89512
- **Amount Requested:** $7,000,000 from the Bank's Affordable Housing Revolving Account

The Carville Park Apartments are currently a 52-unit (208 bed) 100% subsidized Section 8 project currently serving low-income residents in Reno with an emphasis on elderly tenants as well as those with disabilities. The 4.4-acre site currently houses a two-story garden style community, which has been operated by the Northern Nevada Building and Construction Trades Council Development Corporation since its original construction in 1979.

Under this proposed project, the Applicant plans to convert the existing 52 shared quad units into 208 private studios and 1-bedroom units, each with a full kitchen, bathroom, and living space.

This project would be a partnership with the Applicant, the Canopy Companies, and the AFL-CIO's Housing Investment Trust. The AFL-CIO Housing Investment Trust has committed to investing a total of $67,875,000 to support this project, which would leverage the proposed investment by the Bank by 9.7 times.

An expected breakdown of pension matching investment from the AFL-CIO Housing Investment Trust for this project is included below:

Pension Matching Investment

Summary of the investment commitment(s) made by the AFL-CIO Housing Investment Trust (AFL-CIO HIT), the funding request from the Nevada State Infrastructure Bank (NIB) and the multiplier the Bank is expected to generate on it's investment.

Source of Funds	Investment
AFL-CIO HIT Investment: Construction financing through direct tax credit equity bridge loan	14,000,000
AFL-CIO HIT Investment: Construction financing through purchse of tax exempt private activity bonds	30,000,000
AFL-CIO HIT Investment: Construction and permanent financing through purchse of HUD 221(d)(4).	23,875,000
AFL-CIO HIT Investment: Total	**67,875,000**
NV State Infrastructure Bank Investment	7,000,000
NIB Investment Multiplier	**9.70x**

NIB Investment Multiplier = AFL-CIO HIT Total Investment / NIB Investment
Source: The Canopy Companies, Internal Financial Projections •

The Applicant estimates that there will be $50,100,000 in total economic impact from this project, which would generate $2,100,000 in State and Local taxes as a result of the project. The Applicant also estimates that the project will result in the creation of 286 jobs and the retention of 5 jobs, which includes:

- Direct Jobs: 147 (294,375 project work hours) with average wage and benefits of $61.60/hour;
- Indirect Jobs: 40 with average wage and benefits of $32.10/hour;
- Induced Jobs: 99 with average wage and benefits of $29.30; and
- Retained jobs: 5 with average wage and benefits of $31.00/hour.

Bank staff has done a preliminary review of this application and has determined that the application is complete.

Copies of the financing application that was submitted to the Bank, along with supporting exhibits and documentation are included in the Board Meeting Packet.

Application #2: West Wendover Fire Station Emergency Operations Center

- **Applicant:** City of West Wendover
- **Project:** Fire Station/Emergency Operations Center
- **Location:** 1113 N. Gene L. Jones Way, West Wendover, NV 89883
- **Amount Requested:** $1,642,643 from either the Federal Infrastructure Matching Account or the State Infrastructure Bank General Account

The City of West Wendover has applied to the Bank to obtain gap financing for the West Wendover Fire Station Emergency Operations Center ("WWFS-EOC") project, which includes the construction of a facility of approximately 11,300 square feet in size.

The proposed facility would include just over 2,100 square feet of office and general operations space, along with 9,400 square feet of apparatus bays and support areas. According to the Applicant, the facility is designed to accommodate future expansion for the city as needs develop, including expansions to office areas, training rooms, storage and living quarter components for public safety personnel.

The total cost for the proposed WWFS-EOC is $13,574,691, of which the applicant has already secured $11,932,068 in funding. A breakdown of the various sources of funding for the project is included in the table below:

Source of Funding	Amount
USDA Rural Development Loan	$8,906,800
Cash supplied by the Applicant	$2,325,268
Nevada Community Development Block Grant Funds (GOED)	$500,000
USDA Grant	$200,000
Proposed SIB Gap Financing	$1,642,623
Total	**$13,574,691**

Using an analysis performed by the Nevada Governor's Office of Economic Development, the Applicant expects that this project will result in 98 construction and development jobs for the project with an average wage of $53.84/hour.

Additionally, the Applicant expects that project will result in 16 full-time fire department personnel positions that will be created through this project with an average wage of $40.77/hour.

Bank staff has done a preliminary review of this application and has determined that the application is complete.

Copies of the financing application that was submitted to the Bank, along with supporting exhibits and documentation are included in the Board Meeting Packet.

Application #3: Lincoln County Power District Local Generation and Resiliency System

- **Applicant:** Lincoln County
- **Project:** Lincoln County Power District Local Generation and Resiliency System
- **Location:** Crestline Road, Panaca, NV 89042
- **Amount Requested:** $5,000,000 from either the Federal Infrastructure Matching Account or the State Infrastructure Bank General Account

Lincoln County is seeking to partner with the SixCo Nevada, Inc. to build a Local Generation and Resiliency System for the Lincoln County Power District ("LCPD"). The project is intended to

replace the open-market energy purchases which are regularly made by the LCPD, with a 10-megawatt solar generation facility and energy storage system, with an accompanying 17 miles of transmission lines to connect the LCPD grid to the generation facility.

Overall, this anticipated $45.35 million project is intended to create a local source of renewable energy generation within Lincoln County, thereby replacing the electricity which LCPD has to purchase on the open market to make up for the shortfall of electricity available from Hoover Dam. In calendar year 2022, these open market purchases led to an approximate $935,000 operating loss for the LCPD. As a result, customer rate increases have occurred to offset this loss - thereby reducing the disposal income available to Lincoln County residential and non-residential customers.

The Applicant is anticipating applying to the USDA for funding to support the project through the Powering Affordable Clean Energy (PACE) Program authorized by the Inflation Reduction Act. In order to prepare its application to the USDA for PACE Program funding, Lincoln County has applied to the Bank for $5,000,000 in funding for working capital to allow the County and its development partner to prepare necessary feasibility studies and secure the land for the project.

Since the Applicant has not yet completed all the exhibits required by the Bank in its Financing Application, Bank staff is working with the Applicant to complete these items before it can be brought forward to the Board of Directors for its consideration.

Copies of the financing application that was submitted to the Bank, along with supporting exhibits and documentation are included in the Board Meeting Packet.

Re: Request for $7.0M in Funding to Facilitate the Preservation & Reconstruction of Carville Park
An aging affordable housing community currently home to 209 very low-income (VLI) and extremely low income (ELI) elderly households.

The city of Reno is a model city in many ways—in commerce, recreation, and amenities, just to name a few. The secret to its successes? It listens to and solves the needs of its people. City leadership and the Nevada State Treasurer's Office have recognized the housing challenges that exist today and are addressing those challenges through diverse and creative solutions.

The Canopy Companies, in partnership with the Northern Nevada Building & Construction Trades Council Development Corporation are committed to being part of the solution and are proud to present what we believe is poised to be another model of progress: Carville Park Apartments, a redevelopment project that will preserve some of the city's most at risk housing, provide a greater sense of home to those most in need, and empower and reward the men and women of the construction trades who will be integral to the Project's success. The proposed redevelopment will preserve 209 units of housing in the heart of Reno—100% affordable—serving those with income levels at or below 50% of AMI—with onsite services and staff.

The Project is the result of a new strategic joint venture between the Northern Nevada Building & Construction Trades Council Development Corporation ("NNBCTC DevCorp"), a Nevada nonprofit with the mission of providing affordable housing to the residents of northern Nevada, and The Canopy Companies ("Canopy"), an affordable housing development company with a focus on historic preservation and environmentally sustainable construction (the "Partnership"). The Partnership was formed with the objective of improving the quality of life for low-income residents in northern Nevada while empowering the workforce that is critical to any project's success.

In keeping with the Partnership's dual mandate, the Project provides the ideal opportunity to preserve the long-term affordability of 209 units of affordable housing and transform the Property to better meet the needs of those it serves. Originally constructed in 1978, the proposed redevelopment of Carville Park Apartments (the "Property" or "Project") aims to deliver high-quality, environmentally sustainable housing, well-positioned to remain affordable in perpetuity. The plan includes a full renovation of the units, amenities and common spaces including a reconfiguration of all the existing, functionally obsolete shared "quad" units into a mix of 209 private studios and 1-bedroom units, each with a full kitchen, bathroom, and living space. The Property's exterior will undergo a complete transformation and a range of new amenities and services will be available to residents, including supportive services, recreational activities, and community events. The goal of the Project is to create functional and efficient living spaces while improving the residents' health, wellness, and happiness.

As part of our commitment to environmental sustainability, the Project plans to install a state-of-the-art roof and carport mounted solar energy storage system, enabling the Property to generate its own renewable energy. To further improve energy efficiency, new windows, LED lighting, water-efficient fixtures, ENERGY STAR appliances, and modernized heating and cooling systems will be installed—all aimed at reducing the Property's environmental impact.

The Project will prioritize union labor both during construction and throughout operations and is committed to honoring prevailing wages and embracing the use of apprentices. The Project is estimated to create 131 high-quality construction jobs (264,000 hours) as well as six permanent positions. The Project will not only be a vehicle for job creation but will also assist with bringing new workers into the profession and improving economic outcomes for the residents of Nevada.

We believe that Carville Park Apartments has the potential to be a model for a new type of affordable housing—a model that benefits all—from the apprentice carpenter working on their first job to the disabled veteran regaining their independence and rediscovering what it feels like to call a place home. Perfectly aligned with the Nevada State Infrastructure Bank's commitment to alleviating Nevada's affordable housing crisis, the Project is seeking $7.0M in funding through the Bank's Affordable Housing Revolving Account. A commitment from the Bank is critical to the feasibility of the $50M proposed redevelopment of Carville Park Apartments and the preservation of its 209 at-risk units.

Sincerely,

V. Atkins

Background

Carville Park Apartments (the "Property") is a 52-unit (208-bed) 100% subsidized Section 8 project currently serving low-income residents with an emphasis on the elderly and disabled. Spanning 4.4 acres, the 2-story garden style community has been owned and operated as affordable housing by the Northern Nevada Building & Construction Trades Council Development Corporation since its original construction in 1979.

Metro Area	Reno-Sparks MSA
Address	1244 Carville Drive
City, State	Reno, Nevada
Zip Code	89512
Census Tract	18.01

Today, as Reno, like many cities, faces an increasingly severe shortage of affordable housing, the existence of projects like Carville Park Apartments has grown in importance. The housing crisis has reached a tipping point, leaving the most vulnerable members of the community with limited options for a place to call home. The demand for affordable housing, especially among those with the lowest incomes, continues to rise while the number of available units dwindles at an alarming rate.

Affordable Demand: ▲ +20%

Over the past 10-years, the number of elderly households living in the Reno metro with annual incomes at or below $34,499 has increased by +2,951 (20.3%).

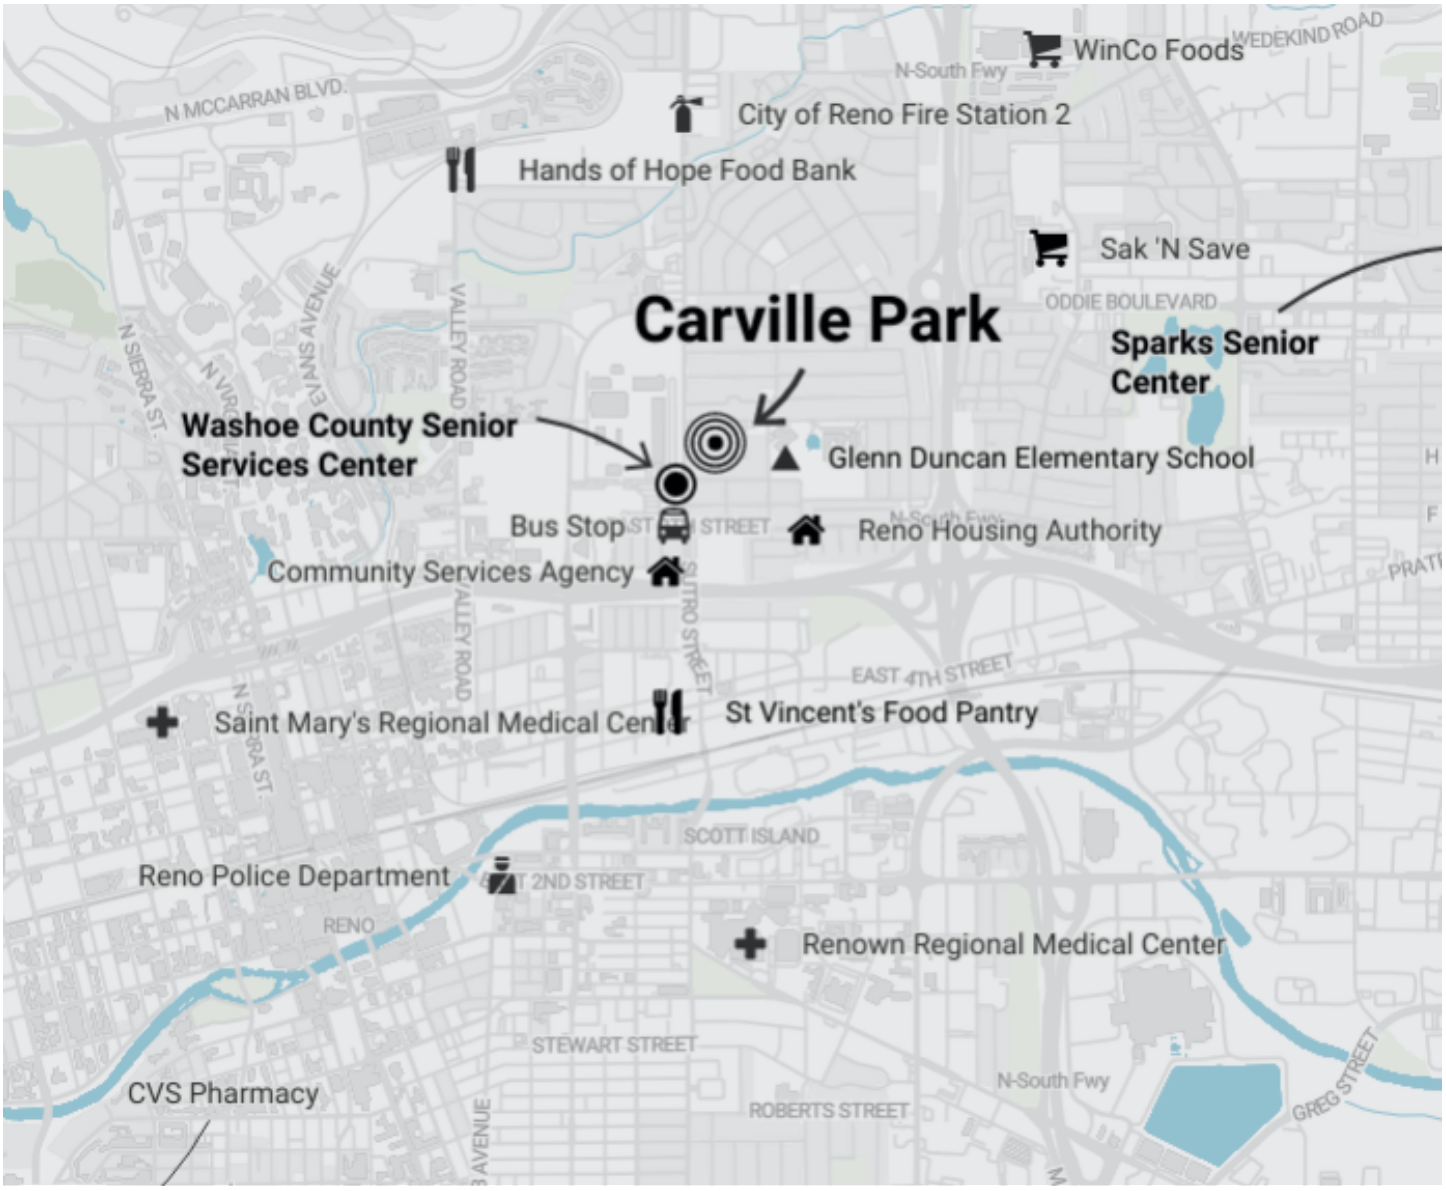
Affordable Supply: ▼ -34%

Over the same period, the metro has seen a 34% reduction in the supply of rental housing affordable to low-income households (at 3x rent to income).

Carville Park Apartments currently makes up a significant portion of the affordable housing available for those at the lowest income levels and ensuring its long-term preservation and affordability is imperative for not only the residents but the community as a whole. The Partnership's objective is to preserve and ensure the long-term affordability of a project that constitutes ± 30% of the metro's supply of federally subsidized units.[a]

Property Location, Access & Amenities

Located in the East University neighborhood of Reno, Nevada, the Property's offers residents' direct access to a wide array of parks, senior and low-income supportive services, public services, and other facilities and amenities.



The Property's convenient location ensures easy access to everything our residents may need. Just north of downtown Reno, it places residents within reach of the active city center while maintaining a neighborhood feel. The proximity to major transportation routes and public transit options is a significant advantage. With the freeway less than five minutes away and two bus lines (5 and 15), located just steps from the Property, residents can travel with ease and freedom. What truly sets the location of the Property apart is its seamless connection to essential amenities. Multiple grocery stores and food banks are conveniently located nearby, making it possible for residents to access fresh and affordable food options. Additionally, being within walking distance of Washoe County Senior Services is a tremendous asset. This will allow residents direct access to a range of specialized programs, support networks, and social activities specifically tailored to their needs.

[a] **Supply** Carville Park's 208 federally assisted units represent nearly 30% of the current supply of project-based units in the Reno-Sparks HUD Metro Area — 700 units in total.

Vision

As the Property sits today, the unit mix is entirely comprised of 4-bed/4-bath “quad” units with the residents of each “quad” sharing a central communal living area (kitchen, living room, patio, etc.). Due to the unique unit mix, the Property is leased to tenants on a “by-the-bed” basis with the existing section 8 HAP contract providing subsidies for up to 208 residents.

The Partnership envisions renovating the Property into a vibrant, environmentally sustainable and amenity rich community with the ability to continue its affordability in perpetuity. The Property will continue to serve low-income tenants with an emphasis on the elderly. Our primary goal is to improve the quality of life for our residents by providing them with the environment, amenities, and services they need to thrive.

To achieve this, we plan to convert the existing shared "quad" units into 208 private studios and 1-bedroom units, each with a full kitchen, bathroom, and living space. The individual studios and 1-bedroom units will offer residents more privacy, independence, and a comfortable living space.

Along with the reconfiguration of units, the redevelopment plan includes repairs and upgrades to the Property’s interior, exterior, and common areas, as well as the installation of new energy efficient appliances, fixtures, and finishes. We will also be improving the building's energy efficiency with the installation of new windows, HVAC systems and energy-efficient lighting. The Project envisions adding a range of new amenities and services, including on-site health services, recreational activities, and community events.

Overall, our goal is to create a community that offers residents a high quality of life and a safe, comfortable, and affordable home. This redevelopment project will help to achieve that goal, while also creating high-quality jobs and economic opportunities for the local community.

Social, Environmental & Economic Impact

Affordable housing is a crucial element in addressing the diverse needs of communities, and the redevelopment of Carville Park Apartments is poised to make a significant difference in the lives of many residents. The following section delves into the various social, environmental, and economic impacts of this transformative initiative, exploring how it preserves at-risk housing, improves health and wellness, increases access to resources, incorporates sustainable design, creates high-quality jobs, and ensures long-term affordability. Furthermore, we'll discuss the AFL-CIO HIT Matching Funds' role in bolstering the project's economic impact, demonstrating the far-reaching benefits of prioritizing affordable housing redevelopment.

Social Impact: Preserve At-risk Affordable Housing

There is a widespread shortage of affordable and available housing both nationally and locally, especially for the lowest-income renters. This Project would preserve and drastically improve existing affordable homes primarily occupied by low and extremely low-income seniors, a vulnerable population in need of safe, stable, and affordable housing. Preserving the affordability and improving the quality of the Property will have wide-spread benefits not just for the residents but also for the community.

It will offer a home and a community atmosphere to some of the area’s lowest-income residents, with direct access to public transportation, parks, government and nonprofit services, and other facilities. The Project will seamlessly blend into the neighborhood, minimizing disruption since the Property is already serving as affordable housing. Moreover, the Project will extend the existing in place restrictions, ensuring the Property remains affordable well into the future. By creating a stable and affordable property, the Project aims to provide low-income seniors with a long-term and secure home while benefiting the community by preserving much-needed affordable housing for a vulnerable population.

Social Impact: Improve Health and Wellness of Residents

A key objective of the Project is to improve the health and wellness of its residents by providing private and self-sufficient units, along with low or no-cost on-site supportive services. The updated unit floor plans will address health concerns related to communal living, especially highlighted by the COVID-19 pandemic. By providing private and self-sufficient homes, residents will have better control over their environment which can reduce the spread of illness. The Project also aims to offer on-site supportive services that cater to the needs of the residents addressing issues such as food insecurity, social isolation, access to basic healthcare, and educational support. The Project recognizes that providing supportive services to residents is essential for improving the overall health and well-being of the community. By offering on-site services, the Project will increase the utilization of these services, providing greater access to health, social, and educational resources. Ultimately, the Project's focus on improving the health and wellness of its residents will not only benefit the individuals living at the Property but will also contribute to a healthier and more sustainable community.

Social Impact: Increase Access to Affordable Housing and Resources

The Project aims to increase access to and awareness of affordable housing opportunities and available resources by implementing effective outreach and marketing strategies that target diverse and underserved eligible persons. The Project recognizes the importance of connecting with hard-to-reach populations and intends to employ a variety of methods to achieve this, including direct outreach, community partnerships, events, tours, brochures and marketing materials, and on-site assistance. To ensure equal housing opportunity, the Project will operate without any barriers to obtaining housing, regardless of an individual's race, color, religion, national origin, gender, familial status, disability, sexual orientation, gender identity, or gender expression. The Equal Housing Opportunity logo or slogan will be prominently displayed in advertising, marketing materials, and on project signs, and staff will be trained both on fair housing policy and on how to appropriately offer support and assistance to potential residents. The Project will also track applicant feedback to monitor the effectiveness of the program and will continually develop more effective outreach strategies based on the findings. These efforts will help ensure that the Project is effectively marketed to diverse and underserved communities, and that all eligible people are aware of the resources available to them.

Social Impact: Increase Population Served by the Property

Due to the current SRO unit mix, leasing is limited to single person households—capping the number of people the Property can serve at 208. However, by converting the SRO “quad” units into standalone studio and one-bedroom units, the Property will be able to lease to single as well as two person households — expanding the renter pool and potentially doubling the property’s capacity.

Social Impact: Commitment to Long Term Affordability

NNBCTC DevCorp has a long-standing history as an affordable housing provider within the community and is committed to ensuring the Project's long-term affordability. The Partnership plans to take the following measures to ensure affordability extends beyond the traditional 30-year period, including:

> NNBCTC DevCorp will retain ownership of the land via a 99-year ground lease. NNBCTC DevCorp will retain fee simple title to the land; with the new partnership acquiring fee simple title to the improvements and a leasehold interest in the land. The new Partnership’s leasehold interest will be in the form of a 99-year market subordinate ground lease. This will mitigate the risk of NNBCTC DevCorp losing long-term control of the Project and will help ensure its continued affordability.

> NNBCTC DevCorp will serve as the special member of Partnership. NNBCTC DevCorp will serve as the co-managing member of the new Partnership and will have the ability to exercise control and/or influence over major partnership decisions. This will help to ensure NNBCTC DevCorp’s long-term ownership of the Property and ability to ensure its continued affordability.

> NNBCTC DevCorp will have a purchase option and perpetual ROFR on any sale. NNBCTC DevCorp will have a Right of First Refusal (ROFR) to purchase the Partnership in the event of liquidation and one (or more) purchase options, granting the non-profit the right to acquire the interests of any remaining partners at a specified point in time(s). This purchase option will ensure that NNBCTC DevCorp has the ability to regain full control of the Property.

These strategic steps demonstrate the Partnership’s shared vision and the NNBCTC DevCorp’s commitment to another 50 years of service and provide the legal mechanisms to ensure the Property remains affordable for many years to come.

Environmental Impact: Sustainable Design, Construction & Operations

The Project aims to be a leading example of sustainable residential housing design, construction and operations. The Project's commitment to high-quality and sustainable building practices is evident in the design choices and selection of environmentally friendly materials and energy efficient and water saving fixtures and finishes. The Projects plans for 100% of the units to be ENERGY STAR certified multifamily units meeting the ENERGY STAR Multifamily New Construction National program requirements and Nevada state energy requirements. The Project is pursuing the integration of solar panels on roofs and newly constructed car ports, to further reduce the Property's environmental impact. The renovated units will consume at least 50 percent less energy for heating and cooling as compared to a non-energy-efficient unit, with the building envelope at least 10 percent more efficient than that of a similar non-efficient unit. These goals align with Nevada's Climate Strategy objectives, including reducing greenhouse gas emissions and increasing energy production from zero carbon dioxide emissions sources. The Project is committed to sustainable building practices and ensuring that its operations promote environmental sustainability while providing high-quality, affordable housing for its residents.

Environmental Impact: PV Solar Generation – Net Zero Consumption

The current construction scope includes the installation of a solar production and storage system on rooftops and car ports – the system has been sized to off-set nearly all the Project's forecast energy needs.

Economic Impact: Creation of High-Quality Jobs

The Partnership is dedicated to ensuring that all individuals working on the Project are fairly compensated, both during the construction phase and throughout operations. All construction will be performed under a to be negotiated project labor agreement to ensure that construction work is performed under equitable conditions. In addition to construction jobs, the Project will create permanent positions offering workers a living wage with full benefits and a pension. The Project also intends on participating in the northern Nevada apprenticeship program in order to help address the community needs of training the next generation of skilled workers with an emphasis on adding more women and minorities to the profession.

The Project plans for more than 50% of work within each construction trade performed by residents of Nevada, with more than 15% of the work within each construction trade performed by disadvantaged workers, and more than 15% of the work within each construction trade performed by apprentices (including at least 5% first-year apprentices).

The Project would create approximately 131 high-quality construction jobs (263,890 hours) as well as six permanent positions. By honoring prevailing wages, prioritizing union labor and embracing the use of apprentices, the Project will create sustainable and equitable high-quality jobs, improving the economic outcomes for hard working residents of Nevada.

Economic Impact: +$65M of matching Funds from AFL-CIO HIT

The Partnership has secured a Letter of Interest from the AFL-CIO Housing Investment Trust to invest based on the investment provided by the Nevada State Infrastructure Bank, subject to the Trust's standard review and approval process. An infusion of outside capital into the community, such as the investment from the AFL-CIO Housing Investment Trust, will have far-reaching impacts beyond just this particular project – it will trigger further economic development, stimulate job creation, and draw in subsequent investments. Moreover, the funds enable the Nevada State Infrastructure Bank to successfully maximize its investment – achieving a 20-fold leverage in the case of Carville Park Apartments – which will enable the Bank to finance an increased number of affordable units.

Construction Scope

Over the 21-month construction period, the redevelopment plan includes investing $24M (hard cost) to fully reconfigure, renovate, redesign, and modernize the units, and update and reimagine the common spaces and resident amenities. The construction scope prioritizes energy efficient upgrades and those aimed at extending the useful life of the Property while lessening its environmental impact.

Residential Buildings:	Ten (10) 2-story residential buildings
Community Buildings:	One (1) single story community center
Construction Type:	Garden, 1 & 2-story
Built:	1979
Rentable Building Area:	70,966 SF
Gross Building Area:	82,095 SF

Unit Interior: “Quad” Conversion

The proposed conversion of the ±1,500 SF "quad" floorplans aims to transform the existing layout into four individual units, maximizing space utilization and enhancing privacy for the occupants. Currently, the quad floorplan consists of four Single Room Occupancy (SRO) units surrounding a shared common kitchen and living area, which does not cater to the modern needs of occupants seeking more personal space and autonomy.

To achieve this conversion, each quad will be divided into one 495 SF one-bedroom, one-bathroom unit, and three separate studio apartments each with a private bathroom, ranging from 292 SF to 361 SF. This redesign will eliminate the shared common areas, giving each unit its own dedicated living, cooking, and bathing facilities. This change will not only provide added convenience for the residents but will also increase the overall appeal of the units to prospective renters.

In order to create these individual units, the existing floorplan will undergo strategic partitioning, bearing in mind optimal functionality and efficient use of space. The one-bedroom unit will be designed to accommodate a separate bedroom, a bathroom, a compact kitchen, and a living area, while the studio apartments will incorporate open-concept layouts that combine living and sleeping areas, a bathroom, and a small kitchenette.

Unit Interior: Finishes & Amenity Package

The unit interiors will be completely renovated and updated to create contemporary and stylish private 1-bedrooms and studios. Each unit will be equipped with its own kitchen, featuring a sink, fridge, stove, and microwave, along with new modern cabinets and countertops. We will also install new stylish flooring and modernize the existing bath areas, along with adding accessibility upgrades. Throughout the units, the old fixtures and finishes will be replaced with sophisticated and stylish water and energy saving upgrades and energy efficient LED lights to improve the Property’s efficiency and reduce energy consumption. Our goal is to create functional and efficient living spaces while improving the residents' health, wellness, and happiness. We will incorporate thoughtful and creative design to enhance the residents' independence, privacy, and comfort. Additionally, we will prioritize resident safety by adding fire suppression and alarm monitoring. The Property's updates aim to provide residents with an inviting and comfortable living space, while promoting energy conservation and sustainability.

The preliminary scope of work includes…

- New individual kitchens including ENERGYSTAR rated appliances, new cabinetry, solid surface countertops, upgraded hardware & water conscious fixtures.
- Modernize existing bath areas including new vanity, solid surface countertops, plumbing, hardware, and water efficient fixtures.
- Full replacement of existing lighting with energy efficient LED lighting.
- Full replacement of existing carpet flooring with resilient LVT.
- Full replacement of interior doors, baseboards, and trim.
- New plugs and switches throughout.

Buildings: Exterior Modernization & Upgrades

To better serve residents and create a modern and high-end atmosphere, the Property's exterior and amenities will undergo a complete transformation. All buildings will be repainted and updated with new siding and railings, while patios and balconies will be repainted and repaired. Large, energy-efficient windows and sliding doors will be installed, promoting sustainability while bringing additional light into the units.

The preliminary scope of work includes…

- Full repaint.
- New high efficiency windows and patio doors.
- New siding, facia, soffits, and trim (repair when possible).
- Modernize railings & patio surrounds.
- Substantial repairs to exterior stairs, treads, and landings.
- Updated signage and landscaping.

Buildings: Community Center & Amenities

The community center and leasing office will be updated and reconfigured to better suit residents' needs. Onsite amenities will include a newly designed lobby area, a modernized leasing office, a mail area, outdoor sitting areas, a fully equipped fitness center, bike racks, a business center, a library, a multi-purpose space, and a laundry room. These amenities are

designed to offer residents a range of options for relaxation, socialization, and physical activity, all within the comfort of their community.

The preliminary scope of work includes…

- Modernize common spaces and amenities, including lobby, leasing office, mail area, rec room, flex space, laundry room, library, business center, bike racks, outdoor areas and sitting areas

Buildings: Overhaul of Existing Systems

The Property was constructed in 1979 and many key building systems are almost 50-years old and are rapidly approaching the end of their effective useful life. The building systems will be revamped, and the components updated, repaired, or replaced as needed. The primary objective of all non-cosmetic upgrades will be to maximize the remaining useful life of the existing structures.

The preliminary scope of work includes…

- Full roof replacement.
- Full HVAC upgrade.
- Installation of ENERGYSTAR water heaters.
- Substantial replacement of existing domestic water and drain lines.
- Electrical panel replacement & rewire.
- Fire suppression and alarm system

Energy Generation: PV Solar & Storage System

As part of its commitment to sustainability, the Project plans to install roof mounted solar panels and/or solar panels on newly constructed carports at the Property. The system is forecast to generate 390,000 kWh annually, offsetting ± 100% of the Property's total energy consumption, reducing the Property's environmental impact.

The Property is ideally located in an Untapped Solar Potential Area that the state of Nevada has identified as having low usage and high potential for solar.

Their expertise in temporary resident relocation (both on and off-site) demonstrates their commitment to minimizing disruption for tenants during the development process. Their knowledge of tenant and project-based rental assistance, including new voucher issuance and mark-up-to-market contracts, ensures that they can navigate complex financial structures effectively.

Furthermore, the team's experience in union labor relations, including the negotiation of Project Labor Agreements (PLAs) and Collective Bargaining Agreements (CBAs), highlights their ability to work cooperatively with labor organizations. They also understand potential pension withdrawal liability exposure, which is crucial for managing long-term financial risks.

The Canopy team's experience with state and federal tax credits, such as low-income housing and historic preservation tax credits, shows their proficiency in securing crucial funding for multifamily development projects. This expertise is invaluable for the Project under consideration, as it may require a combination of these tax credits to achieve its goals. Overall, the Canopy team brings the level of experience necessary to successfully develop a multifaceted and intricate project such as Carville Park Apartments.

Construction Debt: Tax Exempt Private Activity Bonds

The Project will seek $30,000,000 in short term cash collateralized tax-exempt private activity bonds. The bond issuance will make the project eligible for 4% low-income housing tax credit under Internal Revenue Code Section 42(h)(4)(B).

Construction Debt: Equity Bridge Loan

The Project plans to bridge the $22.5M of tax credit equity through a short-term equity bridge loan. The bridge loan is currently sized at $12.8M.

Construction & Permanent Debt: HUD 221(d)(4)

The Project plans to secure permanent financing from HUD through the 221(d)(4) program authorized by the National Housing Act. Sized on a 1.15x amortizing DSCR, the loan is currently projected to generated $23.9M in proceeds.

HAP Contract Mark-Up-to-Market

The Property currently benefits from an existing Section 8 HAP contract that provides subsidies for up to 208 residents. The HAP contract is up for renewal in November 2023 and presents the opportunity to participate in HUD's Mark-Up-to-Market Program which allows for a rent increase up to comparable market-rate rent levels for all units covered under a project-based Section 8 contract. The additional revenue allows the Project to support additional permanent debt, reducing the need for alternative funding sources.

Soft Debt: Deferred Developer Fee (DDF)

A portion of the developer fee for the Project will be in the form of a deferred developer fee — currently $250,000 is expected to be deferred.

Soft Debt: NIB Affordable Housing Revolving Account

The Project is requesting soft funding from the Nevada State Instructure Bank's Affordable Housing Revolving Account in the amount of $7.0M.

Tax Credit Equity: Federal Low Income Housing Tax Credit

The Project is projected to generate $24M of Federal Section 42 Low-Income Housing Tax Credits — the proceeds from the admission of a tax credit investor are forecast to total $20.4M ($0.85 PPC).

Tax Credit Equity: Federal Energy Investment Tax Credit (ITC)

The Project intends to seek an award of Energy Investment Tax Credit under the Federal Tax Credit for Solar Photovoltaics based on the installation of the new solar energy storage system. The Project anticipates securing approximately $1.8M in Investment Tax Credits, generating proceeds of approximately $1.6M ($0.90 PPC).

Tax Credit Equity: Energy Efficient New Homes Tax Credit (45L)

The Project intends to seek an award of the Section 45L Tax Credit for Energy Efficient New Homes. This tax credit has recently been updated and extended and, for units acquired on or after January 1, 2023, provides a $500 credit (increased to $2,500 if prevailing wage requirements are met) available for ENERGY STAR certified multifamily units meeting the ENERGY STAR Multifamily New Construction National program requirements (or the regional program requirements) applicable to the dwelling unit, as specified in Section 13304. The Project anticipates securing approximately $522K in Section 45L tax credits, generating proceeds of approximately $470K ($0.90 PPC).

Tax Credit Sale: Nevada State Low Income Housing Tax Credits

The Project intends to secure an award for and to sell to a third party its allocation of Nevada State Low-Income Housing Tax Credits, the proceeds of which are expected to be available on or shortly after closing. The Project anticipates securing $3.0M in Nevada State Low-Income Housing Tax Credits. The proceeds from the sale of the credits are expected to generate $0.92 cents per credit.

Other: Construction Period Operating Cash Flow

The current projections assume a portion of construction period operating cash flow as a source of funds — currently $1.4M.

Timeline

The total construction timeline is anticipated to be approximately 21-months. Due to the Property's physical plant, construction is expected to be completed in phases, completing buildings on a building-by-building basis. The phased schedule is advantageous in two respects: (i) it will improve tax credit pricing by accelerating the Project's credit delivery schedule and (ii) it will minimize the economic and social impact of relocating the Property's existing residents.

See Exhibits 5A and 5B for detailed pre-development and construction timelines.

Re: Rent Comparability Study of Carville Park Apartments (Subject)
1244 Carville Dr in Reno
Washoe County, NV 89512
HAP Contract No.: NV39H022001
FHA No.: N/A

Dear Victor Atkins:

At your request, Novogradac & Company LLP doing business under the brand name Novogradac Consulting (Novogradac), has performed a Rent Comparability Study (RCS) for the Subject property. The RCS was prepared in accordance with the Uniform Standards of Professional Appraisal Practice (USPAP) and the supplemental standards of HUD's Section 8 Renewal Policy and Chapter 9. Market rents were defined and estimated in accordance with Sections 9-8 through 9-13 of Chapter 9 and Appendix 9-1-2 of the Section 8 Renewal Policy and the report was prepared in accordance with Sections 9-8 through 9-14 of this chapter, as required by Appendix 9-10. We understand that HUD/the Section 8 Contract Administrator (CA) and the project owner will use the estimate of market rents to determine: 1) the owner's options for renewing the project's Section 8 contracts; and 2) the maximum rents allowed under any renewal contract. Without limiting the general applicability of this paragraph, under no circumstances may the Report be used in advertisements, solicitations and/or any form of securities offering.

This letter serves as a transmittal letter for the Rent Comparability Study for the above-referenced property. It is our understanding that the property consists of a 209-unit Section 8 apartment complex with one non-revenue unit where tenants pay 30 percent of their income towards rent. The Subject is currently improved as 52 quads where four single-room occupancy (SRO) with private bathrooms share a common area and kitchen. Of the Subject's 209 overall units, 208 are revenue-generating and encumbered/benefited by a Housing Assistance Payment #NV39H022001 (HAP) contract, which dictates the rent levels (contract rents) for the property. The remaining unit is a non-revenue employee unit.

Neither the appraiser nor the appraisal group have completed any prior engagements on the property that is the Subject of this report within the three-year period immediately preceding the acceptance of this assignment.

The purpose of the study is to estimate the market rent for units that are assisted under the renewed Section 8 contract. Market rent is the rent that a knowledgeable tenant would most probably pay for the Section 8 units as of the date of this report, if the tenants were not receiving rental subsidies and rents were not restricted by HUD or other government agencies. The following table depicts the unit types and the estimated market rate rent conclusions.

Unit Mix				Estimated Market Rent (As-Is)			Estimated Market Rent (As-Renovated)		
Unit Type	# Section 8 Units	# Non-Section 8 Units	Size (SF)	Achievable Rent	$/SF	Separate Grid?	Achievable Rent	$/SF	Separate Grid?
0BR/1BA - Garden	208	0	169	$700	$4.14	Y	$1,150	$3.14	Y
Total	**208**	**0**							

Per the Client's request, we have provided an analysis and estimate of market rents based upon the as is and as renovated hypothetical condition that the proposed renovations are completed as of the effective date of this report. According to information provided by the developer, the total renovation hard costs are estimated to be $24,733,838, or approximately $118,344 per unit. Renovations will consist of the conversion of SRO units into studio units, consisting of a private kitchen and common space. Based on information provided by the developer, renovations will occur with limited tenant displacement. Therefore, our estimate of 'as renovated' rents is based upon the hypothetical condition that renovations are complete and all improvements indicated above are final. The scope of renovations includes, but are not limited to the following:

SCOPE OF RENOVATIONS

Exterior	
New windows	Siding/stucco replacement
Addition of video surveillance	Addition of perimeter fencing
Interior	
New doors, baseboard and trim	New hot water heaters
New paint	New Flooring
New electrical	New kitchen appliances
Addition of perimeter fencing and video surveillance	
Addition of bathroom and kitchen plumbing	
Common Area	
Update to stairwells	Service coordination
Addition of exercise facility	

The Subject property and the comparables were inspected on February 10, 2023, which will serve as the effective date of this report.

Additionally, pursuant to Section 9-14 of the Chapter Nine guidance, the Project's median rent as is and as renovated are below the threshold, as shown in the following table.

INTRODUCTION

ASSIGNMENT APPROACH

The assignment is to render an estimate of the “As Is” and the “As Renovated” market rent for the Subject, based on the hypothetical condition that the proposed renovations are complete as of the effective date of this report. In determination of the estimates, the appraiser will employ a market rent comparison. We surveyed the local market for similar properties leasing units at market rents. We then adjusted the market rents at these properties for any differences that existed. After carefully analyzing the results of the survey and adjustment process, we then reconcile to a final market rent estimate.

DEFINITION OF MARKET RENT

HUD defines market rent as the rent that a knowledgeable tenant would most probably pay for the Section 8 units as of the date of the appraiser’s report if the tenants were not receiving rental subsidies and rents were not restricted by HUD or other government agencies. The Dictionary of Real Estate Appraisal defines market rent as, "The most probable rent that a property should bring in a competitive and open market under all conditions requisite to a fair lease transaction, the lessee and lessor each acting prudently and knowledgeably, and assuming the rent is not affected by undue stimulus. Implicit in this definition is the execution of a lease as of a specified date under conditions whereby:

- Lessee and lessor are typically motivated;
- Both parties are well informed or well advised, and acting in what they consider their best interests;
- Payment is made in terms of cash or in terms of financial arrangements comparable thereto; and
- The rent reflects specified terms and conditions typically found in that market, such as permitted uses, use restrictions, expense obligations, duration, concessions, rental adjustments and revaluations, renewal and purchase options, frequency of payments (annual, monthly, etc.), and tenant improvements (TIs).

PROPERTY IDENTIFICATION

The Subject is an existing 209-unit Section 8 property located at 1244 Carville Drive, Reno, Nevada 89512. The property offers 208 revenue-generating single occupancy rooms (SRO) with common area furnishings and a shared kitchen among four units. All 208 units are subject to Section 8 restrictions where tenants pay 30 percent of their income toward rent. The SRO units have been identified as primary unit types pursuant to HUD Rent Comparability Study Guidelines, Section 9-9A. The Subject is identified as Section 8 Project Number: NV39H022001.

PURPOSE AND FUNCTION OF REPORT

Canopy Acquisitions, LLC is the client in this engagement. The intended users include their assigns, and HUD; the intended use is for submission to United States Department of Housing and Urban Development (HUD) in accordance with HUD’s Section 8 Renewal Policy and Chapter 9. This notice requires owners of Section 8 projects to submit estimates of market rental rates for each type of unit by comparison with comparable market-rate units in the market area.

The purpose of this report is to estimate "As Is" and "As Renovated" market rental rates for each type of unit in the Subject property by comparing unassisted units in the same market area that are similar to the property as to neighborhood (including risk of crime), type of location, access, street appeal, utilities, and other relevant characteristics. Adjustments are made to account for differences between the Subject and the comparable properties.

SCOPE OF WORK

SCOPE OF WORK

The appraiser has been asked to estimate the market rent for the units located at Carville Park Apartments (Subject). For the purposes of this assignment, the appraiser or assistant physically inspected the Subject and comparable data. Individuals from a variety of comparable properties as well as the Subject's management were consulted (in person or by phone). Various publications and sources were consulted and considered in the course of completing this assignment, including but not limited to, realtors, apartments.com, and leasing agents at various apartment complexes.

The scope of this assignment is limited to the gathering, verification, analysis and reporting of the available pertinent market data. All opinions are unbiased and objective with regard to market rent. The appraiser has made a reasonable effort to collect, screen and process the best available information relevant to the assignment and has not knowingly and/or intentionally withheld pertinent data from comparative analysis. Due to data source limitations and legal constraints (disclosure laws), however, the appraiser does not certify that all data has been taken into consideration.

Brad Weinberg, a certified general real estate appraiser with Novogradac, oversaw and supervised all data collection and analysis. K. David Adamescu and Jenna Jordan provided professional assistance to the appraiser. K. David Adamescu inspected the Subject and comparable properties. David Boisture also reviewed the final report. The following actions were taken to complete this RCS.

- On February 10, 2023 , K. David Adamescu inspected the Subject's interior and exterior to determine the property's physical and functional characteristics. The property manager provided additional information prior to and during the site inspection. Unit sizes were provided by management and confirmed visually during our site inspection. As indicated in Chapter 9 Section 9B1, we have inspected at least one unit for each primary unit type. The following table indicates the units inspected.

UNITS INSPECTED

Unit #	Bedroom	Status	Condition
53	SRO	Vacant	Average
73	SRO	Vacant	Average

- Jenna Jordan researched comparable apartment rental activity in the Subject's apartment market. The research included pulling data from Internet sites, local newspapers and publications, interviewing leasing agents or brokers, owners, and managers of local apartment properties via telephone and in person.
- On February 10, 2023 K. David Adamescu inspected the exteriors of each comparable property.
- In February 2023, Jenna Jordan and K. David Adamescu interviewed in person or via a phone conversation various managers of the comparable properties to confirm all data and to collect additional information about each comparable property including size, age, amenities, occupancy rates, and other general market information.
- K. David Adamescu and Jenna Jordan completed the data and adjustment columns of the Rent Comparability Grids using the instructions in HUD's Section 8 Renewal Policy and Chapter 9.
- Brad Weinberg oversaw the data collection, determined final rent conclusions, and reviewed the completed work.

Our findings are summarized within this report, which includes the applicable HUD form 92273-S8. The results of our analysis are reported in a manner consistent with USPAP Standard 2.2(a). This is considered an appraisal report. The reporting form is specific to the client and is intended to adhere to USPAP Appraisal Report guidelines, HUD's Section 8 Renewal Policy, Chapter 9, and our client needs.

DESCRIPTION OF SUBJECT PROPERTY

DESCRIPTION OF SUBJECT PROPERTY

The following description of the existing improvements was taken from our physical inspection of the property and information provided to us by the client. The information for the Subject property was provided by Victor Atkins (805-364-2179) and confirmed during the property inspection.

Carville Park Apartments (Subject) is an existing 209-unit affordable family development located on a 4.39-acre parcel at 1244 Carville Dr, Reno, Nevada 89512. The property was originally constructed in 1979. The property is now proposed to undergo renovations financed with Low-Income Housing Tax Credits (LIHTC). The Subject consists of garden-style structures offering a total of 209 SRO and two-bedroom apartments. All of the Subject's affordable units benefit from project-based Section 8 subsidy where tenants pay 30 percent of their income towards rent. Currently, the Subject is currently improved as 52 quads where four single-room occupancy (SRO) with private bathrooms that share a common area and kitchen. Notable amenities include balconies/patios, complimentary internet, ceiling fans, central air conditioning, central laundry, a clubhouse, unit furnishing, on-site management, video surveillance, a security patrol, and surface parking. Renovations will consist of the conversion of SRO units into studio units, consisting of a private kitchen and common space. Following completion of the planned renovations, the Subject's amenity package will expand to include a fitness center, hand rails, limited access, perimeter fencing, service coordination, and conversion of all quad units to studio units to include individual kitchens and common areas. Service coordination services will include programs addressing basic health care, food insecurity, educational and financial literacy, and social isolation. Total hard costs are estimated to be $24,733,838, or $118,344 per unit. Renovations are anticipated to begin October 2023 and be complete in January 2026.

The following table outlines the Subject's unit mix and unit sizes. The unit sizes were provided by the client and confirmed with the architectural plans for the Subject property. The square footage does not include balconies or mechanical spaces.

Subject Features and Improvements

The following description will discuss the amenity packages of the Subject, the physical features of the site, as well as layout, access issues, and traffic flow.

Unit Amenities: The Subject's unit amenities consist of balconies/patios, blinds, complimentary internet, carpeting, ceiling fans, central air conditioning, unit furnishing, and surface parking. Following completion of the planned renovations, the Subject's unit amenities will expand to include hand rails, private common area space, and private kitchenettes.

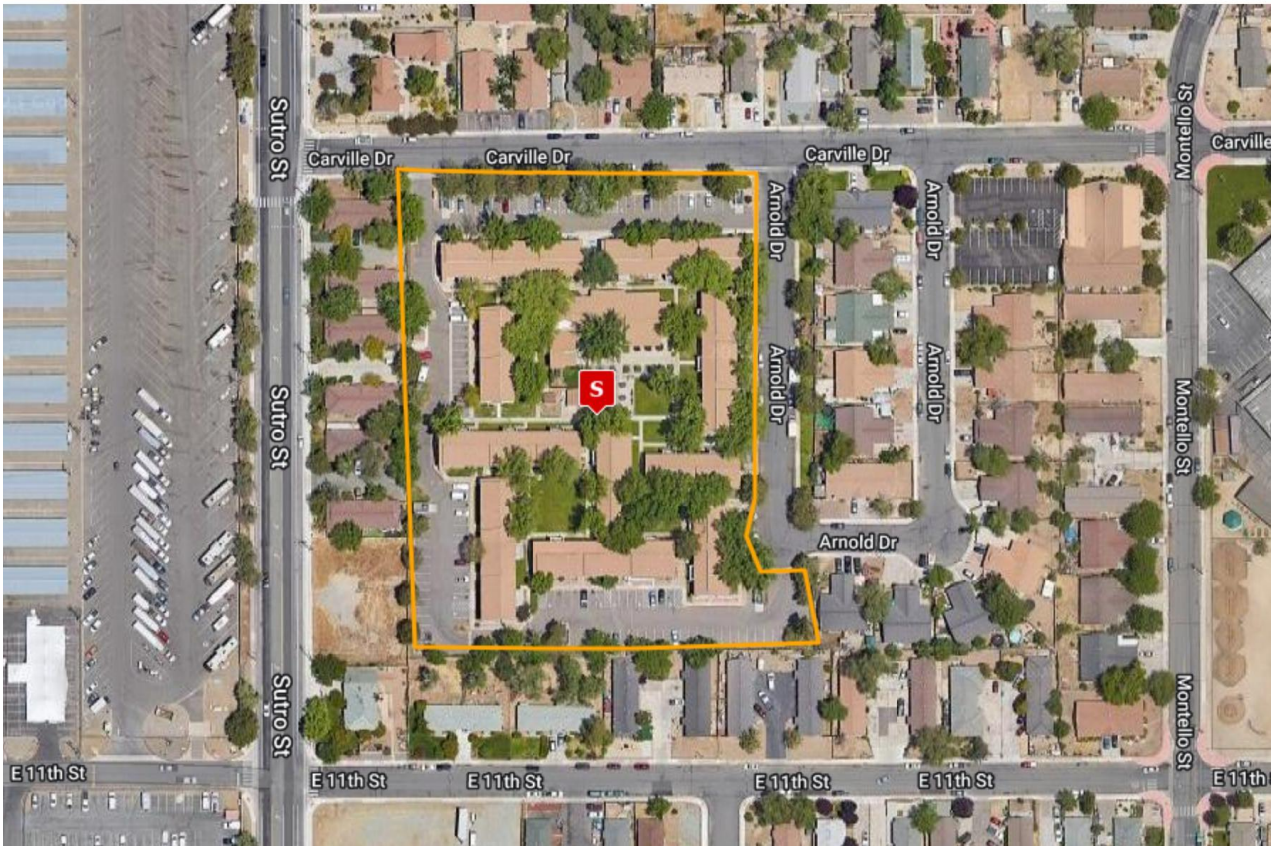
Property Amenities: The Subject's community amenities consist of central laundry, a clubhouse, on-site management, video surveillance and a security patrol. Following completion of the planned renovations, the Subject's common amenities will expand to include a fitness center, limited access, perimeter fencing, service coordination.

Post-Renovation Amenities: Following completion of the proposed renovations, the Subject's amenity package will expand to include increased in-unit and property amenities.

Parking: The property offers off-street parking. The Subject offers approximately 100 off-street parking spaces, surface parking spaces, or 0.48 spaces per unit. We expect the number of parking spaces to continue to be adequate following renovations.

Property Condition and Layout: The Subject's exterior, interior, and common areas are in average condition overall and the floor plans are generally functional. Following renovations, the units will be in good overall condition.

Topography: The Subject site exhibits level topography.



Shape: The Subject site is irregular in shape.

Size: The Subject site is 4.39 acres or 191,228 square feet.

Density: The Subject is developed to a density of 47.38 units per acre.

Existing Improvements: The Subject consists of 11 two-story walk-up garden style residential buildings and one, one-story community building. The structure is steel frame construction on concrete slab foundation with a flat roof. The Subject currently exhibits average overall condition.

An aerial view of the Subject site is shown following.

Source: Google Earth, February 2023

Access and Traffic Flow: The Subject is accessed via Carville Drive, which traverses east/west. Carville Drive provides access to Sutro Street that provides access to N Wells Avenue and Interstate 80. Interstate 80 provides direct east/west access to downtown Reno, and connects with Interstate 580, that traverses north/south. Overall, access is considered good.

Utility Structure

The following table details utility allowance calculations as derived from the most recent utility allowance schedule published by the Reno Housing Authority, effective as of October 1, 2022.

HOUSING AUTHORITY UTILITY ALLOWANCE

Utility and Source	Paid By	0BR
Heating - electric	Landlord	$0
Cooking - electric	Landlord	$0
Electric	Tenant	$59
Air Conditioning - central	Tenant	$0
Hot Water - electric	Landlord	$0
Cold Water	Landlord	$93
Sewer	Landlord	$0
Trash	Landlord	$0
TOTAL - Paid by Landlord		**$93**
TOTAL - Paid by Tenant		**$59**

Source: Reno Housing Authority, October 2022

The Subject offers central air conditioning and electric cooking, heating, and water heating. Tenants are responsible for the electric expense. According to the Reno Housing Authority, utility allowance amounts are issued based on the assumption that landlords pay for water, sewer, and trash expenses. The expense for water, sewer, and trash is issued in one lump sum, as shown above. Because tenants at the Subject are responsible for electricity costs, we utilized the housing authority allowance for tenant-paid electricity.

Scope of Rehabilitation

The Subject is proposed for renovations with LIHTC equity. The developer provided a scope of work for the renovations, which are estimated at $24,733,838 in total hard costs, or $118,344 per unit. The renovation would convert all SRO units into studio units with private common areas and kitchens. The renovation scope includes, but may not be limited to the following:

SCOPE OF RENOVATIONS

Exterior	
New windows	Siding/stucco replacement
Addition of video surveillance	Addition of perimeter fencing
Interior	
New doors, baseboard and trim	New hot water heaters

Addition of bathroom and kitchen plumbing

Per the Client's request, we have provided an additional analysis and estimate of current rents based upon the hypothetical condition that the previously noted renovations are complete as of the effective date of this report.

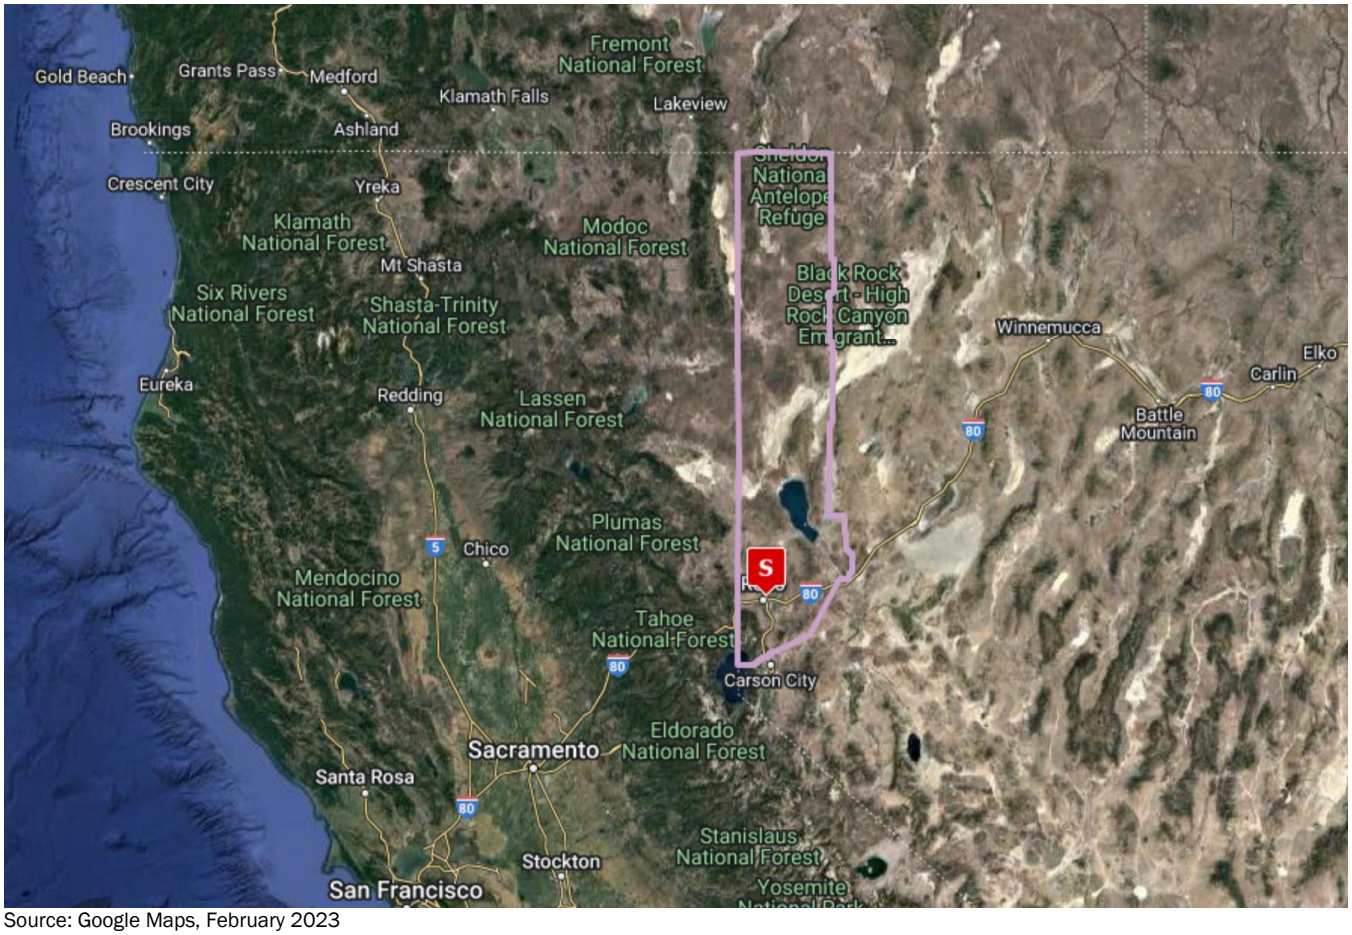
DEFINITION OF SUBJECT MARKET AREA

IDENTIFICATION OF SUBJECT MARKET AREA



We determined the Primary Market Area (PMA) based on our conversations with local market participants including property managers, as well as our physical inspection of the market. The PMA is generally defined as the communities of Reno and Sparks. The PMA boundaries are: State Route 659 to the north; Sparks Boulevard and State Route 659 to the west; S McCarran Boulevard to the south; and N McCarran Boulevard to the west. The PMA encompasses approximately 36 square miles. We believe that additional support will originate from areas outside of the established PMA. We estimate a leakage of 10 percent. To provide a broader economic context for the Subject, we also include a Secondary Market Area (SMA). The secondary market area (SMA) for the Subject is Reno, NV Metropolitan Statistical Area (MSA), which consists of the following counties: Storey and Washoe in Nevada. The MSA is 13,123 square miles.

NARRATIVE DESCRIBING SELECTION OF COMPARABLES

NARRATIVE DESCRIBING SELECTION OF COMPARABLES

Comparables are selected based on the six point criteria as provided under Section 9-10 of Chapter Nine in the Rent Comparability Studies guidelines. These six criteria are as follows:

- Are in the same market area as the Subject project.
- Are not receiving tenant rental assistance (project-based Section 8, certificates/vouchers, PRAC/PAC in a 202/811 project, Rent Supplement, RAP, or any comparable federal/state/other public subsidy). The tenant must be responsible for the full rent due to the landlord.
- Have locations and neighborhood conditions (including crime rates and accessibility to services, employment, transportation) like the Subject's.
- Are projects that are like the Subject in terms of project structure and layout, design, street appeal, age, size and unit mix, unit amenities and utilities.
- Provide services and have project amenities similar to those available at the Subject.
- Are not rent-restricted or controlled by a federal, state, local, or other public program. This category includes LIHTC, HOME, HOPE VI, state/local rent controlled and rent stabilization units, and all units in 236, BMIR, 202/811, and Section 515 Rural Development projects.

We conducted detailed interviews with multifamily properties in the Subject's area, and selected five comparable properties to be utilized in the 92273-S8 adjustment grids. We believe the comparables used in the grids are the most similar to the Subjects studio units and are adequate to support our concluded achievable rents. *It should be noted that there are no market rate properties offering SRO units with shared common areas and kitchens. As such, we have compared the Subject's units to studio units. Although the Subject does not offer full studio units, we utilized studio units at rental properties as comparable units in the rent grids rather than classified listings for shared homes or room rentals. The details of classified listings are typically difficult to confirm and report, specifically the utility structure, square footage, and in-unit amenities. As such, we used classified room rentals and studio rentals to support our adjustments regarding differences in bedrooms rather than as comparables within this report. Although these comparables are not all local to the Subject's neighborhood, we believe they provide adequate support for the Subject's as-is scenario. Additionally, we were unable to find any listings studio units that were more proximate to the Subject site, or any other comparables through CoStar that offer shared common area and kitchen space. CoStar tracks the most comparable properties by aggregating people's searches. The most comparable properties, according to their data, are the ones we used, or are affordable developments. Overall, these locations are considered generally comparable.*

Several of the developments have been excluded due to tenancy, dissimilar unit mix, or affordable/subsidized rent structure. Overall, we believe that the chosen comparables offer a good representation of the Subject's rental market.

NARRATIVE EXPLAINING ADJUSTMENTS AND MARKET RENT CONCLUSIONS

Narrative Explaining Adjustments And Market Rent Conclusions

SRO (Garden - 169 SF) - As Is

The following narrative summarizes the adjustments applied to the comparables in the 92273-S8 Rent Comparability Grids. Line items are discussed in the order in which they appear on the form.

A. Rents Charged

1. $ Last Rent / Restricted?
All properties are market rate and required no adjustment.

2. Date Last Leased (month/year)
The comparables were surveyed in February 2023. No adjustments are necessary.

3. Rent Concessions
None of the comparables are offering concessions. Therefore, no adjustments are necessary.

4. Occupancy for Unit Type
All of the comparables are occupied at 91 percent or better. Accordingly, no adjustments are necessary.

B. Design, Location, Condition

6. Structure / Stories
The Subject offers a two-story garden-style structure, similar to two of the comparables. Parq Crossing Apartments offers a lowrise structure, which did not warrant any adjustment. Square One Apartments, The Bridges At Victorian Square, and The Onyx At 695 offer midrise structures that offer elevators, and received a negative adjustment of $5.

7. Year Built / Renovated
The Subject was built in 1979. The comparables were constructed between 1963 and 2020. One of the comparables reported subsequent renovations (The Onyx At 695). We have not applied an adjustment for age, as we consider condition and appeal to be a better indicator than age. Further, HUD guidelines dictate that adjustments for lines 7 and 8 should not be duplicated. Condition and appeal takes into account the age of the property, therefore, we do not believe an additional adjustment is deemed necessary for year built.

8. Condition / Street Appeal
The Subject was built in 1979. Based on our site inspection, the Subject is currently in average condition, similar to River Arms and Riverwood Apartments. Parq Crossing Apartments and Square One Apartments were built between 2016 and 2020, and exhibit excellent condition. The Onyx At 695 was constructed or most-recently renovated in 2020 and exhibits good condition. The following table demonstrates the rent comparison used to derive our adjustments.

CONDITION ADJUSTMENT - AS IS

Property Name	Condition	0BR/1BA
Parq Crossing Apartments	Excellent	$897
Square One Apartments	Excellent	$790
Mean (Excellent)	-	**$844**
The Onyx At 695	Good	$795
Mean (Good)	-	**$795**
River Arms	Average	$806
Riverwood Apartments	Average	$691
Mean (Average)	-	**$749**
Difference Average vs Excellent		**($95)**
Difference Average vs Good		**($47)**

Note: quoted rents reflect all adjustments, except for condition

As shown in the preceding table there is a rent differential of $95 between the studio comparables in good versus excellent condition and a rent differential of $47 between average and good condition. Accordingly, we applied a negative adjustment of $100 to the comparables in excellent condition (Parq Crossing Apartments and Square One Apartments) and a negative adjustment of $50 to the comparable in good condition (The Onyx at 695). The remaining comparables warranted no adjustement.

9. Neighborhood

The Subject is located in a fair neighborhood, similar to two of the comparables. The neighborhoods surrounding Parq Crossing Apartments and Square One Apartments are considered average. We believe this difference in neighborhoods is not drastic and therefore did not warrant any adjustment.

C. Unit Equipment/Amenities

11. # Bedrooms

The following adjustment is not a true bedroom adjustment as none of the below classifieds offer separate bedrooms in the rentals. However, as SRO adjustments do not have a special line for adjusting in the rent grids, we made this adjustment in the bedroom adjustment line.

It should be noted that the Subject consists of a four-story, lowrise building, a duplex and single-family homes with one occupant per bedroom. The units offer only private bedrooms and tenants must share common areas, such as bathrooms, kitchens and living rooms with the other tenants. Based upon information provided by the client, it appears that HUD views this property as offering 208 Single Room Occupancy (SRO) units. We assume HUD has determined that this is appropriately classified as an SRO. As such, we analyzed the property as a 208 unit SRO property. The Subject's units are most comparable to SRO units. As stated previously, we could not obtain sufficient information from SRO and studio classifieds to input into the rent grids. Therefore,

we used local classifieds for room rentals and studio rentals to determine the adjustment for shared common areas. The following table details our findings.

STUDIO AND SINGLE ROOM RENTALS IN MARKET

Address	City	Type	Asking Rent
Withheld	Reno	Room Rental	$850
Red Baron Boulevard	Reno	Room Rental	$750
Leadership Parkway	Reno	Room Rental	$900
595 Humbolt Street	Reno	Room Rental	$620
Single Room Average			**$780**
219 N Center Street	Reno	Studio	$1,010
695 W3rd Street	Reno	Studio	$1,150
160 Sinclair Street	Reno	Studio	$1,095
Studio Average			**$1,085**
Differential for Size, Kitchen and Living Room			**$305**
Less: Size Adjustment			($60)
Adjustment for Shared Kitchen and Living Room			**$245**

As illustrated, the average room rental is $780 and the average studio rent is $1,085. The $245 differential consists of the difference for size and the lack of a private kitchen. We were unable to obtain unit sizes for the room rentals. As such, we have estimated the differential in size at $60. Therefore, the value for living room and kitchen is $245, which consists of the difference in the average rents between the room rentals and the SRO units less our estimated size adjustment. Therefore, a downward adjustment of $200 is applied to all of the comparables, which accounts for the $245 living room and kitchen adjustment. Although this is above the cap indicated in HUD's guide for adjustments, it meets the requirement that those adjustments made above the cap be supported with market evidence. We believe the paired analysis between properties to be sufficient market evidence.

12. # Bathrooms

All five comparables offer one bathroom in their units. The Subject's units offer a private bathroom. Therefore, no adjustments are warranted.

13. Unit Interior Square Feet

The Subject and the comparables vary in square footage. Most market observers agree that with all other variables being equal, a larger unit is more desirable than a smaller unit. However, the value of the additional square footage is mitigated to some degree by the similarity in perceived unit function (i.e. a 600 square foot one-bedroom functions similarly to a 700 square foot one bedroom) reflective of economies of scale. In other words, there is a diminishing return of value for additional square footage, as each additional square foot does not necessarily equal additional functional utility. Matched pairs are the preferred method to use for derivation of an adjustment, particularly in the case of differences in square footage. We used the following match pair analysis to estimate the marginal value of square footage in the local market.

SUPPORT FOR SQUARE FOOTAGE ADJUSTMENT

Property Name	Unit Type	Structure	Rent	SF	Rent / SF	Marginal RPSF (%)
The Onyx At 695	0BR/1BA	Midrise	$1,150	301	$3.82	38%

	1BR/1BA	Midrise	$1,562	849	$1.84

	2BR/2BA	Lowrise	$2,755	1,031	$2.67	
	Difference		**$165**	**229**	**$0.72**	
Average						**26%**

The match pairs indicate price per square foot differentials ranging from 19 to 38 percent, with an average of 26 percent. We applied a 25 percent rent differential to comparables for the unit size adjustment. It should be noted that in accordance with HUD guidelines, we have not adjusted for size differences of less than 10 square feet. This adjustment is within HUD's guidance for sections 11-13.

14. Balcony / Patio
The Subject offers balconies/patios, similar to three of the comparables. The remaining two comparables do not offer balconies/patios, and received a positive adjustment of $10.

15. AC: Central / Wall
The Subject offers central air conditioning, similar to three of the comparables. River Arms and The Onyx At 695 offer wall a/c, and received a positive adjustment of $5.

16. Range / Refrigerator
The Subject offers range and refrigerators in the shared kitchen and commons space area. Adjustments for these appliances was applied in the previously presented 11. Bedroom adjustment.

17. Microwave / Dishwasher
The Subject does not offer dishwashers or microwaves. Riverwood Apartments, River Arms, Parq Crossing Apartments and Square One Apartments offer dishwashers and microwaves, and received a negative adjustment of $10. Microwaves are considered an ubiquitous feature and no adjustments are warranted.

18. Washer / Dryer
In order to determine appropriate adjustments for the comparable with washer/dryer connections, we have used a cost/benefit methodology. An $800 washer and dryer would cost approximately $22 per month over a three-year lifespan of the appliance. If a household does three loads of laundry per week for $3.00 per load, the cost would be approximately $36 per month. This indicates a $14 value to an in-unit washer and dryer. There is also an inherent convenience in offering a washer and dryer in-unit, which is significant. Therefore, we have concluded to a $35 value to in-unit washer/dryers, a $10 value to in-unit washer and dryer connections, and a $5 value for on premise central laundry.

The Subject offers central laundry, similar to three of the comparables. Square One Apartments and Parq Crossing Apartments offers washer/dryers, and received a negative adjustment of $30.

Sro (Garden - 169 SF) - As Is

The following table summarizes the adjusted rents for the Subject's studio unit analysis.

0BR/1BA - GARDEN - 169 SF

The adjusted rents among the five comparables ranged from $690 to $806, with an average of $746 and median of $745. We placed the most reliance on Riverwood Apartments in the SRO grid, as this property received the least net adjustment. Overall, we determined the Subject's SRO achievable market rent (as is) to be $700. Our conclusion is within the range of the comparables and below the average and median adjusted rent.

STUDIO (GARDEN - 366 SF) - AS RENOVATED

Most of the adjustments applied in the 'As Is' scenario are identical in the 'As Renovated' scenario. However, there are a few exceptions. Consideration has been given to the Subject's good condition as renovated, and the fact that the Subject's units will offer additional amenities described as follows.

8. Condition / Street Appeal

The Subject was built in 1979. Based on our site inspection, the Subject is currently in average condition. The Subject is proposed to undergo renovations with estimated hard costs of $118,344 per unit. Following completion of the renovations, we expect the Subject will exhibit good condition, similar to two of the comparables. Parq Crossing Apartments, Square One Apartments, and The Bridges At Victorian Square were built between 2016 and 2020, and exhibit excellent condition. The following table demonstrates the rent comparison used to derive our adjustments.

CONDITION ADJUSTMENT - AS RENOVATED

Property Name	Condition	0BR/1BA

Difference Good vs Average		**$115**

Note: quoted rents reflect all adjustments, except for condition

As shown in the preceding table there is a rent differential of $26 between the studio comparables in good versus excellent condition, as well as a $115 difference between the comparables in good versus average condition. Accordingly, we applied a negative adjustment of $50 to the comparables in excellent condition (Parq Crossing Apartments and Square One Apartments) and a positive adjustment of $50 to the comparables in average condition (River Arms and Riverwood Apartments).

11. # Bedrooms

All five comparables offer studio units, similar to the Subject. Therefore, no adjustments are necessary.

13. Unit Interior Square Feet

The Subject and the comparables vary in square footage. Most market observers agree that with all other variables being equal, a larger unit is more desirable than a smaller unit. However, the value of the additional square footage is mitigated to some degree by the similarity in perceived unit function (i.e. a 600 square foot one-bedroom functions similarly to a 700 square foot one bedroom) reflective of economies of scale. In other words, there is a diminishing return of value for additional square footage, as each additional square foot does not necessarily equal additional functional utility. We used the following match pair analysis to estimate the marginal value of square footage in the local market.

	Difference		**$165**	**229**	**$0.72**	
Average						**26%**

The match pairs indicate price per square foot differentials ranging from 19 to 38 percent, with an average of 26 percent. We applied a 25 percent rent differential to comparables for the unit size adjustment. It should be noted that in accordance with HUD guidelines, we have not adjusted for size differences of less than 10 square feet. This adjustment is within HUD's guidance.

28. Pool / Recreation Areas

The Subject currently does not offer any recreational amenities. Following completion of the renovations, these amenities will expand to also include a fitness center. 4Q17 The contact stated that the range in rents for the one-bedroom is due to the location of the unit in the building. The property is offering a concession of $100 off with a six month lease and $200 off a twelve month lease. The concession indicated in the table is for twelve month leases. Rent for the highest priced one-bedroom units decreased by 2.4 percent.

4Q18 This property is a 240-unit multifamily Low-Income Housing Tax Credit (LIHTC) property. All utilities are included except phone and cable. A LURA is attached to the site which requires all of the units to be set aside for residents earning 60 percent of AMI or less.

1Q20 This property is a former LIHTC development that no longer operates with LIHTC restrictions as of May 2019. The existing LIHTC tenants at the development are permitted to remain at the property and pay LIHTC rents through May 2022. The property is currently undergoing renovations, which are substantial and include common area upgrades and new unit interiors (including new flooring, kitchens, bathrooms, painting, light fixtures, and plumbing fixtures.) The manager reported that only the vacant units are being renovated, as approximately 65 percent of the units are still occupied by former LIHTC-qualified tenants who have remained at the property. All of the current vacancies are down units. The renovated units are anticipated to be available to lease beginning in February 2020. The market rate rents reflect asking rents, as there are no renovated units that are yet occupied.

1Q23 This property is formerly known as Courtyard Centre Apartments, a LIHTC development that has been out of its compliance period since May 2022. Renovations in 2020 consisted of new flooring, kitchens, painting, light fixtures, and plumbing fixtures.

VI. Real Estate Assignments

A representative sample of Due Diligence, Consulting or Valuation Engagements includes:

- On a national basis, conduct market studies and appraisals for proposed Low-Income Housing Tax Credit properties. Analysis includes preliminary property screenings, market analysis, comparable rent surveys, demand analysis based on the number of income qualified renters in each market, supply analysis and operating expense analysis to determine appropriate cost estimates.

- On a national basis, conduct market studies and appraisals of proposed new construction and existing properties under the HUD Multifamily Accelerated Processing program. This includes projects under the 221(d)3, 221(d)4, 223(f), and 232 programs.

- Completed numerous FannieMae and FreddieMac appraisals of affordable and market rate multifamily properties for DUS Lenders.

- Managed and completed numerous Section 8 Rent Comparability Studies in accordance with HUD's Section 9 Renewal Policy and Chapter 9 for various property owners and local housing authorities.

- Designed and implemented rent reasonableness toolkit for Public Housing Agencies (PHA) in support of Housing Choice Voucher program. Rent reasonableness tool provides an estimated rent based on surveyed market conditions specific to the PHA.

- Developed a Flat Rent Model for the Trenton Housing Authority. Along with teaming partner, Quadel Consulting Corporation, completed a public housing rent comparability study to determine whether the flat rent structure for public housing units is reasonable in comparison to similar, market-rate units. THA also requested a flat rent schedule and system for updating its flat rents. According to 24 CFR 960.253, public housing authorities (PHAs) are required to establish flat rents, in order to provide residents a choice between paying a "flat" rent, or an "income-based" rent. The flat rent is based on the "market rent", defined as the rent charged for a comparable unit in the private, unassisted market at which a PHA could lease the public housing unit after preparation for occupancy. Based upon the data collected, the consultant will develop an appropriate flat rent schedule, complete with supporting documentation outlining the methodology for determining and applying the rents. We developed a system that THA can implement to update the flat rent schedule on an annual basis.

- As part of an Air Force Privatization Support Contractor team (PSC) to assist the Air Force in its privatization efforts. Participation has included developing and analyzing housing privatization concepts, preparing the Request for Proposal (RFP), soliciting industry interest and responses to housing privatization RFP, Evaluating RFP responses, and recommending the private sector entity to the Air Force whose proposal brings best value to the Air Force. Mr. Weinberg has participated on numerous initiatives and was the project manager for Shaw AFB and Lackland AFB Phase II.

- Conducted housing market analyses for the U.S. Army in preparation for the privatization of military housing. This is a teaming effort with Parsons Corporation. These analyses were done for the purpose of determining whether housing deficits or surpluses exist at specific installations. Assignment included local market analysis, consultation with installation housing personnel and local government agencies, rent surveys, housing data collection, and analysis, and the preparation of final reports.

- Developed a model for the Highland Company and the Department of the Navy to test feasibility of developing bachelor quarters using public-private partnerships. The model was developed to test various levels of government and private sector participation and contribution. The model was used in conjunction with the market analysis of two test sites to determine the versatility of the proposed development model. The analysis included an analysis of development costs associated with both MILCON and private sector standards as well as the potential market appeal of the MILSPECS to potential private sector occupants.

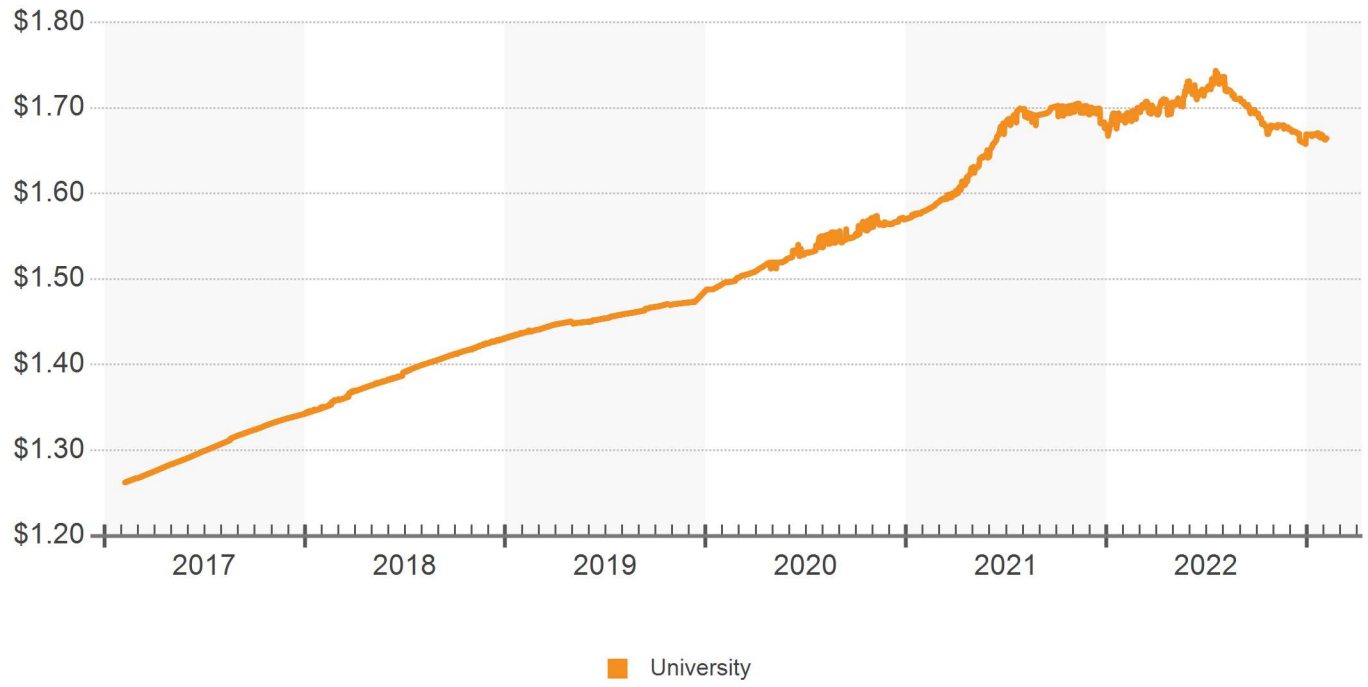
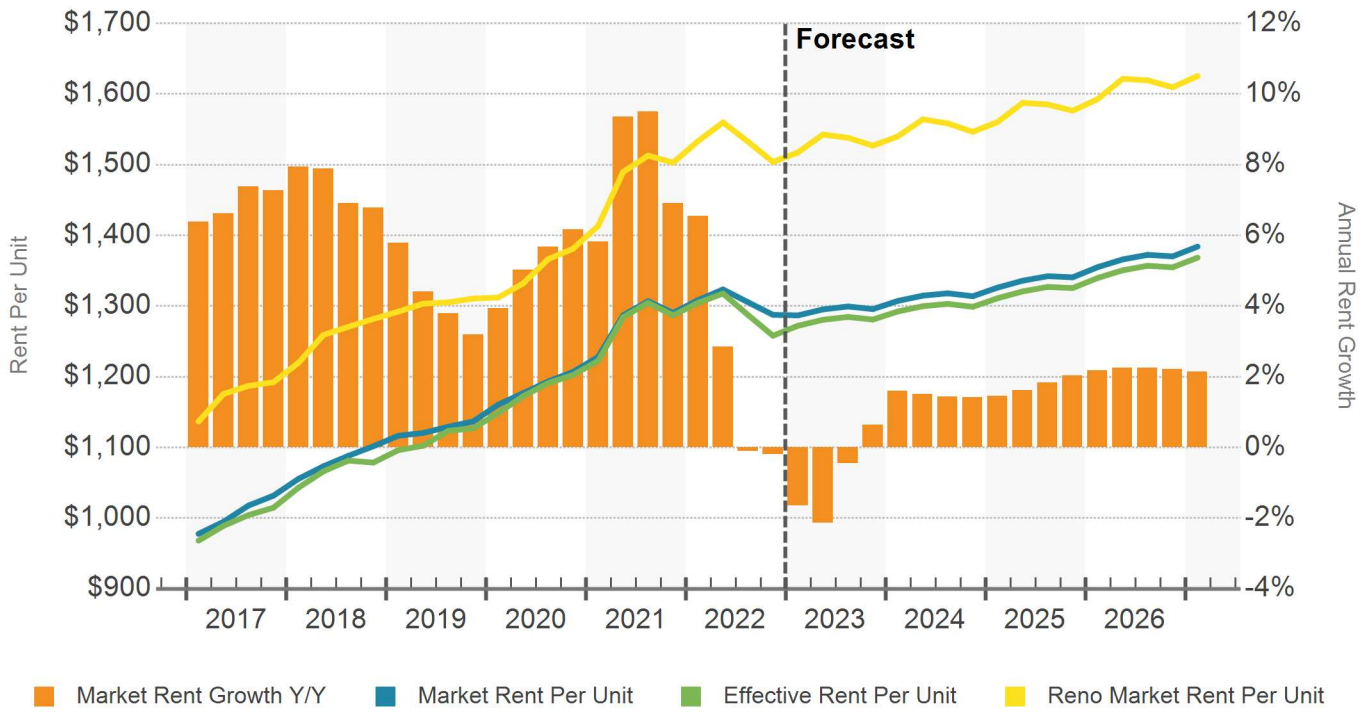
Rent



Renters should be able to find apartments in the University Submarket at somewhat of a discount to other parts of the Reno metro. The average apartment here runs for $1,280/month, moderately below the $1,510/month metro-wide average.

It's a moderately favorable leasing environment for renters in the submarket. Concessions are somewhat common, although by no means outsized.

Rents in the submarket fell by 1.2% year over year as of 2023Q1, a notable deterioration from the 4.6% three-year annual rent growth average.



University has experienced transformative levels of rent growth over the past decade. Apartment rents today are 60.4% higher than they were 10 years ago, which notably falls a few percentage points short of the corresponding increase in the Reno metro.

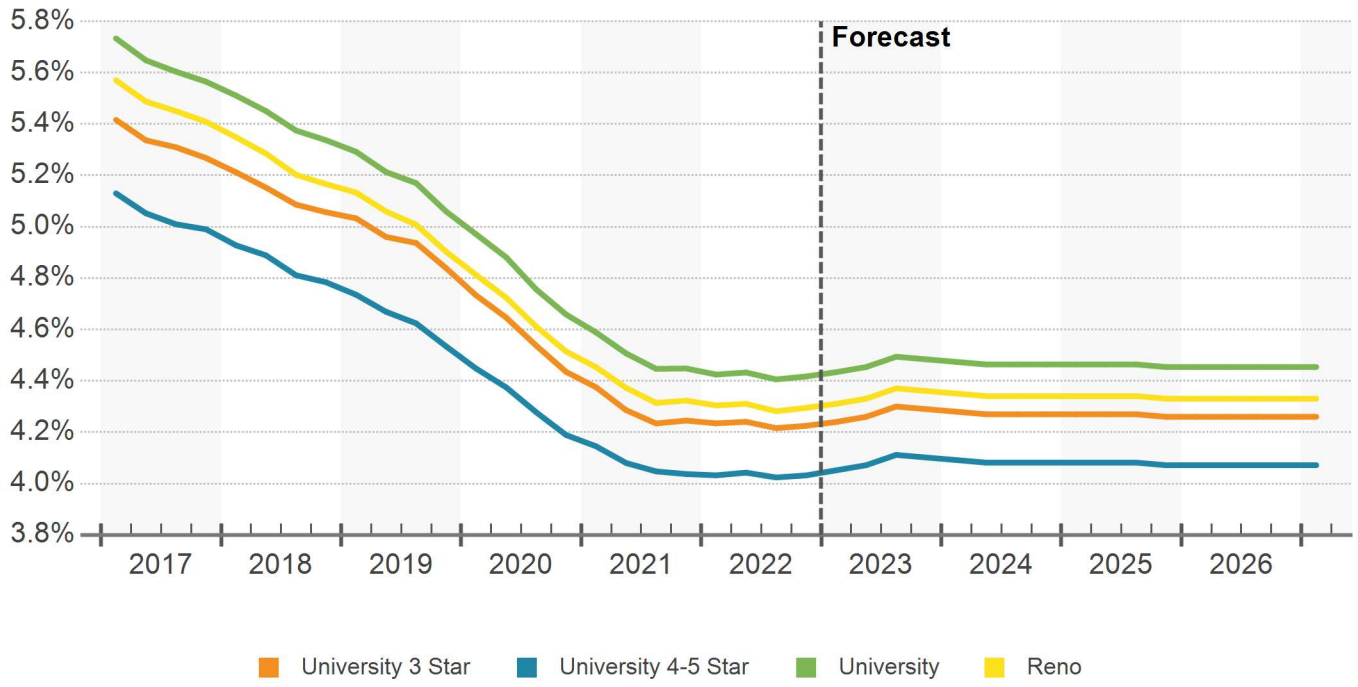
Buyers have shown interest in University multifamily properties and have scooped up assets over the years. That trend has continued through the past 12 months, as 7 communities were acquired. Annual sales volume has averaged $31.8 million over the past five years, and the 12-month high in investment volume hit $82.1 million over that stretch. In the past 12 months specifically, $16.5 million worth of assets sold.



The market price, which is derived from the price movement of all communities in the submarket, now sits at $229,252/unit. That figure is up from this time last year, although the price itself still has some catching up to do to reach the overall average for the Reno metro. The market cap rate has dropped since last year and currently sits at 4.4%. This is the lowest cap rate that has been seen in five years, and it's close to the metro's average.

Located on the eastern side of the Sierra Nevada Mountains, and close to the California border Reno, historically, has been a boom and bust market. Recently, local economic development groups have worked diligently to reshape the local economy through diversification. A number of hi-tech manufacturers like Tesla and Nanotech Energy have opened production facilities east of the city over the past couple years. Additionally, Reno has been a major benefactor from the domestic migration that occurred as a result of the pandemic. The market continues to draw new residents to the region as many people leave California for the comparatively low cost of living and high quality of life that Reno offers. The result is unprecedented market growth in the region.

The vacancy rate of 8.6% has been increasing over the past 12 months, up by 2.8% as 1,600 units have delivered during that time. At the same time, net absorption, has slowed, totaling 290 units over that time period. Interestingly, high-end inventory as greatly outperformed the rest of the market as 4 & 5 Star properties accounted for 170 units of absorption.

Construction levels remain high. Currently, 4,500 more units are being built, which will increase Reno's inventory by 10.6%. Slowing demand combined with high development levels creates a risk for oversupply in the near to medium-term. However, the pace of groundbreaking has slowed drastically with no new projects breaking ground in the second half of 2022 and the same is expected into 2023..

Rent growth has slowed dramatically over the past 18 months, down to -0.5% from the high of 12.0% set in the 21Q2. The average monthly rate sits at $1,510, which is still a discount over the national average of $1,630/month.

Sales volume set a new record in 2021, reaching nearly $610 million,and should exceed that figure in 2022. However, nearly all of that activity came in the first and third quarters when sales volume topped $400 million and $250 million, respectively.

Reno has been in a growth cycle for much of the past decade. The region has benefitted from both incoming population and employers over the last few years, making it one of the fastest-growing markets in the western United States, however like many of the western markets that saw a boom during the pandemic demand is starting to slow and questions surrounding demand rising to meet the high levels of new supply coming to the market.

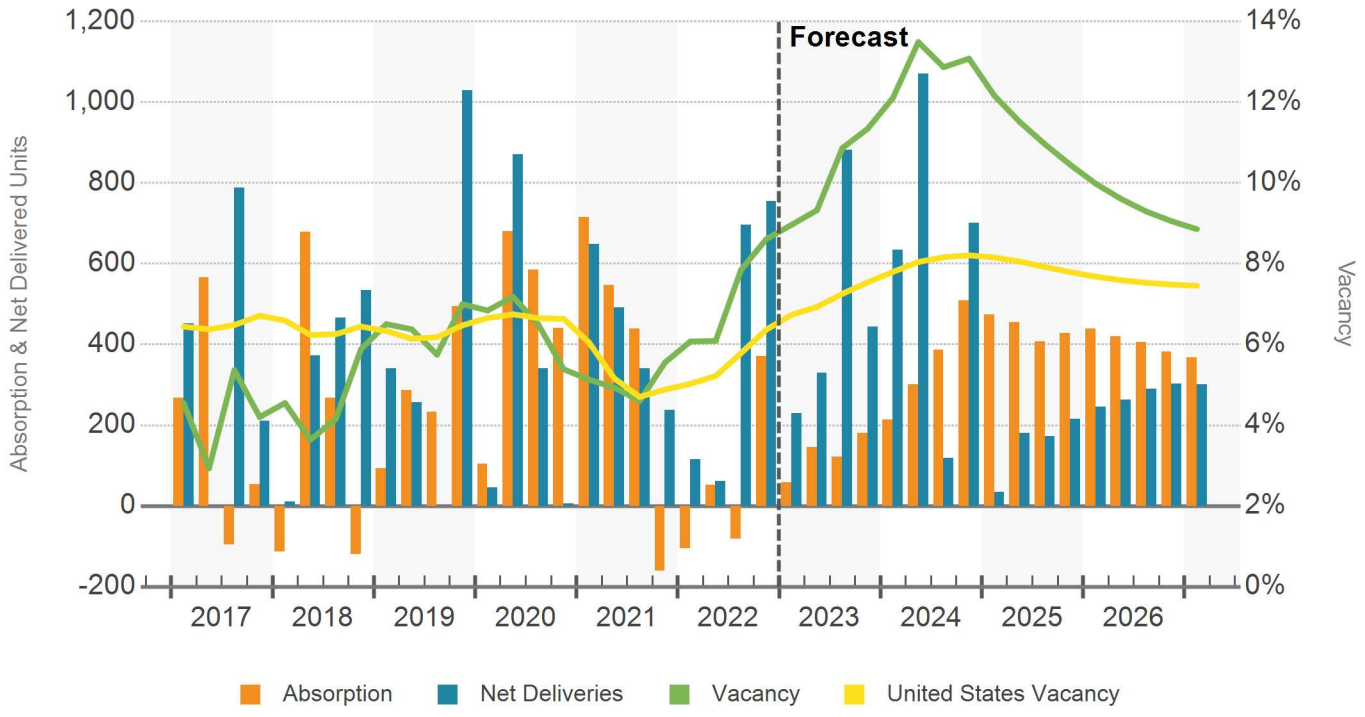
Vacancy



The national flight from high-rent areas was a major driver of growth in the Reno market over the past few years but has slowed significantly in recent months. Net absorption has slowed in 2022 with 290 units over the past 12 months but has surpassed 1,000 units annually since 2019. The vacancy rate rests at 8.6% but has ticked upward in recent periods with deliveries totaling 1,600 units over the past year. Demand will likely struggle to offset supply-driven pressure in coming periods as will with an additional 4,500 are under construction, a 10.6% increase in market inventory.

Over much of the past decade, the metro's population increased at nearly double the national rate. In-migration accounts for more than half of market demand, with California residents alone contributing one-third. Current forecasts indicate that this will likely continue as companies allow their employees to work from home indefinitely; workers can retain their higher-paying jobs while living in an area with cheaper rents.

Besides in-migration, demand was also bolstered in recent years by employment growth that was among the strongest in the U.S. and an increasingly diversified local workforce. The most notable jobs news of the past decade may have been the addition of Tesla. In 2019, the company completed the second phase of its 5.8 million-SF Gigafactory battery manufacturing facility, which could ultimately employ up to 10,000 workers. Moreover, Apple and Google, two of the so-called "Big Four" tech firms, gained a metro presence. Apple occupies a 1.1 million-SF data center, while in 2019, the iPhone maker opened a shipping and receiving outpost in downtown Reno. More recently, Google took delivery of a 100,000-SF data center in 20Q3. After a spike in unemployment at the start of the pandemic, that, too, is faring better, having fallen to 2.5%, which is on par with mid-2017 levels as Reno's economy begins a new growth cycle.

The question facing the market is how long the slowdown in demand will last. Should Reno fail to meet the increase in inventory coming over the next 12 months, there is considerable risk of oversupply. With that said, affordability remains top of mind for many west coast renters and Reno's position as a mid-sized city with an affordable cost of living and a lack of state income tax makes it an attractive option for professionals looking to change their living situation. Additionally, rising interest rates will likely slow the rate of home purchases which could benefit the multifamily market and slowing new household formation further hamper metrics. Concessions may increase and rents could come down as landlords pivot from driving revenue to maintaining occupancy rates.

Rent

The Reno multifamily rent growth has been flat over the past 12 months. This activity is down significantly from the record high of 12% set in mid-2021. Reno's primary draw has been its mix of high quality of life and affordability as new residents flocked to the region. Despite the rent growth, Reno remains a relatively affordable option with an average rate of $1,510/month, below the national average of $1,630/month. The slowing in rent growth is primarily due to 2 factors. First, the wave of new supply in the region has increased the amount of competition for renters, increasing concessions simultaneously. Second, the willingness among prospective residents to relocate to a new metro has waned. Renters that were looking to find a new city largely have and enticing new residents without comparable employment options is difficult as employers look to bring talent back to the office in some capacity.

The development portion of the rent growth narrative is significant. Over the past year, the market has grown by 1,600 units, and another 4,500 are underway, creating significant risk of oversupply and depressing rent growth in the market. Deliveries tend to slow rent growth as competition for residents increases, especially when combined with slowing in-migration.

As mentioned, demand stemming from in-migration, specifically from California, seems to be slowing as overall activity from renters is down compared to 2021. With that said, Reno still enjoys being comparatively affordable and will likely draw new residents to the region as long as remote work remains a dominant economic theme. High levels of development will make rental increases challenging as renters are afforded increasing options in the market.

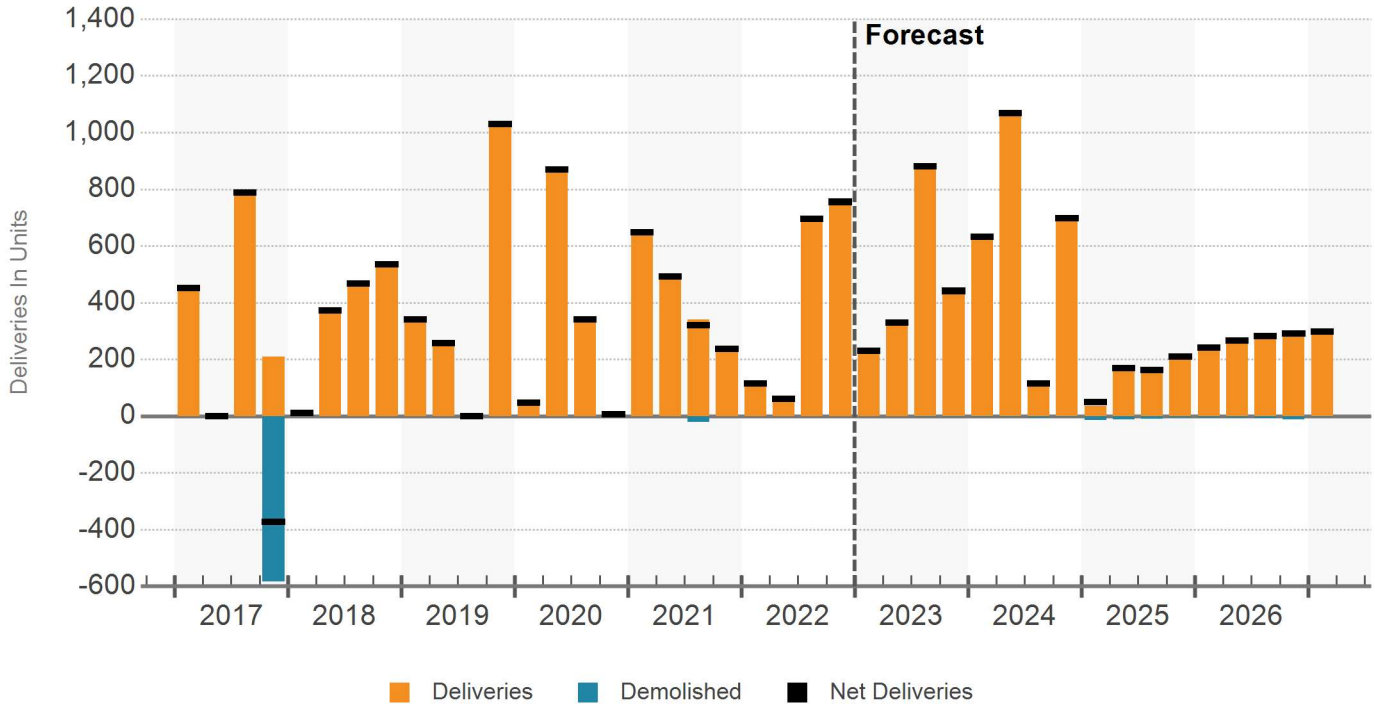
Construction



The Reno multifamily market has enjoyed a significant expansion over the past few years as the market's population outpaced national growth rates for the past decade. One effect was more than 1,000 new multifamily units entering the market annually since 2018 and a total of 7,600 units over the past five years. The pandemic and employees' newfound ability to work remotely accelerated that trend, resulting in significant demand from new residents relocating to the area.

The result is sustained high levels of development, with 4,500 units currently under construction, accounting for another 10.6% increase in inventory. This is just off an all-time high in local multifamily construction in the market set in 2Q22. Projects are spread across the region, but the South Reno and Sparks submarkets share the lead in the area with four each. Developers have pulled back on construction starts and no new projects broke ground in the second half of 2022.

One of the largest projects in the market tis the Palomino at 1060 Damonte Parkway in South Reno. The 328-unit project broke ground in January 2022 with an expected completion date of May 2023. The project is being developed by the Wolff Company out of Scottsdale, Arizona, one of three properties in the market.

The amount of construction combined with slowing demand metrics leaves the market at risk of oversupply. Adding an additional 10.6% of vacant inventory to a vacancy rate that is well above the 10-year historical average will put significant pressure on rents and could lead to negative growth in coming periods.

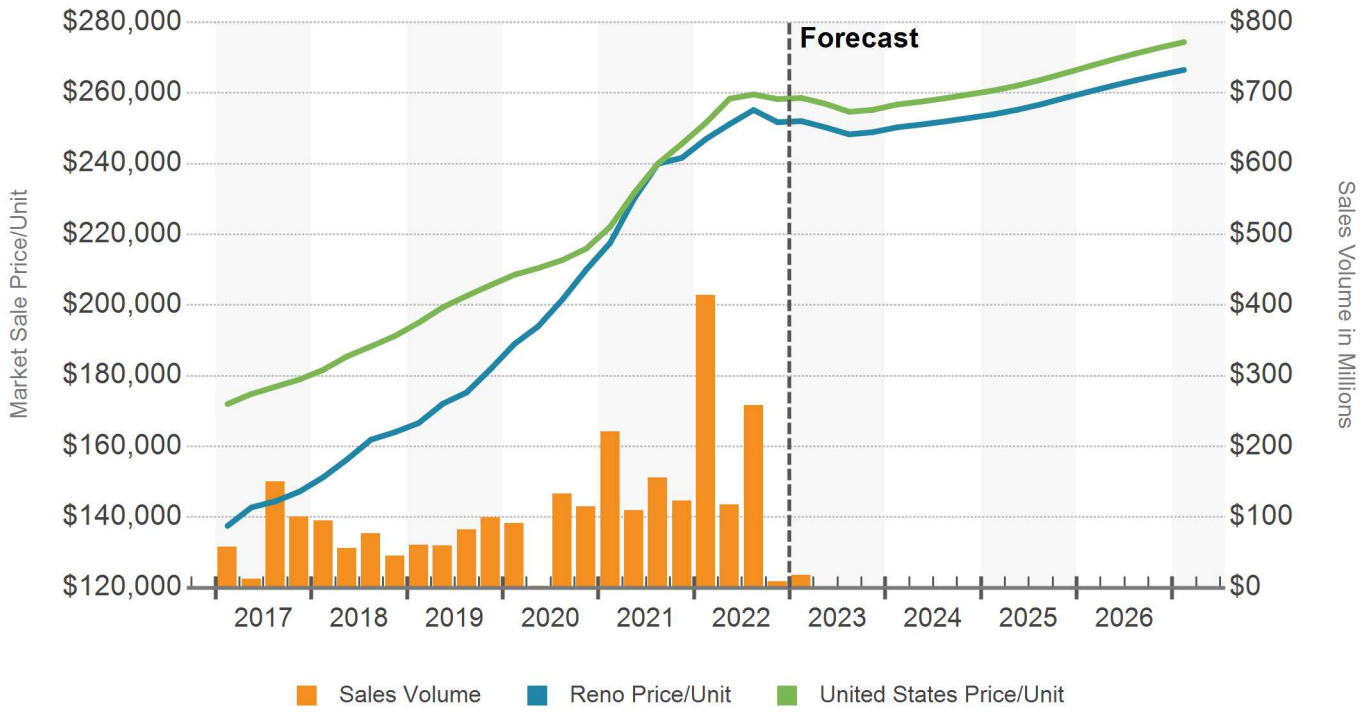
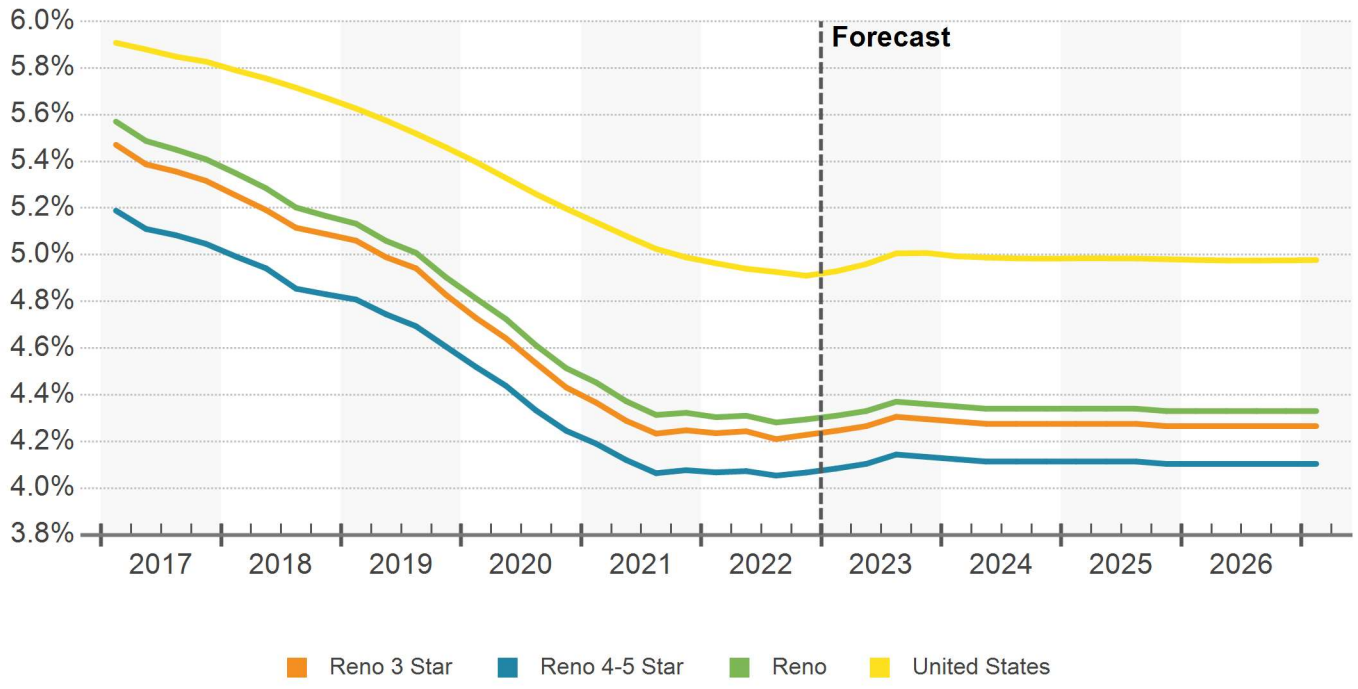
After a recording setting in 2021, activity in 2022 accelerated. In the first quarter alone, sales volume reached $440 million, the second-highest annual figure ever recorded. Over the past 12 months, sales have totaled $637 million across 53 transactions. Activity has been centered around 3 Star and 4 & 5 Star properties recording $302 million and $214 million from 10 and 3 sales, respectively. Pointing to a small number of very high-value trades driving the sales volume figures.



A significant amount of this activity can be attributed to a single transaction. Local firm, ERGS divested eight properties across the market for a total of $303 million ($279,000/unit) in the largest ever multifamily sale in the market. MG Properties out of San Diego purchased nearly 1,100 units in late February, expanding its presence in the swelling Reno market.

Activity since has been slower but is still strong. The largest deal since the end of the first quarter was for Integra Peaks in South Reno by LDK Ventures, based in Sacramento. The 300 units property was completed earlier in 2022 and had already entirely leased. The new owner paid $118.5 million ($395,000 / unit) and is there only multifamily property in the market.

A number of recent deals point to the larger trend toward the institutionalization of Reno's apartment market. Over the past five years, these owners accounted for 42% of all acquisitions while only contributing 21% of the divestitures. If we include REITs alongside this group, it brings the acquisition's total to 50%. Meanwhile, private buyers are being incentivized to sell with market pricing reaching $250,000/unit, a hefty premium over the five-year average of $210,000/unit. As a result, these private owners account for 51% of all sellers over the past five years.



This level of activity is not expected to continue into 2023. Deal volume slowed in the fourth quarter and while the rate of interest rate increases has slowed, more are expected in the coming months. This is expected to hamper sales activity over the next year and possibly longer as pricing corrections and cap rate expansions have already begun.

After a short-term spike in the unemployment rate at the start of the pandemic, Reno has quickly rebounded, with the unemployment rate averaging 2.9% over the past year, comparable to 2017 levels.

Bordering the California/Nevada state line, Reno is located more than 400 miles northwest of Las Vegas and about 130 miles east of Sacramento. The metro's business-friendly environment, proximity to Silicon Valley, and low cost of living made Reno an attractive destination for companies in recent years and helped the local economy become increasingly diversified. This helped spur growth as the economy reopened. Reno has become a popular relocation destination for high-skilled workers looking for more space at a lower cost of living. The influx of population to the region has helped to spur job growth in the market. Office-using jobs have grown at a particularly high rate, increasing by more than 5% year over year, surpassing average growth rates for the past five years.

Prior to the pandemic, employment growth in Reno had been among the highest in the nation for many years: From 2015–19, job growth topped 4%. Several major corporations announced huge expansions here in the past decade, including Apple, Google, Walmart, and eBay. Apple operates a 1 million-SF data center in Reno Technology Park and in 2018 completed a 27,000-SF warehouse in Central Reno. Meanwhile, Google acquired over 1,200 acres of land in 2017 that became a data center.

However, Tesla's Gigafactory is the local economy's new crown jewel. Projected to employ at least 10,000 people, an increase from the original projection of 6,500 workers, the second phase of the Gigafactory, which measures 3.8 million SF, opened in 2019.

While Silicon Valley expansions point to the market's potential, the bread-and-butter of the local economy remains trade and transportation. Limited regulation and the ability to ship to nine Western states on a next-day basis are turning the city into a regional logistics hub. Recent companies to open fulfillment centers in the area include Penguin Random House, Arrowhead Electronics, Panasonic, and Fosdick, and these helped push the trade sector to about 12% above its pre-Great Recession peak. Like their office-using counterparts, manufacturing and trade jobs have grown, as well, increasing by 6.8% and 5.3% year over year, respectively, as of February 2020.

Rebates and Incentives

This section summarizes all incentives available for this project. The actual rebate and incentive amounts for this project are shown in each example.

Facility - Meter #1

Investment Tax Credit (ITC), Commercial - 30% (with Adders) BIGSUN

The Inflation Reduction Act (IRA) of 2022 establishes and extends the federal Investment Tax Credit (ITC) for solar photovoltaic (PV) systems at a rate of 30% of the total PV system cost. The 30% ITC was extended for 10 years, through 2032. Unlike tax deductions, this tax credit can be used to directly offset your tax liability dollar for dollar. The IRA extended the carryback period to 3 years, and the carryforward period to 22 years, in cases where the tax credit exceeds a customer's tax liability in the 'placed-in-service' year.

Total Incentive Value: $787,705

Federal MACRS, Bonus Depreciation - 60% (2024 Place in Service)

Under the federal Modified Cost Recovery System (MACRS), businesses may recover investments in solar PV property through depreciation deductions over a 5-year established lifespan. For PV systems, the taxable basis of the equipment must be reduced by 50% of any federal tax credits associated with the system. The Tax Cuts and Jobs Act of 2017 included provisions that modified bonus depreciation under Code Section 168(k). PV projects that were placed in service after September 27, 2017 and before January 1, 2023 were eligible for 100% bonus depreciation, allowing eligible entities to deduct the entire allowable tax basis of the system in the first year of operation. Projects placed in service in 2024 qualify for 60% bonus depreciation, which means in the first year of service, companies can elect to depreciate 60% of the basis while the remaining 40% is depreciated under the normal MACRS schedule.

Total Incentive Value: $456,869

What our customers say...

"The solar panels have exceeded the projected performance. That efficiency has been amazing and the reductions in our expenses are obvious. The payoff of that initial expense is going to be faster than predicted on the original estimates. In addition to what the solar carports provide from an environmental standpoint, from a financial standpoint it's a no brainer."

"Big Sun Solar came highly recommended to us from a bank we do business with and we now have Big Sun solar panels on many of our hotels throughout San Antonio and plan on rolling it out to other hotels throughout the country. We would definitely recommend Big Sun to anyone in the hotel industry but also to anyone who wants solar."

"We get the real benefit on our insurance premium for our inventory so that was the biggest financial driver on top of tax credits plus accelerated depreciation. I would tell my fellow dealers to contact Big Sun Solar to look at the opportunity and have them crunch the numbers."

AFL-CIO HIT LETTER OF INTENT

May 4, 2023

Mr. Rob Benner
Northern Nevada Development Corporation
1819 Hymer Avenue
Sparks, Nevada 89431

RE: Letter of Interest for Carville Park Apartments
Reno, Nevada

Dear Mr. Benner:

The American Federation of Labor and Congress of Industrial Organizations Housing Investment Trust (the "Trust") is pleased to have the opportunity to express its interest in providing construction and permanent debt financing for the substantial rehabilitation of Carville Park Apartments (the "Project") located in Reno, Nevada. The Project consist of 208 units of affordable rental housing.

With $6.3 billion in net assets as of March 31, 2023, the Trust provides capital for new construction, substantial rehabilitation, and preservation of affordable and market-rate multifamily projects nationwide, using 100% union labor. The Trust focuses its investments on housing projects that provide competitive returns to our union and public pension fund investors, create union construction jobs and strengthen cities.

Since our inception in 1984, HIT has invested $10.4 billion dollars throughout the United States, to create and preserve over 125,000 units of housing, 67% of which are affordable. We appreciate how you have created a plan that modernizes the Project, and are particularly proud that a portion of the Project's financing is proposed to come from the Nevada State Infrastructure Bank's Affordable Housing Revolving Fund.

Despite our interest in being involved, at this time this letter does not constitute a commitment from the Trust to provide financing for the Project. Any commitment must follow a deliberative process which would articulate the general terms and conditions upon which the Trust would consider providing financing. The actual terms and conditions of any commitment issued by the Trust would be dependent upon the results of the Trust's review and analysis of the underwriting and due diligence for a particular phase of the Project, as well as Trust Investment Committee approval. Any such commitment would be in writing and clearly identified as a commitment.

Thank you for your consideration of the Trust's capabilities as you move forward with this major endeavor. If you have any questions, please feel free to contact me at (626) 660-4155.

Best Regards,

Ted Chandler
Senior Managing Director- Strategic Initiatives

The parties acknowledge and agree to use reasonable efforts to adjust the economic terms of the agreement, including without limitation the Purchase Price, prior to Closing to maintain the economic terms of the agreement. The buyout option related to (ii) above shall be priced as follows: the purchase price shall equal the greater of (1) the amounts that would be distributable to Investor Partner in the event of a sale/refinancing and net cash from such sale/refinancing were distributed in accordance with the definitive agreements (assuming the subject property is sold for its fair market value), or (2) the sum of any other payments or amounts due or owing to Investor Partner under the definitive agreements, including, but not limited to, payment of exit taxes.

The buyout option related to (iii) above shall be priced as follows: the purchase price shall equal the greater of (1) the fair market value of the subject property, or (2) the sum of (i) any other payments or amounts due or owing to Investor Partner under the definitive agreements, including, but not limited to, payment of exit taxes, and (ii) the amount necessary to pay any outstanding debt on the subject property. In the event of a buyout pursuant to subsection (iii) above, Dev Corp and Developer shall cooperate to obtain a full release of any guaranty obligations of the Developer and its affiliates.

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Northern Nevada Building & Construction Trade Council Development Corporation (a nonprofit organization), dba Carville Park Apartments, HUD Project No. 125-35077-NP, which comprise the statement of financial position as of March 31, 2022, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the financial statements present fairly, in all material respects, the financial position of Northern Nevada Building & Construction Trade Council Development Corporation as of March 31, 2022, and the changes in net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Northern Nevada Building & Construction Trade Council Development Corporation and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America , and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events considered in the aggregate, that raise substantial doubt about Northern Nevada Building & Construction Trade Council Development Corporation's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards,* we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Northern Nevada Building & Construction Trade Council Development Corporation's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedule of expenditures of federal awards, as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost*

Principles, and Audit Requirements for Federal Awards, is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 9, 2022, on our consideration of Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting and compliance.

Notes to Financial Statements
March 31, 2022

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Business Activity

   The Corporation was formed as a non-profit corporation under the laws of the State of Nevada on April 6, 1979. It was organized to construct, own, and operate a 208-unit rental apartment project in Reno, Nevada, knows as Carville Park Apartments.

   The Project is regulated by the U.S. Department of Housing and Urban Development (HUD) as to rent charges and operating methods. Lower rental charges to tenants are recovered by the Project through rent subsidies provided by HUD. The Section 8 program is a major HUD program.

2. Accounting Methods and Revenue Recognition

   The Project's primary revenue stream is rent charges for residential units under leases with durations of less than one year. The Project records revenue for such leases at gross potential rent as prescribed by HUD. The rental value of vacancies and other concessions are stated separately to present net rental income on the accrual basis. Subsidy revenue for low-income eligible tenants is provided under a Section 8 housing assistance payment contract. This contract requires tenants to contribute a portion of the contract rent based on formulas prescribed by the Department of Housing and Urban Development (HUD). The difference from the calculated subsidy and the contract rent is paid by the HUD. The current contract expires on October 31, 2023.

   Subsidy income is considered part of the lease and is not considered a contribution under ASC 958. This standard indicates that government payments to specifically identified participants are to be considered exchange transactions and potentially subject to ASC 606. The Project believes that both rental and subsidy income streams are exempted from compliance with ASC 606 due to their inclusion under current and future lease standards. Revenue streams subject to ASC 606 include: laundry, vending, pet and parking fees as well as damages. Such fees are ancillary to the lease process and are recognized as revenue at the point in time such fees are incurred.

3. Classification of Net Assets

   Net assets of the Project are classified based on the presence or absence of donor-imposed restrictions. Net assets are comprised of two groups as follows:

   Net Assets without Donor Restrictions – Amounts that are not subject to usage restrictions based on donor-imposed requirements. This class also includes assets previously restricted where restrictions have been met.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3. Classification of Net Assets (Continued)

Net assets with Donor Restrictions – Assets subject to usage limitations based on donor-imposed or grantor restrictions. These restrictions may be temporary or may be based on a particular use. Restrictions may be met by the passage of time or by actions of the Project. Certain restrictions may need to be maintained in perpetuity.

Earnings related to restricted net assets will be included in net assets without donor-restrictions unless otherwise specifically required to be included in donor-restricted net assets by the donor or by applicable state law.

The Project does not interpret the guidance in the standard to include amounts restricted by HUD as donor-restricted. The project believes that these amounts do not meet the spirit of the standard for such a classification or is there any industry standard indicating that others will treat these assets as donor-restricted.

All net assets of the Project at March 31, 2022 were considered to be net assets without donor restrictions.

4. Property and Equipment

Property and equipment are carried at cost or, if donated, at the approximate fair value at the date of donation. Fixed asset acquisitions in excess of $500 are capitalized and depreciation is provided using the straight-line method over the estimated useful lives of the buildings and related land improvements (15 – 40 years) and furnishings and equipment (5 – 7 years). Depreciation expense for the year ended March 31, 2022, was $89,339.

5. Cash and Cash Equivalents

For purposes of the Statement of Cash Flows, the Project considers all unrestricted highly liquid investments purchased with original maturities of three months or less to be cash equivalents. At March 31, 2022, there were no cash equivalents.

Restricted cash consists of Tenant security deposits held in trust and reserves for replacements.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6. Estimates

   The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

7. Investments

   Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statements of financial position. Unrealized gains and losses are included in the statement of activities.

8. Concentrations of Credit Risk

   Financial instruments that potentially subject the Project to concentrations of credit risk consist principally of cash in banks, investment accounts, and tenant accounts receivable.

   The Project has funds in credit union accounts which are insured by the National Credit Union Association (NCUA) up to $250,000. On March 31, 2022, the Project's credit union account balances exceeded the NCUA insured balance by $161,371.

   The Project maintains its reserve funds in investment institutions. The investments that the Project holds consist of money market funds. The funds are insured by the Securities Investor Protection Corporation for the amount invested in the event of fraud, theft, or other such deceptive activity.

   Concentrations of credit risk with respect to tenant accounts receivable are limited because all tenants are required to pay their rent monthly on the first of the month. However, since all of the Project's tenants live and work in the Northern Nevada area, the Project's ability to collect tenant accounts receivable may be affected by economic fluctuations in that geographic area.

   The Project's primary asset is a 208-unit apartment project. The Project's operations are concentrated in the multifamily real estate market. In addition, the Project operates in a heavily regulated environment. The operations of the Project are subject to the administrative directives, rules and regulations of federal, state and local regulatory agencies, including, but not limited to, HUD. Such administrative directives, rules and regulations are subject to change by an act of congress or an administrative change mandated by HUD. Such changes may occur with little notice or inadequate funding to pay for the related cost, including the additional administrative burden, to comply with a change.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

9. Bad Debts

   Uncollectible accounts receivable related to tenant rents are charged directly against operations when they are determined to be uncollectible. Use of this method does not result in a material difference from the valuation method required by generally accepted accounting principles.

   Occasionally, the tenant's financial condition changes subsequent to the receipt of the HUD Subsidy payment. When that occurs, the tenant enters into a repayment contract with the Project for the overpayment. Payments are recorded as rent income when received and reported to HUD, who then reduces the subsidy payment for that tenant by the amount received. However, those payment are only collectible after the tenant's normal rent and as long as the tenant remains a tenant. For that reason, the collectability of those particular contract receivables is in question. To that end the entire balance related to the repayment agreements at March 31, 2022, of $3,890, have been reserved against and included in an allowance for doubtful accounts.

10. Impairment of Long-Loved Assets

    The Organization reviews long-lived assets, including property and equipment and intangible assets, for impairment whenever events or changes in business circumstances indicate that the carrying amount of an asset may not be fully recoverable. An impairment loss would be recognized when the estimated future cash flows from the use of the asset are less than the carrying amount of that asset. To date, there have been no such losses.

11. Advertising and Marketing

    Advertising and marketing costs are expensed as incurred. There was no advertising expense incurred for the year ended March 31, 2022.

12. Income Taxes

    The Project is a nonprofit corporation that is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. Accordingly, no liability for federal income taxes has been provided in the financial statements. It is the Project's tax position that it has not engaged in activities that would jeopardize its exempt status nor has it engaged in activities that would result in unrelated business income tax. The Project's Forms 990, *Return of Organization Exempt from Income Tax*, for the tax years ending 2020, 2021 and 2022 are subject to examination by the IRS, generally for three years after they were filed.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

13. Subsequent Events

In preparing these financial statements, the Project has evaluated events and transactions for potential recognition or disclosure through December 9, 2022, the date the financial statements were available to be issued. Subsequent events after that date have not been evaluated.

NOTE 2 – ALLOWABLE DISTRIBUTIONS

Such funds are not considered by the Project to have donor-restrictions.

The Project manages its liquidity by developing and adopting annual operating budgets that provide sufficient funds for general expenditures in meeting its liabilities and other obligations as they become due. Effective November 1, 1987, management of the Project was provided by the Building and Construction Trades Council of Northern Nevada, a non-profit corporation which elects the Board of Directors of the Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments. During the 2008 and 2009 fiscal years, the owners placed the property up for sale. During those two years, $72,630 was paid by the Project for various costs associated with the sale. These expenditures are an entity expense not a project expense and, as such, constitute an unauthorized distribution to the Project Owner. Therefore, the Owner is required to reimburse the Project for these expenditures. The amount is recorded as due from related party in the statement of financial position. During the year ended March 31, 2022, no payments were made on this receivable, leaving a balance due of $63,730.

The Partnership receives subsidies for 208 apartments which are rented to qualified low and very low income families in an amount which equals the difference between the Contract Rent, as determined by HUD, and 30% of the tenant's family income. The contract expires October 31, 2023.

In addition, the HAP contract provides that the Corporation is entitled to Section 8 Subsidies in the amount of 80% of the Contract Rents for vacant apartments for a period not to exceed thirty days. Housing assistance payments received totaled $965,151 for the year ended March 31, 2022.

To the Board of Directors of
Northern Nevada building & Construction
Trade Council Development Corporation
dba Carville Park Apartment
HUD Project No. 125-35077-NP
Reno, Nevada

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to Financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Northern Nevada Building & Construction Trade Council Development Corporation (a nonprofit organization), dba Carville Park Apartment, HUD Project No. 125-35077-NP, which comprise the statement of financial position as of March 31, 2022, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated December 9, 2022.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control. Accordingly, we do not express an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

However, material weaknesses may exist that have not been identifies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Northern Nevada Building & Construction Trade Council Development Corporation's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the organization's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the organization's internal control and compliance, Accordingly, this communication is not suitable for any other purpose.

Report on Compliance for Each Major Federal Program

Opinion on Each Major Federal Program

We have audited Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments' compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of Northern Nevada Building & Construction Trade Council Development Corporation's major federal programs for the year ended March 31, 2022. Northern Nevada Building & Construction Trade Council Development Corporation's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, Northern Nevada Building & Construction Trade Council Development Corporation complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended March 31, 2022.

Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of Northern Nevada Building & Construction Trade Council Development Corporation and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of Northern Nevada Building & Construction Trade Council Development Corporation's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules, and provisions of contracts or grant agreements applicable to Northern Nevada Building & Construction Trade Council Development Corporation's federal programs.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on Northern Nevada Building & Construction Trade Council Development Corporation's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentation, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about Northern Nevada Building & Construction Trade Council Development Corporation's compliance with the requirements of each major federal program as a whole.

In performing an audit is accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding Northern Nevada Building & Construction Trade Council Development Corporation's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Northern Nevada Building & Construction Trade Council Development Corporation's compliance.

Report on Internal Control over Compliance

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses may exist that have not been identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

To the Board of Directors
Northern Nevada Building & Construction
Trade Council Development Corporation

We have audited the basic financial statements of the Northern Nevada Building & Construction Trade Council Development Corporation for the year ended March 31, 2022, and have issued our report thereon date December 9, 2022. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated July 1, 2022, our responsibility as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management or your responsibilities.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Northern Nevada Building & Construction Trade Council Development Corporation are described in the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2021/2022 fiscal year. We noted no transactions entered into by the organization during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statement was management's determination that all accounts receivable are collectible at year end. We evaluated the key factors and assumptions used to develop the estimate of collectability in determining what is reasonable in relation to the financial statements taken as a whole.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. The following material misstatements detected as a result of audit procedures were corrected by management:

1. Record depreciation expense in the amount of $89,339.

The total net income effect of all adjustments proposed and recorded by management was to decrease net income by $74,918.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated December 9, 2022.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition of our retention.

As required by generally accepted auditing standards and the terms of our engagement, in planning and performing our audit, we considered the internal control solely to determine the auditing procedures to be employed for the purpose of enabling us to express our opinion on the financial statements and not for the purpose of expressing an opinion on the effectiveness of the

District's internal control over financial reporting. Therefore, we express no opinion or other form of assurance thereon.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. Our report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* dated December 9, 2022, noted no significant deficiencies or material weaknesses.

This information is intended solely for the use of management and the Organization's Board of Directors and is not intended to be and should not be used by anyone other than these specified parties.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Notes to Financial Statements
March 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Business Activity

   The Corporation was formed as a non-profit corporation under the laws of the State of Nevada on April 6, 1979. It was organized to construct, own, and operate a 208-unit rental apartment project in Reno, Nevada, knows as Carville Park Apartments.

   The Project is regulated by the U.S. Department of Housing and Urban Development (HUD) as to rent charges and operating methods. Lower rental charges to tenants are recovered by the Project through rent subsidies provided by HUD. The Section 8 program is a major HUD program.

2. Accounting Methods and Revenue Recognition

   The Project's primary revenue stream is rent charges for residential units under leases with durations of less than one year. The Project records revenue for such leases at gross potential rent as prescribed by HUD. The rental value of vacancies and other concessions are stated separately to present net rental income on the accrual basis. Subsidy revenue for low-income eligible tenants is provided under a Section 8 housing assistance payment contract. This contract requires tenants to contribute a portion of the contract rent based on formulas prescribed by the Department of Housing and Urban Development (HUD). The difference from the calculated subsidy and the contract rent is paid by the HUD. The current contract expires on October 31, 2023.

   Subsidy income is considered part of the lease and is not considered a contribution under ASC 958. This standard indicates that government payments to specifically identified participants are to be considered exchange transactions and potentially subject to ASC 606. The Project believes that both rental and subsidy income streams are exempted from compliance with ASC 606 due to their inclusion under current and future lease standards. Revenue streams subject to ASC 606 include: laundry, vending, pet and parking fees as well as damages. Such fees are ancillary to the lease process and are recognized as revenue at the point in time such fees are incurred.

3. Classification of Net Assets

   Net assets of the Project are classified based on the presence or absence of donor-imposed restrictions. Net assets are comprised of two groups as follows:

   Net Assets without Donor Restrictions – Amounts that are not subject to usage restrictions based on donor-imposed requirements. This class also includes assets previously restricted where restrictions have been men.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3. Classification of Net Assets (Continued)

Net assets with Donor Restrictions – Assets subject to usage limitations based on donor-imposed or grantor restrictions. These restrictions may be temporary or may be based on a particular use. Restrictions may be met by the passage of time or by actions of the Project. Certain restrictions may need to be maintained in perpetuity.

Earnings related to restricted net assets will be included in net assets without donor-restrictions unless otherwise specifically required to be included in donor-restricted net assets by the donor or by applicable state law.

The Project does not interpret the guidance in the standard to include amounts restricted by HUD as donor-restricted. The project believes that these amounts do not meet the spirit of the standard for such a classification or is there any industry standard indicating that others will treat these assets as donor-restricted.

All net assets of the Project at March 31, 2021 were considered to be net assets without donor restrictions.

4. Property and Equipment

Property and equipment are carried at cost or, if donated, at the approximate fair value at the date of donation. Fixed asset acquisitions in excess of $500 are capitalized and depreciation is provided using the straight-line method over the estimated useful lives of the buildings and related land improvements (15 – 40 years) and furnishings and equipment (5 – 7 years). Depreciation expense for the year ended March 31, 2021, was $91,548.

5. Cash and Cash Equivalents

For purposes of the Statement of Cash Flows, the Project considers all unrestricted highly liquid investments purchased with original maturities of three months or less to be cash equivalents. At March 31, 2021, there were no cash equivalents.

Restricted cash consists of Tenant security deposits held in trust and reserves for replacements.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6. Estimates

   The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

7. Investments

   Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statements of financial position. Unrealized gains and losses are included in the statement of activities.

8. Concentrations of Credit Risk

   Financial instruments that potentially subject the Project to concentrations of credit risk consist principally of cash in banks, investment accounts, and tenant accounts receivable.

   The Project has funds in credit union accounts which are insured by the National Credit Union Association (NCUA) up to $250,000. On March 31, 2021, the Project's credit union account balances exceeded the NCUA insured balance by $153,914.

   The Project maintains its reserve funds in investment institutions. The investments that the Project holds consist of money market funds. The funds are insured by the Securities Investor Protection Corporation for the amount invested in the event of fraud, theft, or other such deceptive activity.

   Concentrations of credit risk with respect to tenant accounts receivable are limited because all tenants are required to pay their rent monthly on the first of the month. However, since all of the Project's tenants live and work in the Northern Nevada area, the Project's ability to collect tenant accounts receivable may be affected by economic fluctuations in that geographic area.

   The Project's primary asset is a 208-unit apartment project. The Project's operations are concentrated in the multifamily real estate market. In addition, the Project operates in a heavily regulated environment. The operations of the Project are subject to the administrative directives, rules and regulations of federal, state and local regulatory agencies, including, but not limited to, HUD. Such administrative directives, rules and regulations are subject to change by an act of congress or an administrative change mandated by HUD. Such changes may occur with little notice or inadequate funding to pay for the related cost, including the additional administrative burden, to comply with a change.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

9. Bad Debts

   Uncollectible accounts receivable related to tenant rents are charged directly against operations when they are determined to be uncollectible. Use of this method does not result in a material difference from the valuation method required by generally accepted accounting principles.

   Occasionally, the tenant's financial condition changes subsequent to the receipt of the HUD Subsidy payment. When that occurs, the tenant enters into a repayment contract with the Project for the overpayment. Payments are recorded as rent income when received and reported to HUD, who then reduces the subsidy payment for that tenant by the amount received. However, those payment are only collectible after the tenant's normal rent and as long as the tenant remains a tenant. For that reason, the collectability of those particular contract receivables is in question. To that end the entire balance related to the repayment agreements at March 31, 2021, of $8,187, have been reserved against and included in an allowance for doubtful accounts.

10. Impairment of Long-Loved Assets

    The Organization reviews long-lived assets, including property and equipment and intangible assets, for impairment whenever events or changes in business circumstances indicate that the carrying amount of an asset may not be fully recoverable. An impairment loss would be recognized when the estimated future cash flows from the use of the asset are less than the carrying amount of that asset. To date, there have been no such losses.

11. Advertising and Marketing

    Advertising and marketing costs are expensed as incurred. There was no advertising expense incurred for the year ended March 31, 2021.

12. Income Taxes

    The Project is a nonprofit corporation that is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. Accordingly, no liability for federal income taxes has been provided in the financial statements. It is the Project's tax position that it has not engaged in activities that would jeopardize its exempt status nor has it engaged in activities that would result in unrelated business income tax. The Project's Forms 990, *Return of Organization Exempt from Income Tax*, for the tax years ending 2017, 2018 and 2019 are subject to examination by the IRS, generally for three years after they were filed.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

13. Subsequent Events

In preparing these financial statements, the Project has evaluated events and transactions for potential recognition or disclosure through July 14, 2021, the date the financial statements were available to be issued. Subsequent events after that date have not been evaluated.

NOTE 2 – ALLOWABLE DISTRIBUTIONS

In accordance with HUD Handbook 4370.2 REV-1, CHG-1, *Financial Operations and Accounting Procedures for Insured Multifamily Projects,* page 2 – 12, distributions to owners are not permitted on non-profit projects. For the year ended March 31, 2021, there were no distributions made.

NOTE 3 – CASH, RESTRICTED DEPOSITS AND EQUIVALENTS

The balance in cash, cash equivalents, restricted deposits and restricted deposit equivalents consists of the following:

Operating Cash	$ 334,404
Restricted Deposits - Security Deposits	42,458
Restricted Deposits - Reserve for Replacement	42,489
Total Cash, Restricted Cash and Equivalents	$ 419,351

NOTE 4 – LIQUIDITY

At March 31, 2021, the Project has $347,465 cash and equivalents available to meet needs for general expenditures consisting of cash of $334,404 and $13,061 of accounts receivable. None of the financial assets are subject to donor or other contractual restrictions. Accordingly, all such funds are available to meet the cash needs of the project in the next 12 months. In addition, the Project may maintain funds in a reserve for replacements. These funds are used for the benefit of the tenants and/or Project. Such funds are not considered by the Project to have donor-restrictions.

The Project manages its liquidity by developing and adopting annual operating budgets that provide sufficient funds for general expenditures in meeting its liabilities and other obligations as they become due. Cash needs of the Project are expected to be met on a monthly basis from the rents of project units. In general, the Project maintains sufficient financial assets on hand to meet 30 days' worth of normal operating expenses.

NOTE 5 – FUNCTIONAL EXPENSES

The Project provides low-income housing to its tenants. The cost of providing program services and supporting activities has been summarized on a functional basis in the table below. Expenses directly attributable to a specific functional activity of the Project are reported as expenses of those functional activities. Allocations of expenses were made on a direct allocation basis.

FASSUB Line Items	Program Services Rental Operations	Supporting Activities Management and General	Total Expenses
Payroll and benefits	$ 291,522	$ 64,866	$ 356,388
Administrative	34,261	31,858	66,119

Depreciation	91,548		91,548
Totals	$ 990,725	$ 214,036	$ 1,204,761

NOTE 6 – RELATED PARTY TRANSACTIONS

Transactions involving related parties cannot be presumed to be carried out on an arm's-length basis. Except for routine transactions, it is generally not possible to determine whether a particular transaction would have taken place if the parties had not been related or, assuming it would have taken place, what the terms and manner of settlement would have been.

Effective November 1, 1987, management of the Project was provided by the Building and Construction Trades Council of Northern Nevada, a non-profit corporation which elects the Board of Directors of the Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments. The management fee is $47 per unit per month for a total paid of $117,312 during the year ended March 31, 2021.

During the 2008 and 2009 fiscal years, the owners placed the property up for sale. During those two years, $72,630 was paid by the Project for various costs associated with the sale. These expenditures are an entity expense not a project expense and, as such, constitute an unauthorized distribution to the Project Owner. Therefore, the Owner is required to reimburse the Project for these expenditures. The amount is recorded as due from related party in the statement of financial position. During the year ended March 31, 2021, no payments were made on this receivable, leaving a balance due of $63,730.

NOTE 7 – PENSION CONTRIBUTIONS

In connection with its collective bargaining agreement with the Communication Workers of America, AFL-CIO, the company participates with other companies in the communication industry in a defined benefit pension plan. The plan covers all of the company's employees who are members of the Communication Workers of America Union. The pension contribution expense for the year ended March 31, 2021, was $26,152.

NOTE 8 – HOUSING ASSISTANCE PAYMENTS

Pursuant to Section 8 of Title II of the United States Housing Act of 1973, as amended, rents are subsidized by governmental payments through a housing assistance contract between the United States Department of Housing and Urban Development (HUD) and the Organization. The Partnership receives subsidies for 208 apartments which are rented to qualified low and very low income families in an amount which equals the difference between the Contract Rent, as determined by HUD, and 30% of the tenant's family income. The contract expires October 31, 2023.

In addition, the HAP contract provides that the Corporation is entitled to Section 8 Subsidies in the amount of 80% of the Contract Rents for vacant apartments for a period not to exceed thirty days. Housing assistance payments received totaled $946,589 for the year ended March 31, 2021.

As a result of the economic impact of the COVID-19 global pandemic, the United Stated Department of Housing and Urban Development (HUD) provided additional funding through the COVID-19 Supplemental Payment (CSP) program. The Organization received an additional $27,480 in additional housing assistance through this program.

NOTE 9 – LEASE TRANSACTIONS

The Organization entered into a five year lease agreement, commencing October 1, 2018, for the use of a copy systems for $57 per month. The lease also provides for sales tax and per copy charges which vary according to usage in addition to the monthly fee. The lease expense amounted to $2,612 for the year ended March 31, 2021.

NOTE 9 – LEASE TRANSACTIONS (CONTINUED)

Future obligations over the terms of the operating lease are as follows:

Year Ending March 31,	
2021	$ 2,612
2022	2,612
2023	2,612
2024	2,612
2025 and Thereafter	-
	$ 10,448

NOTE 10 – CONTINGENT EVENTS

In December 2019, an outbreak of a novel strain of coronavirus (COVID-19) originated in Wuhan, China and has since spread to other countries, including the U.S. On March 11, 2020, the World Health Organization characterized COVID-19 as a pandemic. In addition, multiple jurisdictions in the U.S. have declared a state of emergency. It is anticipated that these impacts will continue for some time. There has been no immediate impact to the Project's operations. Future potential impacts may include disruptions or restrictions on our employees' ability to work or the tenants ability to pay the required monthly rent. Operating functions that may be changed include intake, recertifications and maintenance. Changes to the operating environment may increase operating costs. Additional impacts may include the ability of tenants to continue making rental payments as a result of job loss or other pandemic related issues. The existing HAP contract with HUD could potentially mitigate the tenant collection losses incurred. The future effects of these issues are unknown.

A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

To the Board of Directors
Northern Nevada Building & Construction
Trade Council Development Corporation

We have audited the basic financial statements of the Northern Nevada Building & Construction Trad Council Development Corporation for the year ended March 31, 2021, and have issued our report thereon date July 14, 2021. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated September 28, 2018, our responsibility as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management or your responsibilities.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Northern Nevada Building & Construction Trade Council Development Corporation are described in the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2020/2021 fiscal year. We noted no transactions entered into by the organization during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statement was management's determination that all accounts receivable are collectible at year end. We evaluated the key factors and assumptions used to develop the estimate of collectability in determining what is reasonable in relation to the financial statements taken as a whole.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. The following material misstatements detected as a result of audit procedures were corrected by management:

1. Record depreciation expense in the amount of $91,548.
2. Capitalize building improvements in the amount of $86,411.
3. Reversal of prior accounts payable of $30,343.

The total net income effect of all adjustments proposed and recorded by management was to increase net income by $35,339.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated July 14, 2021.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition of our retention.

As required by generally accepted auditing standards and the terms of our engagement, in planning and performing our audit, we considered the internal control solely to determine the auditing procedures to be employed for the purpose of enabling us to express our opinion on the

financial statements and not for the purpose of expressing an opinion on the effectiveness of the District's internal control over financial reporting. Therefore, we express no opinion or other form of assurance thereon.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. Our report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* dated July 14, 2021, noted no significant deficiencies or material weaknesses.

This information is intended solely for the use of management and the Organization's Board of Directors and is not intended to be and should not be used by anyone other than these specified parties.

Report on the Financial Statements

We have audited the accompanying financial statements of Northern Nevada Building & Construction Trade Council Development Corporation (a nonprofit organization), dba Carville Park Apartments, HUD Project No. 125-35077-NP, which comprise the statement of financial position as of March 31, 2020, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Other Matter

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedule of expenditures of federal awards, as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards,* is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated July 16, 2020, on our consideration of Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting and compliance.

Notes to Financial Statements
March 31, 2020

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Business Activity

   The Corporation was formed as a non-profit corporation under the laws of the State of Nevada on April 6, 1979. It was organized to construct, own, and operate a 208-unit rental apartment project in Reno, Nevada, knows as Carville Park Apartments.

   The Project is regulated by the U.S. Department of Housing and Urban Development (HUD) as to rent charges and operating methods. Lower rental charges to tenants are recovered by the Project through rent subsidies provided by HUD. The Section 8 program is a major HUD program.

2. Accounting Methods and Revenue Recognition

   The Project's primary revenue stream is rent charges for residential units under leases with durations of less than one year. The Project records revenue for such leases at gross potential rent as prescribed by HUD. The rental value of vacancies and other concessions are stated separately to present net rental income on the accrual basis. Subsidy revenue for low-income eligible tenants is provided under a Section 8 housing assistance payment contract. This contract requires tenants to contribute a portion of the contract rent based on formulas prescribed by the Department of Housing and Urban Development (HUD). The difference from the calculated subsidy and the contract rent is paid by the HUD. The current contract expires on October 31, 2023.

   Subsidy income is considered part of the lease and is not considered a contribution under ASC 958. This standard indicates that government payments to specifically identified participants are to be considered exchange transactions and potentially subject to ASC 606. The Project believes that both rental and subsidy income streams are exempted from compliance with ASC 606 due to their inclusion under current and future lease standards. Revenue streams subject to ASC 606 include: laundry, vending, pet and parking fees as well as damages. Such fees are ancillary to the lease process and are recognized as revenue at the point in time such fees are incurred.

3. Classification of Net Assets

   Net assets of the Project are classified based on the presence or absence of donor-imposed restrictions. Net assets are comprised of two groups as follows:

   Net Assets without Donor Restrictions – Amounts that are not subject to usage restrictions based on donor-imposed requirements. This class also includes assets previously restricted where restrictions have been men.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3. Classification of Net Assets (Continued)

Net assets with Donor Restrictions – Assets subject to usage limitations based on donor-imposed or grantor restrictions. These restrictions may be temporary or may be based on a particular use. Restrictions may be met by the passage of time or by actions of the Project. Certain restrictions may need to be maintained in perpetuity.

Earnings related to restricted net assets will be included in net assets without donor-restrictions unless otherwise specifically required to be included in donor-restricted net assets by the donor or by applicable state law.

The Project does not interpret the guidance in the standard to include amounts restricted by HUD as donor-restricted. The project believes that these amounts do not meet the spirit of the standard for such a classification or is there any industry standard indicating that others will treat these assets as donor-restricted.

All net assets of the Project at March 31, 2020 were considered to be net assets without donor restrictions.

4. Property and Equipment

Property and equipment are carried at cost or, if donated, at the approximate fair value at the date of donation. Fixed asset acquisitions in excess of $500 are capitalized and depreciation is provided using the straight-line method over the estimated useful lives of the buildings and related land improvements (15 – 40 years) and furnishings and equipment (5 – 7 years). Depreciation expense for the year ended March 31, 2020, was $120,927.

5. Cash and Cash Equivalents

For purposes of the Statement of Cash Flows, the Project considers all unrestricted highly liquid investments purchased with original maturities of three months or less to be cash equivalents. At March 31, 2020, there were no cash equivalents.

Restricted cash consists of Tenant security deposits held in trust and reserves for replacements.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

6. Estimates

   The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

7. Investments

   Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statements of financial position. Unrealized gains and losses are included in the statement of activities.

8. Concentrations of Credit Risk

   Financial instruments that potentially subject the Project to concentrations of credit risk consist principally of cash in banks, investment accounts, and tenant accounts receivable.

   The Project has funds in credit union accounts which are insured by the National Credit Union Association (NCUA) up to $250,000. On March 31, 2020, the Project's credit union account balances exceeded the NCUA insured balance by $6,378.

   The Project maintains its reserve funds in investment institutions. The investments that the Project holds consist of money market funds. The funds are insured by the Securities Investor Protection Corporation for the amount invested in the event of fraud, theft, or other such deceptive activity.

   Concentrations of credit risk with respect to tenant accounts receivable are limited because all tenants are required to pay their rent monthly on the first of the month. However, since all of the Project's tenants live and work in the Northern Nevada area, the Project's ability to collect tenant accounts receivable may be affected by economic fluctuations in that geographic area.

   The Project's primary asset is a 208-unit apartment project. The Project's operations are concentrated in the multifamily real estate market. In addition, the Project operates in a heavily regulated environment. The operations of the Project are subject to the administrative directives, rules and regulations of federal, state and local regulatory agencies, including, but not limited to, HUD. Such administrative directives, rules and regulations are subject to change by an act of congress or an administrative change mandated by HUD. Such changes may occur with little notice or inadequate funding to pay for the related cost, including the additional administrative burden, to comply with a change.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

9. Bad Debts

   Uncollectible accounts receivable are charged directly against operations when they are determined to be uncollectible. Use of this method does not result in a material difference from the valuation method required by generally accepted accounting principles.

10. Impairment of Long-Loved Assets

    The Organization reviews long-lived assets, including property and equipment and intangible assets, for impairment whenever events or changes in business circumstances indicate that the carrying amount of an asset may not be fully recoverable. An impairment loss would be recognized when the estimated future cash flows from the use of the asset are less than the carrying amount of that asset. To date, there have been no such losses.

11. Advertising and Marketing

    Advertising and marketing costs are expensed as incurred. Advertising expense totaled $2,554 for the year ended March 31, 2020.

12. Income Taxes

    The Project is a nonprofit corporation that is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. Accordingly, no liability for federal income taxes has been provided in the financial statements. It is the Project's tax position that it has not engaged in activities that would jeopardize its exempt status nor has it engaged in activities that would result in unrelated business income tax. The Project's Forms 990, *Return of Organization Exempt from Income Tax*, for the tax years ending 2017, 2018 and 2019 are subject to examination by the IRS, generally for three years after they were filed.

13. Subsequent Events

    In preparing these financial statements, the Project has evaluated events and transactions for potential recognition or disclosure through July 16, 2020, the date the financial statements were available to be issued. Subsequent events after that date have not been evaluated.

NOTE 2 – ALLOWABLE DISTRIBUTIONS

In accordance with HUD Handbook 4370.2 REV-1, CHG-1, *Financial Operations and Accounting Procedures for Insured Multifamily Projects,* page 2 – 12, distributions to owners are not permitted on non-profit projects. For the year ended March 31, 2020, there were no distributions made.

NOTE 3 – CASH, RESTRICTED DEPOSITS AND EQUIVALENTS

The balance in cash, cash equivalents, restricted deposits and restricted deposit equivalents consists of the following:

Operating Cash	$ 172,820
Restricted Deposits - Security Deposits	34,968
Restricted Deposits - Reserve for Replacement	26,694
Total Cash, Restricted Cash and Equivalents	$ 234,482

NOTE 4 – ADOPTION OF ACCOUNTING PRONOUNCEMENT

In November 2016 the Financial Accounting Standards Board (FASB) published Accounting Standards Update (ASU) No. 2016-18, which changes the presentation and disclosure of cash, cash equivalents and restricted cash or restricted equivalents (Cash) in the statement of cash flows. The standard requires that change in all Cash when reconciling the beginning and ending cash balances shown on the statement of cash flows. The standard does not change the definitions of restricted cash or restricted cash equivalents. Previous U.S. GAAP allowed changes in the restricted cash to be shown as investing activities.

In June 2018, FASB issued ASU 2018-08, to improve the scope and accounting guidance for contributions received and contributions made. The standard should be used to assist entities in 1) evaluating whether transactions should be accounted for as contributions or as other exchange guidance subject to other guidance. This standard establishes that Section 8 payments, although not a result of a reciprocal transaction, but they are to be considered as exchange transactions.

In May 2014, FASB issued ASU 2014-09, *Revenue from Contracts with Customers (ASC 606)* and all related amendments. ASC 606 supersedes most existing revenue recognition guidance. ASC 606 provides a principles-based framework for recognizing revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration the entity expects in exchange for the goods or services provided. It also requires enhanced disclosures to enable users of financial statement to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The Project adopted ASC 606 and all related amendments using the modified retrospective transition method. The Project concluded that the adoption of the new standard did not require an adjustment to the opening net asset balance.

NOTE 5 – LIQUIDITY

At March 31, 2020, the Project has $182,621 cash and equivalents available to meet needs for general expenditures consisting of cash of $172,820 and $9,801 of accounts receivable. None of the financial assets are subject to donor or other contractual restrictions. Accordingly, all such funds are available to meet the cash needs of the project in the next 12 months. In addition, the Project may maintain funds in a reserve for replacements. These funds are used for the benefit of the tenants and/or Project. Such funds are not considered by the Project to have donor-restrictions.

The Project manages its liquidity by developing and adopting annual operating budgets that provide sufficient funds for general expenditures in meeting its liabilities and other obligations as they become due. Cash needs of the Project are expected to be met on a monthly basis from the rents of project units. In general, the Project maintains sufficient financial assets on hand to meet 30 days' worth of normal operating expenses.

NOTE 6 – FUNCTIONAL EXPENSES

The Project provides low-income housing to its tenants. The cost of providing program services and supporting activities has been summarized on a functional basis in the table below. Expenses directly attributable to a specific functional activity of the Project are reported as expenses of those functional activities. Allocations of expenses were made on a direct allocation basis.

	Program Services	Supporting Activities	
FASSUB Line Items	Rental Operations	Management and General	Total Expenses

NOTE 7 – RELATED PARTY TRANSACTIONS

Transactions involving related parties cannot be presumed to be carried out on an arm's-length basis. Except for routine transactions, it is generally not possible to determine whether a particular transaction would have taken place if the parties had not been related or, assuming it would have taken place, what the terms and manner of settlement would have been.

Effective November 1, 1987, management of the Project was provided by the Building and Construction Trades Council of Northern Nevada, a non-profit corporation which elects the Board of Directors of the Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments. The management fee is $47 per unit per month for a total paid of $117,312 during the year ended March 31, 2020.

During the 2008 and 2009 fiscal years, the owners placed the property up for sale. During those two years, $72,630 was paid by the Project for various costs associated with the sale. These expenditures are an entity expense not a project expense and, as such, constitute an unauthorized distribution to the Project Owner. Therefore, the Owner is required to reimburse the Project for these expenditures. The amount is recorded as due from related party in the statement of financial position. During the year ended March 31, 2020, no payments were made on this receivable, leaving a balance due of $63,730.

NOTE 8 – PENSION CONTRIBUTIONS

In connection with its collective bargaining agreement with the Communication Workers of America, AFL-CIO, the company participates with other companies in the communication industry in a defined benefit pension plan. The plan covers all of the company's employees who are members of the Communication Workers of America Union. The pension contribution expense for the year ended March 31, 2020, was $36,945.

NOTE 9 – HOUSING ASSISTANCE PAYMENTS

Pursuant to Section 8 of Title II of the United States Housing Act of 1973, as amended, rents are subsidized by governmental payments through a housing assistance contract between the United States Department of Housing and Urban Development (HUD) and the Organization. The Partnership receives subsidies for 208 apartments which are rented to qualified low and very low income families in an amount which equals the difference between the Contract Rent, as determined by HUD, and 30% of the tenant's family income. The contract expires October 31, 2023.

NOTE 6 – HOUSING ASSISTANCE PAYMENTS (CONTINUED)

In addition, the HAP contract provides that the Corporation is entitled to Section 8 Subsidies in the amount of 80% of the Contract Rents for vacant apartments for a period not to exceed thirty days. Housing assistance payments received totaled $840,301 for the year ended March 31, 2020.

NOTE 10 – LEASE TRANSACTIONS

The Organization entered into a five year lease agreement, commencing October 1, 2018, for the use of a copy systems for $57 per month. The lease also provides for sales tax and per copy charges which vary according to usage in addition to the monthly fee. The lease expense amounted to $832 for the year ended March 31, 2020.

Future obligations over the terms of the operating lease are as follows:

Year Ending March 31,	
2020	$ 2,612
2021	2,612
2022	2,612
2023	2,612
2024 and Thereafter	2,612
	$ 13,060

NOTE 11 – SUBSEQUENT EVENTS

In December 2019, an outbreak of a novel strain of coronavirus (COVID-19) originated in Wuhan, China and has since spread to other countries, including the U.S. On March 11, 2020, the World Health Organization characterized COVID-19 as a pandemic. In addition, multiple jurisdictions in the U.S. have declared a state of emergency. It is anticipated that these impacts will continue for some time. There has been no immediate impact to the Project's operations. Future potential impacts may include disruptions or restrictions on our employees' ability to work or the tenants ability to pay the required monthly rent. Operating functions that may be changed include intake, recertifications and maintenance. Changes to the operating environment may increase operating costs. Additional impacts may include the ability of tenants to continue making rental payments as a result of job loss or other pandemic related issues. The existing HAP contract with HUD could potentially mitigate the tenant collection losses incurred. The future effects of these issues are unknown.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Northern Nevada Building & Construction Trade Council Development Corporation's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Governmental Auditing* Standards, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Management of Northern Nevada Building & Construction Trade Council Development Corporation is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

To the Board of Directors
Northern Nevada Building & Construction
Trade Council Development Corporation

We have audited the basic financial statements of the Northern Nevada Building & Construction Trad Council Development Corporation for the year ended March 31, 2020, and have issued our report thereon date July 16, 2020. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated September 28, 2018, our responsibility as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management or your responsibilities.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Northern Nevada Building & Construction Trade Council Development Corporation are described in the financial statements. During the 2019/2020 fiscal year the Organization adopted Accounting Standards Update No. 2016-18 with regard to the presentation of cash in the statement of cash flows; Accounting Standards Update 2018-08 regarding contributions; and Accounting Standards Update No 2014-09 regarding revenue recognition. We noted no transactions entered into by the organization during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statement was management's determination that all accounts receivable are collectible at year end. We evaluated the key factors and assumptions used to develop the estimate of collectability in determining what is reasonable in relation to the financial statements taken as a whole.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. The following material misstatements detected as a result of audit procedures were corrected by management:

1. Record depreciation expense in the amount of $120,927.
2. Capitalize balcony repairs as part of building improvements in the amount of $68,562.

The total net income effect of all adjustments proposed and recorded by management was to decrease net income by $47,215.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated July 16, 2020.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition of our retention.

As required by generally accepted auditing standards and the terms of our engagement, in planning and performing our audit, we considered the internal control solely to determine the auditing procedures to be employed for the purpose of enabling us to express our opinion on the financial statements and not for the purpose of expressing an opinion on the effectiveness of the

District's internal control over financial reporting. Therefore, we express no opinion or other form of assurance thereon.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. Our report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* dated July 16, 2020, noted no significant deficiencies or material weaknesses.

This information is intended solely for the use of management and the Organization's Board of Directors and is not intended to be and should not be used by anyone other than these specified parties.

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Business Activity

   The Corporation was formed as a non-profit corporation under the laws of the State of Nevada on April 6, 1979. It was organized to construct, own, and operate a 208-unit rental apartment project in Reno, Nevada, knows as Carville Park Apartments.

   The Project is regulated by the U.S. Department of Housing and Urban Development (HUD) as to rent charges and operating methods. Lower rental charges to tenants are recovered by the Project through rent subsidies provided by HUD. The Section 8 program is a major HUD program.

2. Accounting Methods and Revenue Recognition

   The accompanying financial statements have been prepared on the accrual basis of accounting and in accordance with accounting principles generally accepted in the United States of America (GAAP), whereby income is recognized when earned and costs and expenses are recognized when the obligations are incurred. Accordingly, all significant receivables, payables, and other liabilities are reflected.

   The tenant leases are for one year and are accounted for as operating leases with rental income reported as earned over the term of the lease. Under the Housing Assistance contract, the Organization may not increase rents charged to tenants without prior HUD approval.

3. Classification of Net Assets

   Net assets of the Project are classified based on the presence or absence of donor-imposed restrictions. Net assets are comprised of two groups as follows:

   Net Assets without Donor Restrictions – Amounts that are not subject to usage restrictions based on donor-imposed requirements. This class also includes assets previously restricted where restrictions have been men.

   Net assets with Donor Restrictions – Assets subject to usage limitations based on donor-imposed or grantor restrictions. These restrictions may be temporary or may be based on a particular use. Restrictions may be met by the passage of time or by actions of the Project. Certain restrictions may need to be maintained in perpetuity.

   Earnings related to restricted net assets will be included in net assets without donor-restrictions unless otherwise specifically required to be included in donor-restricted net assets by the donor or by applicable state law.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3. Classification of Net Assets (Continued)

   The Project does not interpret the guidance in the standard to include amounts restricted by HUD as donor-restricted. The project believes that these amounts do not meet the spirit of the standard for such a classification or is there any industry standard indicating that others will treat these assets as donor-restricted.

   All net assets of the Project at March 31, 2019 were considered to be net assets without donor restrictions.

4. Functional Allocation of Expenses

   Expenditures incurred in connection with project operations and expenditures made for corporate (mortgagor entity) purposes have been summarized on a functional basis in the Statement of Activities.

5. Property and Equipment

   Property and equipment are carried at cost or, if donated, at the approximate fair value at the date of donation. Fixed asset acquisitions in excess of $500 are capitalized and depreciation is provided using the straight-line method over the estimated useful lives of the buildings and related land improvements (15 – 40 years) and furnishings and equipment (5 – 7 years). Depreciation expense for the year ended March 31, 2019, was $117,127.

6. Cash and Cash Equivalents

   For purposes of the Statement of Cash Flows, the Project considers all unrestricted highly liquid investments purchased with original maturities of three months or less to be cash equivalents. At March 31, 2019, there were no cash equivalents.

7. Estimates

   The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

8. Investments

Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statements of financial position. Unrealized gains and losses are included in the statement of activities.

9. Concentrations of Credit Risk

Financial instruments that potentially subject the Project to concentrations of credit risk consist principally of cash in banks, investment accounts, and tenant accounts receivable.

The Project has funds in credit union accounts which are insured by the National Credit Union Association (NCUA) up to $250,000. On March 31, 2019, the Project's credit union account balances were within the NCUA limits.

The Project maintains its reserve funds in investment institutions. The investments that the Project holds consist of money market funds. The funds are insured by the Securities Investor Protection Corporation for the amount invested in the event of fraud, theft, or other such deceptive activity.

Concentrations of credit risk with respect to tenant accounts receivable are limited because all tenants are required to pay their rent monthly on the first of the month. However, since all of the Project's tenants live and work in the Northern Nevada area, the Project's ability to collect tenant accounts receivable may be affected by economic fluctuations in that geographic area.

The Project's primary asset is a 208-unit apartment project. The Project's operations are concentrated in the multifamily real estate market. In addition, the Project operates in a heavily regulated environment. The operations of the Project are subject to the administrative directives, rules and regulations of federal, state and local regulatory agencies, including, but not limited to, HUD. Such administrative directives, rules and regulations are subject to change by an act of congress or an administrative change mandated by HUD. Such changes may occur with little notice or inadequate funding to pay for the related cost, including the additional administrative burden, to comply with a change.

9. Bad Debts

Uncollectible accounts receivable are charged directly against operations when they are determined to be uncollectible. Use of this method does not result in a material difference from the valuation method required by generally accepted accounting principles.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

10. Impairment of Long-Loved Assets

The Organization reviews long-lived assets, including property and equipment and intangible assets, for impairment whenever events or changes in business circumstances indicate that the carrying amount of an asset may not be fully recoverable. An impairment loss would be recognized when the estimated future cash flows from the use of the asset are less than the carrying amount of that asset. To date, there have been no such losses.

11. Advertising and Marketing

Advertising and marketing costs are expensed as incurred. Advertising expense totaled $1,165 for the year ended March 31, 2019.

12. Income Taxes

The Project is a nonprofit corporation that is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. Accordingly, no liability for federal income taxes has been provided in the financial statements. It is the Project's tax position that it has not engaged in activities that would jeopardize its exempt status nor has it engaged in activities that would result in unrelated business income tax. The Project's Forms 990, *Return of Organization Exempt from Income Tax*, for the tax years ending 2016, 2017 and 2018 are subject to examination by the IRS, generally for three years after they were filed.

13. Subsequent Events

In preparing these financial statements, the Project has evaluated events and transactions for potential recognition or disclosure through August 9, 2019, the date the financial statements were available to be issued. Subsequent events after that date have not been evaluated.

NOTE 2 – ALLOWABLE DISTRIBUTIONS

In accordance with HUD Handbook 4370.2 REV-1, CHG-1, *Financial Operations and Accounting Procedures for Insured Multifamily Projects,* page 2 – 12, distributions to owners are not permitted on non-profit projects. For the year ended March 31, 2019, there were no distributions made.

NOTE 3 – ADOPTION OF ACCOUNTING PRONOUNCEMENT

In August 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-14, *Not-for-Profit Entities (Topic 958): Presentation of Financial Statements of Not-for-Profit Entities.* ASU 2016-14 requires significant changes to the financial reporting model of organizations who follow the not-for-profit reporting model. The changes include reducing the classes of net assets from three classes to two – net assets with donor restrictions and net assets without donor restrictions. The ASU will also require changes in the way certain information is aggregated and reported by the Project, including required disclosures about liquidity and availability of resources and increased disclosures on functional expenses. The new standard is effective for the Project's year ending March 31, 2019 and thereafter and must be applied on a retrospective basis. The Project adopted the ASU effective April 1, 2018. Adoption of the ASU did not result in any reclassifications or restatements to net assets or changes in net assets.

NOTE 4 – RELATED PARTY TRANSACTIONS

Transactions involving related parties cannot be presumed to be carried out on an arm's-length basis. Except for routine transactions, it is generally not possible to determine whether a particular transaction would have taken place if the parties had not been related or, assuming it would have taken place, what the terms and manner of settlement would have been.

Effective November 1, 1987, management of the Project was provided by the Building and Construction Trades Council of Northern Nevada, a non-profit corporation which elects the Board of Directors of the Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments. The management fee is $47 per unit per month for a total paid of $117,312 during the year ended March 31, 2019.

During the 2008 and 2009 fiscal years, the owners placed the property up for sale. During those two years, $72,630 was paid by the Project for various costs associated with the sale. These expenditures are an entity expense not a project expense and, as such, constitute an unauthorized distribution to the Project Owner. Therefore, the Owner is required to reimburse the Project for these expenditures. The amount is recorded as due from related party in the statement of financial position. During the year ended March 31, 2019, no payments were made on this receivable, leaving a balance due of $63,730.

NOTE 5 – PENSION CONTRIBUTIONS

In connection with its collective bargaining agreement with the Communication Workers of America, AFL-CIO, the company participates with other companies in the communication industry in a defined benefit pension plan. The plan covers all of the company's employees who are members of the Communication Workers of America Union. The pension contribution expense for the year ended March 31, 2019, was $36,945.

NOTE 6 – HOUSING ASSISTANCE PAYMENTS

Pursuant to Section 8 of Title II of the United States Housing Act of 1973, as amended, rents are subsidized by governmental payments through a housing assistance contract between the United States Department of Housing and Urban Development (HUD) and the Organization. The Partnership receives subsidies for 208 apartments which are rented to qualified low and very low income families in an amount which equals the difference between the Contract Rent, as determined by HUD, and 30% of the tenant's family income. The contract expires October 31, 2023.

In addition, the HAP contract provides that the Corporation is entitled to Section 8 Subsidies in the amount of 80% of the Contract Rents for vacant apartments for a period not to exceed thirty days. Housing assistance payments received totaled $840,301 for the year ended March 31, 2019.

NOTE 7 – LEASE TRANSACTIONS

The Organization entered into a five year lease agreement, commencing October 1, 2018, for the use of a copy systems for $57 per month. The lease also provides for sales tax and per copy charges which vary according to usage in addition to the monthly fee. The lease expense amounted to $832 for the year ended March 31, 2019.

Future obligations over the terms of the operating lease are as follows:

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control. Accordingly, we do not express an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

In planning and performing our audit of compliance, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. To the Board of Directors
Northern Nevada Building & Construction
Trade Council Development Corporation

We have audited the basic financial statements of the Northern Nevada Building & Construction Trad Council Development Corporation for the year ended March 31, 2019, and have issued our report thereon dated August 9, 2019. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated September 28, 2018, our responsibility as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management or your responsibilities.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Northern Nevada Building & Construction Trade Council Development Corporation are described in the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2018/2019 fiscal year. We noted no transactions entered into by the organization during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statement was management's determination that all accounts receivable are collectible at year end. We evaluated the key factors and assumptions used to develop the estimate of collectability in determining what is reasonable in relation to the financial statements taken as a whole.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. No material misstatements were detected as a result of audit procedures.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated August 15, 2018.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition of our retention.

As required by generally accepted auditing standards and the terms of our engagement, in planning and performing our audit, we considered the internal control solely to determine the auditing procedures to be employed for the purpose of enabling us to express our opinion on the financial statements and not for the purpose of expressing an opinion on the effectiveness of the District's internal control over financial reporting. Therefore, we express no opinion or other form of assurance thereon.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. Our report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* dated August 9, 2019, noted no significant deficiencies or material weaknesses.

This information is intended solely for the use of management and the Organization's Board of Directors and is not intended to be and should not be used by anyone other than these specified parties.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Notes to Financial Statements
March 31, 2018

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Business Activity

   The Corporation was formed as a non-profit corporation under the laws of the State of Nevada on April 6, 1979. It was organized to construct, own, and operate a 208-unit rental apartment project in Reno, Nevada, knows as Carville Park Apartments.

   The Project is regulated by the U.S. Department of Housing and Urban Development (HUD) as to rent charges and operating methods. Lower rental charges to tenants are recovered by the Project through rent subsidies provided by HUD. The Section 8 program is a major HUD program.

2. Accounting Methods and Revenue Recognition

   The accompanying financial statements have been prepared on the accrual basis of accounting and in accordance with accounting principles generally accepted in the United States of America (GAAP), whereby income is recognized when earned and costs and expenses are recognized when the obligations are incurred. Accordingly, all significant receivables, payables, and other liabilities are reflected.

   The tenant leases are for one year and are accounted for as operating leases with rental income reported as earned over the term of the lease. Under the Housing Assistance contract, the Organization may not increase rents charged to tenants without prior HUD approval.

3. Basis of Presentation

   The financial statement presentation follows the recommendations of the Financial Accounting Standards Board in its FASB ASC 958-210-45-1, *Financial Statements for Not-for-Profit Organizations.* Under FASB ASC 958-210-45-1, the Project is required to report information regarding its financial position and activities according to three classes of net assets: 1) unrestricted net assets, which represents the expendable resources that are available for operations at management's discretion; 2) temporarily restricted net assets, which represents resources restricted by donors as to purpose or by the passage of time, and 3) permanently restricted net assets, which represents resources whose use by the Project is limited by donor-imposed stipulations that neither expire by passage of time nor can be fulfilled or otherwise removed by actions of the Project. As of March 31, 2018, there are no temporarily or permanently restricted net assets.

   Revenues are reported as increased in unrestricted net assets unless their use is limited by donor-imposed restrictions. Expenses are reported as decreases in unrestricted net assets. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in unrestricted net assets unless their use is restricted by explicit donor stipulation or by law.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

4. Functional Allocation of Expenses

   Expenditures incurred in connection with project operations and expenditures made for corporate (mortgagor entity) purposes have been summarized on a functional basis in the Statement of Activities.

5. Property and Equipment

   Property and equipment are carried at cost or, if donated, at the approximate fair value at the date of donation. Fixed asset acquisitions in excess of $500 are capitalized and depreciation is provided using the straight-line method over the estimated useful lives of the buildings and related land improvements (15 – 40 years) and furnishings and equipment (5 – 7 years). Depreciation expense for the year ended March 31, 2018, was $116,533.

6. Cash and Cash Equivalents

   For purposes of the Statement of Cash Flows, the Project considers all unrestricted highly liquid investments purchased with original maturities of three months or less to be cash equivalents. At March 31, 2018, there were no cash equivalents.

7. Estimates

   The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

8. Investments

   Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statements of financial position. Unrealized gains and losses are included in the statement of activities.

9. Concentrations of Credit Risk

   Financial instruments that potentially subject the Project to concentrations of credit risk consist principally of cash in banks, investment accounts, and tenant accounts receivable.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

9. Concentrations of Credit Risk (Continued)

The Project has funds in credit union accounts which are insured by the National Credit Union Association (NCUA) up to $250,000. On March 31, 2018, the Project's credit union account balances were within the NCUA limits.

The Project maintains its reserve funds in investment institutions. The investments that the Project holds consist of money market funds. The funds are insured by the Securities Investor Protection Corporation for the amount invested in the event of fraud, theft, or other such deceptive activity.

Concentrations of credit risk with respect to tenant accounts receivable are limited because all tenants are required to pay their rent monthly on the first of the month. However, since all of the Project's tenants live and work in the Northern Nevada area, the Project's ability to collect tenant accounts receivable may be affected by economic fluctuations in that geographic area.

The Project's primary asset is a 208-unit apartment project. The Project's operations are concentrated in the multifamily real estate market. In addition, the Project operates in a heavily regulated environment. The operations of the Project are subject to the administrative directives, rules and regulations of federal, state and local regulatory agencies, including, but not limited to, HUD. Such administrative directives, rules and regulations are subject to change by an act of congress or an administrative change mandated by HUD. Such changes may occur with little notice or inadequate funding to pay for the related cost, including the additional administrative burden, to comply with a change.

10. Bad Debts

Uncollectible accounts receivable are charged directly against operations when they are determined to be uncollectible. Use of this method does not result in a material difference from the valuation method required by generally accepted accounting principles.

11. Advertising and Marketing

Advertising and marketing costs are expensed as incurred. Advertising expense totaled $1,116 for the year ended March 31, 2018.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

12. Income Taxes

The Project is a nonprofit corporation that is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code. Accordingly, no liability for federal income taxes has been provided in the financial statements. It is the Project's tax position that it has not engaged in activities that would jeopardize its exempt status nor has it engaged in activities that would result in unrelated business income tax. The Project's Forms 990, *Return of Organization Exempt from Income Tax*, for the tax years ending 2016, 20172016 and 2018 are subject to examination by the IRS, generally for three years after they were filed.

13. Subsequent Events

In preparing these financial statements, the Project has evaluated events and transactions for potential recognition or disclosure through August 15, 2018, the date the financial statements were available to be issued. Subsequent events after that date have not been evaluated.

NOTE 2 – ALLOWABLE DISTRIBUTIONS

In accordance with HUD Handbook 4370.2 REV-1, CHG-1, *Financial Operations and Accounting Procedures for Insured Multifamily Projects,* page 2 – 12, distributions to owners are not permitted on non-profit projects. For the year ended March 31, 2018, there were no distributions made.

NOTE 3 – RELATED PARTY TRANSACTIONS

Transactions involving related parties cannot be presumed to be carried out on an arm's-length basis. Except for routine transactions, it is generally not possible to determine whether a particular transaction would have taken place if the parties had not been related or, assuming it would have taken place, what the terms and manner of settlement would have been.

Effective November 1, 1987, management of the Project was provided by the Building and Construction Trades Council of Northern Nevada, a non-profit corporation which elects the Board of Directors of the Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments. The management fee is $47 per unit per month for a total paid of $107,536 during the year ended March 31, 2018, with $9,776 due and payable at March 31, 2018, bringing the total management fees expense to $117,312. The total amount unpaid at year end is included in accrued liabilities in the statement of financial position.

NOTE 3 – RELATED PARTY TRANSACTIONS (CONTINUED)

During the 2008 and 2009 fiscal years, the owners placed the property up for sale. During those two years, $72,630 was paid by the Project for various costs associated with the sale. These expenditures are an entity expense not a project expense and, as such, constitute an unauthorized distribution to the Project Owner. Therefore, the Owner is required to reimburse the Project for these expenditures. The amount is recorded as due from related party in the statement of financial position. During the year ended March 31, 2018, no payments were made on this receivable, leaving a balance due of $63,730.

NOTE 4 – HOUSING ASSISTANCE PAYMENTS

The Project has entered into a Housing Assistance Payments (HAP) contract, pursuant to Section 8 of the United States Housing Act of 1973.. The Partnership receives subsidies for 208 apartments which are rented to qualified low and very low income families in an amount which equals the difference between the Contract Rent, as determined by HUD, and 30% of the tenant's family income.

In addition, the HAP contract provides that the Corporation is entitled to Section 8 Subsidies in the amount of 80% of the Contract Rents for vacant apartments for a period not to exceed thirty days.

NOTE 5 – PENSION CONTRIBUTIONS

In connection with its collective bargaining agreement with the Communication Workers of America, AFL-CIO, the company participates with other companies in the communication industry in a defined benefit pension plan. The plan covers all of the company's employees who are members of the Communication Workers of America Union. The pension contribution expense for the year ended March 31, 2018, was $35,952.

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to Financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Northern Nevada Building & Construction Trade Council Development Corporation (a nonprofit organization), dba Carville Park Apartment, HUD Project No. 125-35077-NP, which comprise the statement of financial position as of March 31, 2018, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated August 22, 2018.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control. Accordingly, we do not express an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

We have audited Northern Nevada Building & Construction Trade Council Development Corporation, dba Carville Park Apartments' compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of Northern Nevada Building & Construction Trade Council Development Corporation's major federal programs for the year ended March 31, 2018. Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Northern Nevada Building & Construction Trade Council Development Corporation's major federal programs based on our audit of the types of compliance requirements referred to above. Report on Internal Control over Compliance

Management of Northern Nevada Building & Construction Trade Council Development Corporation is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Northern Nevada Building & Construction Trade Council Development Corporation's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

To the Board of Directors
Northern Nevada Building & Construction
Trade Council Development Corporation

We have audited the basic financial statements of the Northern Nevada Building & Construction Trad Council Development Corporation for the year ended March 31, 2018, and have issued our report thereon dated August 15, 2018. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated July 1, 2016, our responsibility as described by professional standards, is to express opinions about whether the financial statements prepared by management with your oversight are fairly presented, in all material respects in conformity with U.S. generally accepted accounting principles. Our audit of the financial statements does not relieve you or management or your responsibilities.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Northern Nevada Building & Construction Trade Council Development Corporation are described in the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the 2017/2018 fiscal year. We noted no transactions entered into by the organization during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimate affecting the financial statement was management's determination that all accounts receivable are collectible at year end. We evaluated the key factors and assumptions used to develop the estimate of collectability in determining what is reasonable in relation to the financial statements taken as a whole.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. No material misstatements were detected as a result of audit procedures.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated August 15, 2018.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition of our retention.

As required by generally accepted auditing standards and the terms of our engagement, in planning and performing our audit, we considered the internal control solely to determine the auditing procedures to be employed for the purpose of enabling us to express our opinion on the financial statements and not for the purpose of expressing an opinion on the effectiveness of the District's internal control over financial reporting. Therefore, we express no opinion or other form of assurance thereon.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. Our report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* dated August 15, 2018, noted no significant deficiencies or material weaknesses.

This information is intended solely for the use of management and the Organization's Board of Directors and is not intended to be and should not be used by anyone other than these specified parties.

EXHIBIT 1-01

WEST WENDOVER
FIRE STATION EMERGENCY OPERATIONS CENTER

Description:

The West Wendover Fire Station Emergency Operations Center (WWFS-EOC) Project includes the construction of a facility of approximately 11,300 sqft in size. The facility includes just over 2,100 sqft of office and general operations area along with 9,400 sqft of apparatus bays and support area.

The facility is designed to accommodate future expansion as needs develop including expansions to office areas, training rooms, storage and living quarter components. The city anticipates this new facility will eventually be staffed on a full-time 24-hour basis.

The WWFS-EOC is an important long-term public safety facility for the City of West Wendover and has been listed in the city's annual Capital Improvement Plan for many years. Currently the project is listed as No. 2, behind the Downtown Development Infrastructure Phase1 Project which is nearing completion. The project was originally planned in 2007 to be part of the construction of the City Hall Government Complex. However, due to cost, the facility was delayed. Now more than a decade later, this important project is finally moving forward. The need for the new Fire Station is based on having an adequately sized facility that is capable of expansion and being located on local government owned and controlled property. The existing Fire Station was constructed in the mid 1980's by Elko County prior to the city's incorporation and is of inadequate size and design. Further complicating the existing facility is that it is located on approximately 1.5 acres of leased property. Though the current facility with its three (3) short apparatus bays was adequate for the needs of the community in the mid 1980's under Elko County, today the community is 4 times the size and the current facility is significantly undersized, outdated under NFPA standards and as noted, remains under an untenable lease situation. The property owner at this time desires to invest in growth and expansion of their current business facilities and operations and is no longer open to a renewal of the lease going forward. Thus, the city at this time is on a month-to-month lease while the new WWFS-EOC is being completed.

The proposed project is a new facility designed by a reputable fire station design/build team (CORE/TSK) which have designed and constructed numerous fire service facilities in Nevada as well as surrounding states. The design of the new facility uses current NFPA, building code and industry standards and in addition is designed to accommodate not just the current fire service operations but as well, provides for the opportunity to expand the facility as operational needs grow. The new facility will be located on city owned and controlled property, thus eliminating the current lease situation with the existing facility. Though the lease situation was acceptable in the past, with today's business opportunities and growth, the owner of the property has scheduled to expand an adjacent business (Rainbow Hotel and Casino). Thus, in addition to meeting the needs of the city's fire service for the future with the new facility design and its location on city owned property, with the relocation of our fire service operations, there will be the ability over the next several years for additional business investment and job growth in the community to occur related to the expansion of the adjacent commercial operations.

Construction of a new facility will be located west and adjacent the West Wendover City Hall on N. Gene L. Jones Way, West Wendover, Nevada.

The completed project will include the following contained within an approximate 1.50 acre site:

- Building Bay Area (9,300 sqft)

    - (5) 85ft equipment apparatus bays
    - (2) decontamination rooms
    - Shower room and laundry
    - Bay storage totaling approximately 9,300 sqft. Incl. EOC equipment area.

- Building Office Area (2,100 sqft)
    - Reception area
    - Staff offices
    - Training room/Day room/EOC area
    - Kitchen
    - IT/Com room
    - Storage
    - Public restroom, etc.

  * The Building Office Area portion will be expandable in the future as need arises.

- Site:
    - Front and rear building equipment aprons
    - Street improvements and facility access
    - Parking areas
    - Landscaping, lighting and signage

The facility will meet all local and state code requirements including current NFPA regulations and requirements related to its use as an Emergency Operations Center.

CITY OF WEST WENDOVER
FIVE YEAR CAPITAL IMPROVEMENT PROJECTS PLAN
FISCAL 2023-2024 thru 2027-2028
By Priority

√ Denotes Project process, engineering design and/or construction underway.

2023-2024

1. **√ CITY DOWNTOWN INFRASTRUCTURE PHASE 1 – COST ($7,084,199).**
With the City proceeding with planned development initiatives on the City Center/Downtown property Phase 1 infrastructure needs to be completed. This infrastructure will include an extension to Pueblo Boulevard to the north of approximately 900 feet in a complete street design as well as related utility infrastructure which will service the Phase 1 area that will contain approximately 60 acres of land for commercial development.

Progress Report: Project under construction, completion scheduled for September 2023. Funding by USDA loan, Nevada CDBG Grant, U.S. EDA Grant, NGM Grant and General Fund ARP Allocation. FY2023-2024

2. **√ FIRE STATION FACILITY – COST ($14,773,822).**
The current Fire Station is located on private land, which the City has leased on a yearly basis. The existing facility is limited in size and capability given its initial size and related construction and the property owner has chosen not to provide future lease of the facility. The community has more than quadrupled in size since the original facility was built and now the long-term needs of the community are not being met. The City has a site selected and partially developed to accommodate the new fire station facility, located adjacent to the City Hall on N. Gene L. Jones Way. The project is currently completing design and scheduled for construction late fall of 2023 under a Design/Build Contract with CORE Construction.

Progress Report: Design nearing completion, construction scheduled for late fall 2023 with expected one year construction. This project to be funded through USDA loan (obligated) and General Fund ARP Allocation and Other Grants/Loans FY 2023-2024

3. **√ INTEROPERABILITY, POLICE, POLICE DISPATCH AND EMERGENCY SERVICES TOWER/MOBILE DATA – COST *($426,000)***
The City of West Wendover continues its progress with regard to upgrades to the City's interoperability for Public Safety which includes adding an additional radio tower at the Public Works Facility to enhance coverage of the eastern end of the community along with providing increased signal penetration of commercial buildings for radio traffic. This project also includes upgrades to the Police Dispatch System for capability to integrate, use and transmit GIS, law enforcement and emergency services information from Dispatch to officers and personnel on the street via wireless networking and related equipment in vehicles.

Progress Report: Tower site location chosen, FAA permit in process for location. GIS base mapping complete, dispatch system has base capabilities for networking. Funding to be provided by General Fund and DOJ Technology Grant currently in place. Construction completion spring 2024. FY 2023-2024

Basis of GMP

BASIS OF GMP

City of West Wendover New Fire Station No. 13

PWP #EL-2023-434 | August 7, 2023

The Basis of GMP is a written explanation clarifying the scope, assumptions and exclusions used in establishing the Guaranteed Maximum Price (GMP) for the City of West Wendover New Fire Station No. 13 Project in West Wendover Nevada dated August 7, 2023. The GMP is presented in a ten group, systems format best utilized for analyzing and comparing project costs during design and preconstruction. This GMP is based on CORE's incorporation of the scope shown on the West Wendover New FS #13 60% DD documents dated May 3, 2023, and the scope clarifications below.

Assumptions, Clarifications, & Exclusions

SCHEDULE

This GMP is based upon performance of the work per the enclosed Preliminary Construction Schedule, which is an integral part of this GMP Package. This project has been divided into multiple phases, which are identified within the preliminary construction schedule and account for the overall construction duration and timeframe anticipated.

Schedule Clarifications:

- Microsoft Project Professional for Office 365 will be used as the schedule management program.
- We anticipate normal working hours 6:00 AM to 4:00 PM, Monday through Thursday, with some Friday and/or Saturday work as required to meet the schedule. Daily start and finish times are subject to change with changing weather conditions and daily sunrise/sunset time.
- All concrete pours are assumed to be early morning pours. If the authorities having jurisdiction do not allow early morning pours, the concrete pour sequence would be extended which would affect the critical path of the schedule.
- Activities within the Overall project schedule and general sequence of construction will be re-evaluated later when the GMP is executed.
- If the GMP does not start as scheduled on October 16th, 2023, CORE reserves the right to adjust General Conditions costs.
- Permitting timelines are allowances based on average timeframes of similar projects. Any delay caused by the permitting process is cause for a re-evaluation of the schedule and General Conditions.

Weather:

The following table represents a mutual understanding of the number of reasonable days of adverse weather per month where no weather dependent construction activities may occur due to unworkable field conditions. CORE has assumed the risk to make up for lost days per month in accordance with this table.

CORE shall be granted an extension of time for delays resulting from additional lost working days per calendar month beyond what is illustrated in the table in the GMP Proposal. The lost days illustrated in this schedule are per calendar month and shall not accrue from month to month.

(Eastern Nevada – Elko County Region)

Month	Number of Reasonably Anticipated Days of Adverse Weather Per Month	Average Precipitation
January	1	0.25

February	0	0.17
March	1	0.33
April	1	0.36
May	1	0.58
June	0	0.28
July	0	0.22
August	0	0.16
September	1	0.50
October	0	0.34
November	0	0.22
December	0	0.19

CORE considers soil condition that are unsuitable for heavy equipment operation to be adverse weather days. Additionally, driving conditions deemed unsafe for travel shall be deemed adverse weather days. CORE reserves the right to work Fridays and/or Saturdays in order to meet schedule.

Cost Clarifications

This GMP is based on the higher between 2023 Elko County Prevailing Wage Rates and 2023 Davis Bacon Wage Rates and includes Nevada sales tax. The value provided in the GMP includes all direct and indirect construction costs and includes typical project "soft costs". Soft costs included in this GMP are all design fees, loose/miscellaneous fire station equipment, and utility connection fees.

MATERIALS ECONOMIC IMPACTS

The parties acknowledge that some of the materials and products to be used and installed in the construction of this project may become unavailable, delayed in shipment and/or subject to price increases due to circumstances beyond the control of the Contractor. If a specified product is unavailable or shipment is delayed, Contractor shall provide written notice and shall be afforded additional time and substitute products may be considered. If there is an increase in price of materials, equipment, or products between the date of this contract and the time when the job is ready for the installation of the affected material, the amount of this contract shall be increased to reflect the additional cost to obtain the materials, provided that the Contractor gives the Owner written notice and documentation of the increased costs.

CONTINGENCIES

- **Design-Builder Contingency –** A 2.5% Design-Builder Contingency is included in this proposal and is intended to be used at CORE's discretion to cover costs that have not been completely identified or designed as trade specific scope on the GMP setting documents may require further clarification or coordination. These costs include, but not limited to, scope gap, coordination issues between trades, and missed scope during the bidding process. The Design-Builder Contingency is not intended to account for additional scope requests by the design / owner during construction.
- **Owner Contingency –** A 2.5% Owner Contingency is included in this proposal and is intended to be used at the City of West Wendover's discretion to cover costs for unforeseen or excluded items that are to be included as an amendment to the original contract.

ALLOWANCES

We have included the Allowances listed below in this GMP. These Allowances are considered to be an allotted sum of money included for a particular system or scope of work for which sufficient detail is not available to determine a definitive cost. A reasonable estimate for an assumed scope and quality is included as a placeholder. The Owner receives the savings for any amount under the allocation and is at risk for any amount over the allocation.

- **Allowance #1 – Fiber Line Relocation** – This Allowance is intended to cover costs associated with relocating the existing fiber line as to not be impacted by other improvements. Included is trenching, conduit bedding, backfill, conduit, and utility fees and coordination.
- **Allowance #2 – Fire Station Alerting System** – This Allowance is intended to cover costs associated with horns, strobes, controllers, pathways, and miscellaneous accessories associated with the Fire Station Alerting System.

ALTERNATES

Alternates are scopes of work which are NOT INCLUDED as part of the base contract work. They are carried as bid alternates so that if there is money available at the time of the GMP, they can be added to the project at the discretion of the owner.

- **Alternate #1 – Cross Street Visitor Parking** – This Alternate includes earthwork, asphalt, signage, striping, and concrete included with the proposed ADA/visitor parking lot as shown in the design documents.

SOFT COSTS

Soft Costs are scopes of work that are indirectly related to construction but are a necessary part of a project. The following soft costs are accounted for and included in this GMP. This does not represent an all-inclusive listing of all soft costs that may be required, but rather is CORE's understanding of the Soft Costs required to be included in the GMP.

- **A/E Design & Preconstruction Fees** – This scope of work includes architectural, engineering, and preconstruction costs to produce a construction set of documents, as well as provide preconstruction support through the Design Phase of the project.
- **Permits and Fees** – This is intended to cover costs associated with building permit fees for the project, and utility connection, coordination, and design fees for City of West Wendover Water. City of West Wendover electrical, communications, and gas connections are not included in this allowance. Inspections and Certificate of Occupancy costs are not included in this allowance.
- **FF&E Allowance** – This allowance is intended to cover costs associated with furniture, fixtures, and equipment not included elsewhere. The value is based on a list of items required by the City of West Wendover and a 5% additional FF&E allowance. The list of items is as follows:
    - (1) Smart Board, 65" min.
    - (3) Office Desks
    - (4) Tables, 8' x 18", folding
    - (20) office chairs, rolling.
    - Kitchen/Conference Table with seating for (8) with chairs.
    - Dayroom Furniture allowance of $15,000.

HOURLY RATES

The following agreed to hourly rates will be used to determine and define "Wages paid for Labor" as defined in Exhibit C of the Owner-CMAR Construction Agreement. The Actual Costs for each of the agreed to rates includes all normal and customary payroll paid by the Contractor plus all fringe benefits, taxes and insurances.

	Standard Rate	Overtime Rate

Director of Operations	190	-
Sr. Project Manager	165	-
Project Manager	125	-
MPE/BIM Manager	125	-
Contract Administrator	92	-

Assumptions & Exclusions

GENERAL ASSUMPTIONS

- This GMP is considered lump sum, not line itemed. Scope values are provided for transparency and as a contract schedule of values. Any line-item cost variances will be carried across the duration of the entire project and the net savings (if any) will be split with the Owner per the terms of the contract at final completion. Costs for any individual line items are not guaranteed within this GMP, but rather the bottom-line cost of the GMP. Any cost savings from any individual line items will be offset against possible overruns of any other line items throughout the duration of the project.
- Building permits are to be procured by the Owner and in hand prior to CORE Construction mobilizing on site and Contract Time commencing. CORE shall be granted an extension of time for delays resulting from not having an approved grading / building permit in place on the anticipated start date.
- CORE Construction assumes that the soils / geotechnical report prepared by Summit Engineering is reflective of the soils to be disturbed under this project. Any adverse soil conditions including but not limited to contaminated soils, different shrink/swell factors, etc. shall be cause for a time extension and adjustment of the GMP.
- CORE will coordinate the work with the Owner's contractors and agencies, for example Wells Rural Electric, Centracom, City of West Wendover Water, City of West Wendover Sewer, etc., with their respective scopes as it pertains to this project. The Owner will provide direction related to any conflict. The project schedule has been developed assuming these contractors/agencies will be able to meet all required scheduled installation and/or utility turn-on dates and these dates will be communicated through the Owner. Any costs due to changes made by the permitting agencies after submission of the estimate are subject to change.
- Normal shrinkage cracking of all cementitious material, such as slabs, concrete walls, CMU walls, etc. is expected and shall not be cause for removal or replacement of structurally sound slabs.

- Underground utilities shown on plans are assumed to depict accurate locations of utilities. Design has been based on As-Built documents provided by the city. Discrepancies arising due to inaccurate As-Builts are not included in this GMP proposal.

SPECIFIC EXCLUSIONS

VERIFY THAT FINAL EQUIPMENT LOCATIONS MEET MANUFACTURER'S RECOMMENDATIONS REGARDING SERVICE CLEARANCE AND PROPER AIRFLOW CLEARANCE AROUND EQUIPMENT.
9. INDOOR AIR QUALITY MEASURES: PROTECT INSIDE OF (INSTALLED AND DELIVERED) DUCTWORK AND HVAC UNITS FROM EXPOSURE TO DUST, DIRT, PAINT AND MOISTURE. REPLACE INSULATION THAT HAS BECOME WET AT ANY TIME DURING CONSTRUCTION, DRYING THE INSULATION IS NOT ACCEPTABLE. SEAL ANY TEARS OR JOINTS OF INTERNAL FIBERGLASS INSULATION. REMOVE DEBRIS FROM CEILING/RETURN AIR PLENUM INCLUDING DUST. AN INDEPENDENT, PROFESSIONAL DUCT CLEANING COMPANY SHALL VACUUM CLEAN ANY DUCTWORK CONNECTED TO HVAC UNITS THAT WERE OPERATED DURING THE CONSTRUCTION PERIOD AFTER NEW FILTERS ARE INSTALLED AND PRIOR TO TURNING SYSTEM OVER TO THE OWNER. THE INTERNAL SURFACES AND ASSOCIATED COILS OF ANY HVAC UNITS THAT WERE OPERATED SHALL ALSO BE CLEANED.
10. INSTALL DUCTWORK AND PIPING PARALLEL TO BUILDING COLUMN LINES UNLESS OTHERWISE SHOWN OR NOTED.

FIRE ALARM GENERAL NOTES

1. FIRE ALARM SYSTEM DESIGN: FIRE ALARM SYSTEM DESIGN AS SHOWN IS CONCEPTUAL. LOCATION AND QUANTITY OF LIFE SAFETY EQUIPMENT AND FIELD DEVICES DEPICTED ON DRAWINGS ARE RECOMMENDATIONS TO CONTRACTOR FOR BIDDING PURPOSES ONLY. FIRE ALARM CONTRACTOR IS RESPONSIBLE FOR PROVIDING THE FINAL DESIGN IN ACCORDANCE WITH APPLICABLE CODES AND LOCAL REQUIREMENTS. EXACT ROUTING OF CONDUIT TO SUIT CONDITIONS. ALL CHANGES SHALL BE CLEARLY INDICATED ON THE RECORD DRAWINGS. REFER TO THE PROJECT SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
2. PERMIT: FIRE ALARM CONTRACTOR IS RESPONSIBLE FOR OBTAINING A SEPARATE FIRE ALARM PERMIT AND PROVIDING A DETAILED SET OF SHOP DRAWINGS FOR APPROVAL BY ENGINEER AND LOCAL FIRE MARSHAL PRIOR TO START OF SYSTEM INSTALLATION AS REQUIRED BY THE MUNICIPALITY. SHOP DRAWINGS FOR THE FIRE ALARM SYSTEM(S) SHALL INCLUDE NOT LESS THAN THE MINIMUM REQUIRED DOCUMENTATION PER LOCAL FIRE MARSHAL AND NFPA 72.
3. SUBMITTALS: PROVIDE THE FOLLOWING DOCUMENTS FOR REVIEW AND APPROVAL:
   A. FLOOR PLAN LAYOUT INDICATING FINAL DEVICE LOCATIONS, INCLUDING CANDELA RATINGS FOR ALARM NOTIFICATION APPLIANCES, AND USE OF ALL ROOMS.
   B. BATTERY CAPACITY CALCULATIONS INDICATING REQUIRED AND SPARE CAPACITY.
   C. NOTIFICATION APPLIANCE CIRCUIT CALCULATIONS AND VOLTAGE DROP CALCULATIONS (FOR THE SYSTEM TO BE INSTALLED).
   D. EQUIPMENT CUT SHEETS WITH CATALOG NUMBERS AND DESCRIPTIONS CLEARLY HIGHLIGHTED TO SPECIFICALLY INDICATE WHICH PRODUCTS ARE PROPOSED FOR USE.
   E. RISER DIAGRAM.
   F. WRITTEN NARRATIVE PROVIDING INTENT AND SYSTEM DESCRIPTION.
   G. SEQUENCE OF OPERATION IN EITHER AN INPUT/OUTPUT MATRIX OR NARRATIVE FORM.
4. COORDINATION: COORDINATE INSTALLATION W/ OTHER TRADES. REFER TO THE ARCHITECTURAL PLANS FOR DIMENSIONS, ROOM FINISHES, FIRE WALLS, DOOR HARDWARE SCHEDULES AND LIKE ITEMS. REFER TO THE STRUCTURAL DRAWINGS FOR STRUCTURAL MEMBERS. REFER TO OTHER TRADES PLANS TO UNDERSTAND THE EXTENT OF THEIR WORK AS REQUIRED. REPORT ANY DISCREPANCIES TO THE ENGINEER FOR CLARIFICATION.
5. REGULATIONS: FIRE ALARM SYSTEMS SHALL BE INSTALLED IN ACCORDANCE WITH LOCAL FIRE MARSHAL REQUIREMENTS, MANUFACTURER'S WRITTEN INSTRUCTIONS, RECOGNIZED INDUSTRY PRACTICES, AND THE LATEST ADOPTED OF ALL APPLICABLE CODES AND REGULATIONS SUCH AS NFPA 72, NFPA 70, NFPA 101, AND ADA. FURNISH AND INSTALL ALL FIRE ALARM EQUIPMENT, RACEWAY SYSTEM, CONDUCTORS, DEVICES, AND ALL OTHER ACCESSORIES AS REQUIRED TO PROVIDE A COMPLETE AND FULLY FUNCTIONAL FIRE ALARM SYSTEM. 2. STRUCTURAL PRIMER NOTE:

SHOP COAT PRIMER IS INTENDED TO PROTECT THE STEEL FRAMING FOR A SHORT PERIOD OF TIME. STORAGE IN EXTREME COLD TEMPERATURES OR WINTER SNOW CONDITIONS, INCLUDING TRANSPORTATION ON SALTED OR CHEMICALLY TREATED ROADS WILL ADVERSELY AFFECT THE DURABILITY AND LONGEVITY OF THE PRIMER. THE COAT OF SHOP PRIMER DOES NOT PROVIDE THE UNIFORMITY OF APPEARANCE, OR THE DURABILITY AND CORROSION RESISTANCE OF A FIELD APPLIED FINISH COAT OF PAINT OVER A SHOP PRIMER. MINOR ABRASIONS TO THE SHOP COAT PRIMER CAUSED BY HANDLING, LOADING, SHIPPING, UNLOADING AND ERECTION ARE UNAVOIDABLE AND ARE NOT THE RESPONSIBILITY OF THE METAL BUILDING MANUFACTURER. METAL BUILDING MANUFACTURER IS NOT RESPONSIBLE FOR THE DETERIORATION OF THE PRIMER OR CORROSION THAT MAY RESULT FROM ATMOSPHERIC AND ENVIRONMENTAL CONDITIONS NOR THE COMPATIBILITY OF THE PRIMER TO ANY FIELD APPLIED COATING.

3. BUILDING ERECTION NOTES:

THE GENERAL CONTRACTOR AND/OR ERECTOR IS RESPONSIBLE TO SAFELY AND PROPERLY ERECT THE METAL BUILDING SYSTEM IN CONFORMANCE WITH THESE DRAWINGS, OSHA REQUIREMENTS, AND EITHER MBMA OR CSA S16 STANDARDS PERTAINING TO PROPER ERECTION. TEMPORARY SUPPORTS SUCH AS GUYS, BRACES, FALSEWORK, CRIBBING OR OTHER ELEMENTS FOR ERECTION ARE TO BE DETERMINED, FURNISHED AND INSTALLED BY THE ERECTOR. THESE SUPPORTS MUST SECURE THE STEEL FRAMING, OR PARTLY ASSEMBLED STEEL FRAMING, AGAINST LOADS COMPARABLE IN INTENSITY TO THOSE FOR WHICH THE STRUCTURE WAS DESIGNED IN ADDITION TO LOADS RESULTING FROM THE ERECTION OPERATION. SECONDARY WALL AND ROOF FRAMING (PURLINS, GIRTS AND/OR JOIST) ARE NOT DESIGNED TO FUNCTION AS A WORKING PLATFORM OR TO PROVIDE AS AN ANCHORAGE POINT FOR A FALL ARREST /SAFETY TIE OFF.

4. SPECIAL INSPECTION:

SPECIAL INSPECTIONS AND TESTING THAT MAY BE REQUIRED BY GOVERNMENTAL OR OTHER AUTHORITY DURING CONSTRUCTION AND/OR STEEL FABRICATION (COLLECTIVELY, "INSPECTIONS") ARE NOT THE RESPONSIBILITY OF THE PEMB MANUFACTURER, AND TO THE EXTENT REQUIRED IT SHALL BE THE RESPONSIBILITY OF THE OWNER AND/OR THE OWNER'S REPRESENTITIVE. IN THE EVENT INSPECTIONS ARE REQUIRED, THE OWNER AND/OR THE OWNER'S REPRESENTITIVE SHALL EMPLOY A THIRD PARTY QUALITY ASSURANCE TESTING AGENCY APPROVED BY THE RELEVANT AUTHORITY. IF SUCH REQUIREMENTS ARE NOT SPECIFICALLY INCLUDED IN THE PEMB MANUFACTURER'S SALES DOCUMENTS, NO INSPECTIONS BY THE PEMB MANUFACTURER OR AT THE PEMB MANUFACTURER'S FACILITY SHALL BE MADE. THE PEMB MANUFACTURER'S FACILITIES ARE ACCREDITED BY IAS AC472.

5. A325 & A490 BOLT TIGHTENING REQUIREMENTS:

IT IS THE RESPONSIBILITY OF THE ERECTOR TO ENSURE PROPER BOLT TIGHTNESS IN ACCORDANCE WITH APPLICABLE REGULATIONS. FOR PROJECTS IN THE UNITED STATES, SEE THE RCSC SPECIFICATION FOR STRUCTURAL JOINTS USING A325 OR A490 BOLTS OR FOR PROJECTS IN CANADA, SEE THE CAN/CSA S16 LIMIT STATES DESIGN OF STEEL STRUCTURES FOR MORE INFORMATION.

THE FOLLOWING CRITERIA MAY BE USED TO DETERMINE THE BOLT TIGHTNESS (I.E., "SNUG-TIGHT" OR "FULLY-PRETENSIONED"), UNLESS REQUIRED OTHERWISE BY LOCAL JURISDICTION OR CONTRACT REQUIREMENTS:

A) ALL A490 BOLTS SHALL BE "FULLY-PRETENSIONED".
B) ALL A325 BOLTS IN PRIMARY FRAMING (RIGID FRAMES AND BRACING) MAY BE "SNUG-TIGHT", EXCEPT AS FOLLOWS: "FULLY-PRETENSION" A325 BOLTS IF:
   a) BUILDING SUPPORTS A CRANE SYSTEM WITH A CAPACITY GREATER THAN 5 TONS.
   b) BUILDING SUPPORTS MACHINERY THAT CREATES VIBRATION, IMPACT, OR STRESS-REVERSALS ON THE CONNECTIONS. THE ENGINEER-OF-RECORD FOR THE PROJECT SHOULD BE CONSULTED TO EVALUATE FOR THIS CONDITION.
   c) THE PROJECT SITE IS LOCATED IN A HIGH SEISMIC AREA. FOR IBC-BASED CODES, "HIGH SEISMIC AREA" IS DEFINED AS "SEISMIC DESIGN CATEGORY" OF 'D', 'E', OR 'F'. SEE THE "BUILDING LOADS" SECTION ON THIS PAGE FOR THE DEFINED SEISMIC DESIGN CATEGORY FOR THIS PROJECT.
   d) ANY CONNECTION DESIGNATED IN THESE DRAWINGS AS "A325-SC". "SLIP-CRITICAL (SC)" CONNECTIONS MUST BE FREE OF PAINT, OIL, OR OTHER MATERIALS THAT REDUCE FRICTION AT CONTACT SURFACES. GALVANIZED OR LIGHTLY-RUSTED SURFACES ARE ACCEPTABLE.
C) IN CANADA, ALL A325 AND A490 BOLTS SHALL BE "FULLY-PRETENSIONED", EXCEPT FOR SECONDARY MEMBERS (PURLINS, GIRTS, OPENING FRAMING, ETC.) AND FLANGE BRACES.

SECONDARY MEMBERS (PURLINS, GIRTS, OPENING FRAMING, ETC.) AND FLANGE BRACE CONNECTIONS MAY ALWAYS BE "SNUG-TIGHT", UNLESS INDICATED OTHERWISE IN THESE DRAWINGS.

6. GENERAL DESIGN NOTES:

1) ALL STRUCTURAL STEEL SECTIONS AND WELDED PLATE MEMBERS ARE DESIGNED IN ACCORDANCE WITH ANSI/AISC 360 "SPECIFICATIONS FOR STRUCTURAL STEEL BUILDINGS" OR THE CAN/CSA S16 "LIMIT STATES DESIGN OF STEEL STRUCTURES", AS REQUIRED BY THE SPECIFIED BUILDING CODE.
2) ALL WELDING OF STRUCTURAL STEEL IS BASED ON EITHER AWS D1.1 "STRUCTURAL WELDING CODE - STEEL" OR CAN/CSA W59 "WELDED STEEL CONSTRUCTION (METAL ARC WELDING)", AS REQUIRED BY THE SPECIFIED BUILDING CODE.
3) ALL COLD FORMED MEMBERS ARE DESIGNED IN ACCORDANCE WITH ANSI/AISI S100 OR CAN/CSA S136 "SPECIFICATIONS FOR THE DESIGN OF COLD FORMED STEEL STRUCTURAL MEMBERS", AS REQUIRED BY THE SPECIFIED BUILDING CODE.
4) ALL WELDING OF COLD FORMED STEEL IS BASED ON AWS D1.3 "STRUCTURAL WELDING CODE - SHEET STEEL" OR CAN/CSA W59 "WELDED STEEL CONSTRUCTION (METAL ARC WELDING)", AS REQUIRED BY THE SPECIFIED BUILDING CODE.
5) ALL NUCOR BUILDING GROUP FACILITIES ARE IAS AC-472 ACCREDITED FOR DESIGN AND FABRICATION OF METAL BUILDING SYSTEMS. FOR PROJECTS IN CANADA, DESIGN AND FABRICATION ARE DONE ONLY IN FACILITIES THAT ARE ALSO CAN/CSA A660 AND W47.1 CERTIFIED.
6) IF JOISTS ARE INCLUDED WITH THIS PROJECT, THEY ARE SUPPLIED AS A PART OF THE SYSTEMS ENGINEERED METAL BUILDING AND ARE FABRICATED IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 1926.758 OF THE OSHA SAFETY STANDARDS FOR STEEL ERECTION, DATED JANUARY 18, 2001.
7) COLUMN BASE PLATES ARE DESIGNED NOT TO EXCEED THE ALLOWABLE BEARING STRESS OF CONCRETE THAT HAS A MINIMUM COMPRESSIVE STRENGTH OF 3000 P.S.I. AT 28 DAYS.

This set contains only the materials designed and furnished by Nucor Building Systems, a division of Nucor Corporation. SHEET: C1 of 2

THE BUILDING CODE REQUIRES CONSIDERATION OF SNOW SURCHARGES FOR ANY LOWER ROOF OF A STRUCTURE LOCATED WITHIN 20 ft. OF A HIGHER STRUCTURE. INFORMATION PROVIDED TO THE METAL BUILDING MANUFACTURER DOES NOT INDICATE THE PRESENCE OF A SHADOWING STRUCTURE WITHIN THIS 20 ft. ENVELOPE, THEREFORE SNOW SURCHARGES HAVE NOT BEEN CONSIDERED IN THE DESIGN.	BCL9
ACCESSORIES (DOORS, WINDOWS, ETC.) NOT PROVIDED BY THE METAL BUILDING MANUFACTURER MUST BE DESIGNED AS "COMPONENTS AND CLADDING" IN ACCORDANCE WITH THE SPECIFIC WIND PROVISIONS OF THE REFERENCED BUILDING CODE DISPLAYED ON THE COVER PAGE OF THIS DRAWING PACKET.	MO1
FRAMED OPENINGS HAVE BEEN DESIGNED TO SUPPORT WIND LOAD NORMAL TO THE WALL BASED ON THE STANDARD BUILDING CODE CRITERIA. FRAMED OPENINGS HAVE NOT BEEN DESIGNED FOR ANY ADDITIONAL MOMENT OR CATENARY FORCES FROM THE DOOR. ANY CHANGE TO THE INFORMATION SHOWN HERE WILL REQUIRE AN ENGINEERING INVESTIGATION AND POSSIBLE BUILDING REINFORCEMENT.	MO2

THE NEW BUILDING IS IN PROXIMITY TO, AND MAY CAUSE CHANGES TO THE CODE-PRESCRIBED SNOW LOADING CONDITIONS FOR THE EXISTING ADJACENT/ADJOINING BUILDING(S). IT IS THE RESPONSIBILITY OF OTHERS (NOT THE METAL BUILDING MANUFACTURER) TO INVESTIGATE ALL SNOW LOADING CONDITIONS FOR THE ADJACENT/ADJOINING BUILDING(S), AND PERFORM ANY REQUIRED ANALYSIS.	EB1
THE EXISTING BUILDING AND THE NEW BUILDING BY THE METAL BUILDING MANUFACTURER ARE STRUCTURALLY INDEPENDENT. THE SEISMIC STORY DRIFT OF THE NEW BUILDING CALCULATED IN ACCORDANCE WITH THE APPLICABLE BUILDING CODE IS 3.00 INCHES. THE METAL BUILDING MANUFACTURER CANNOT DETERMINE THE STORY DRIFT OF THE EXISTING BUILDING. THEREFORE, IT IS THE RESPONSIBILITY OF OTHERS (NOT THE METAL BUILDING MANUFACTURER) TO ENSURE THAT ADEQUATE SEPARATION EXISTS BETWEEN THE NEW AND EXISTING BUILDING.	EB6
THE SPECIFIED HVCF IN THE CONTRACT IS NOT TO EXCEED THE 300 LBS QUOTED AND DESIGNED FOR. IF IT DOES, A REVIEW AND POSSIBLE REDESIGN WILL BE NECESSARY.	SPECIAL NOTE–1

THE EXISTING BUILDING AND THE NEW BUILDING BY THE METAL BUILDING MANUFACTURER ARE STRUCTURALLY INDEPENDENT. THE SEISMIC STORY DRIFT OF THE NEW BUILDING CALCULATED IN ACCORDANCE WITH THE APPLICABLE BUILDING CODE IS 3.00 INCHES. THE METAL BUILDING MANUFACTURER CANNOT DETERMINE THE STORY DRIFT OF THE EXISTING BUILDING. THEREFORE, IT IS THE RESPONSIBILITY OF OTHERS (NOT THE METAL BUILDING MANUFACTURER) TO ENSURE THAT ADEQUATE SEPARATION EXISTS BETWEEN THE NEW AND EXISTING BUILDING.

GENERAL NOTES

1. THE SPECIFIED ANCHOR ROD DIAMETER ASSUMES F1554 GRADE 55 UNLESS NOTED OTHERWISE. ANCHOR ROD MATERIAL OF EQUAL DIAMETER MEETING OR EXCEEDING THE STRENGTH REQUIREMENTS SET FORTH ON THESE DRAWINGS MAY BE UTILIZED AT THE DISCRETION OF THE FOUNDATION DESIGN ENGINEER. ANCHOR ROD EMBEDMENT LENGTH SHALL BE DETERMINED BY THE FOUNDATION DESIGN ENGINEER.
2. THE METAL BUILDING MFR. IS NOT RESPONSIBLE FOR PROJECT FOUNDATION DESIGN. THE FOUNDATION DESIGN IS THE RESPONSIBILITY OF A REGISTERED PROFESSIONAL ENGINEER, FAMILIAR WITH LOCAL SITE CONDITIONS.
3. ALL ANCHOR RODS, FLAT WASHERS FOR ANCHOR RODS, EXPANSION BOLTS, AS WELL AS ALL CONCRETE/MASONRY EMBED PLATES ARE NOT BY THE METAL BUILDING MFR.
4. THIS DRAWING IS NOT TO SCALE.
5. FINISHED FLOOR ELEVATION = 100'-0" UNLESS NOTED OTHERWISE.
6. "SINGLE" CEE COLUMNS SHALL BE ORIENTED WITH THE "TOES" TOWARD THE LOW EAVE UNLESS NOTED OTHERWISE.
7. THE ANCHOR BOLT LOCATIONS PROVIDED BY THE METAL BUILDING MANUFACTURER SATISFY ANY PERTINENT REQUIREMENTS FOR THE DESIGN OF THE MATERIALS SUPPLIED BY THE METAL BUILDING MANUFACTURER. PLEASE NOTE THAT THESE REQUIREMENTS MAY NOT SATISFY ALL ANCHOR BOLT CONCRETE EDGE DISTANCE REQUIREMENTS DEPENDING ON THE DETAILS OF THE FOUNDATION DESIGN. BECAUSE FOUNDATION DESIGN IS NOT WITHIN THE SCOPE OF WORK OF THE METAL BUILDING MANUFACTURER, IT IS THE RESPONSIBILITY OF THE QUALIFIED PROFESSIONAL DESIGNING THE FOUNDATION TO VERIFY THAT SUFFICIENT CONCRETE EDGE DISTANCE IS PROVIDED FOR THE ANCHOR BOLTS IN THE DETAILS THEREOF.
8. THE ANCHOR BOLT SETTINGS SHOWN ON THESE DRAWINGS NOT ONLY INDICATE WHERE THE ANCHOR BOLTS ARE TO BE PLACED, BUT ALSO THE FOOTPRINT OF THE METAL BUILDING. IT IS ESSENTIAL THAT THESE BOLT PATTERNS BE FOLLOWED. IN THE EVENT THAT THESE SETTINGS DIFFER FROM THE ARCHITECTURAL FOUNDATION PLANS, THE METAL BUILDING MANUFACTURER MUST BE CONTACTED IMMEDIATELY, PREFERABLY BEFORE CONCRETE IS PLACED.

SHEET: D2 of 20

TYPICAL FIELD WELD REQUIREMENTS ERECTOR NOTE:

(UNLESS NOTED OTHERWISE ON DRAWINGS)

ALL FIELD WELDING **MUST BE PERFORMED BY AWS/CWB CERTIFIED WELDERS WHO ARE QUALIFIED** FOR THE WELDING PROCESSES AND POSITIONS INDICATED.

ALL WORK MUST BE **COMPLETED AND INSPECTED IN ACCORDANCE WITH THE APPLICABLE AWS/CWB SPECIFICATIONS.**

WELD ELECTRODES USED FOR THE SMAW (OR STICK) WELD PROCESS **MUST BE 70 KSI/483 MPa MATERIAL AND LOW HYDROGEN CONTENT.**

GALVANIZED STEEL FIELD WELDING RECOMMENDATIONS

PREPARATION OF WELD AREA

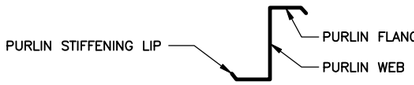
AWS D–19.0, WELDING ZINC COATED STEEL, CALLS FOR WELDS TO BE MADE ON STEEL THAT IS FREE OF ZINC IN THE AREA TO BE WELDED. FOR GALVANIZED STRUCTURAL COMPONENTS, THE ZINC COATING SHOULD BE REMOVED AT LEAST ONE TO FOUR INCHES (2.5–10 cm) FROM EITHER SIDE OF THE INTENDED WELD ZONE AND ON BOTH SIDES OF THE WORKPIECE. GRINDING BACK THE ZINC COATING IS THE PREFERRED AND MOST COMMON METHOD; BURNING THE ZINC AWAY OR PUSHING BACK THE MOLTEN ZINC FROM THE WELD AREA ARE ALSO EFFECTIVE.

TOUCH–UP OF WELD AREA

WELDING ON GALVANIZED SURFACES DESTROYS THE ZINC COATING ON AND AROUND THE WELD AREA. RESTORATION OF THE AREA WILL BE PERFORMED IN ACCORDANCE WITH ASTM A 780, STANDARD PRACTICE FOR REPAIR OF DAMAGED AND UNCOATED AREAS OF HOT–DIP GALVANIZED COATINGS, WHICH SPECIFIES THE USE OF PAINTS CONTAINING ZINC DUST, ZINC–BASED SOLDERS OR SPRAYED ZINC. ALL TOUCHUP AND REPAIR METHODS ARE CAPABLE OF BUILDING A PROTECTIVE LAYER TO THE THICKNESS REQUIRED BY ASTM A 780.

SAFETY & HEALTH

WHEN WELDING DIRECTLY ON GALVANIZED STEEL IS UNAVOIDABLE, OSHA PERMISSIBLE EXPOSURE LIMITS (PELS) MAY BE EXCEEDED AND EVERY PRECAUTION, INCLUDING HIGH–VELOCITY CIRCULATING FANS WITH FILTERS, AIR RESPIRATORS AND FUME–EXTRACTION SYSTEMS SUGGESTED BY AWS, SHOULD BE EMPLOYED. FUMES FROM WELDING GALVANIZED STEEL CAN CONTAIN ZINC, IRON, AND LEAD. FUME COMPOSITION TYPICALLY DEPENDS ON THE COMPOSITION OF THE MATERIALS USED, AS WELL AS THE HEAT APPLIED BY THE PARTICULAR WELDING PROCESS. IN ANY EVENT, GOOD VENTILATION MINIMIZES THE AMOUNT OF EXPOSURE TO FUMES.



PRIOR TO WELDING ON ANY METAL, CONSULT ANSI/ASC Z–49.1, SAFETY IN WELDING, CUTTING AND ALLIED PROCESSES, WHICH CONTAINS INFORMATION ON THE PROTECTION OF PERSONNEL AND THE GENERAL AREA, VENTILATION AND FIRE PREVENTION.

This set of plans and/or specifications is the property of Nucor Building Systems, a division of Nucor Corporation. The drawings and the designs incorporated therein, as an instrument of service, are the property of Nucor Building Systems and are not to be used in any way without the prior written consent of Nucor Building Systems. Only those drawings that have been prepared by a registered professional engineer employed by Nucor Building Systems and bear the engineer's seal and signature of record are to be considered as such.

SHEET: D4 of 20

SUGGESTED INITIAL PROCEDURES FOR INSTALLER:

1) CHECK ALL APPLICABLE FEDERAL, STAE AND LOCAL CODES TO VERIFY COMPLIANCE WITH THE CODE.

2) BE CERTAIN THAT SITE CONDITIONS ARE SUCH THAT SAFE WORKING PRACTICES ARE STRICTLY OBSERVED.

3) REVIEW ALL INSTALLATION DRAWINGS AND ASSOCIATED PROJECT DOCUMENTS.

4) CONSULT WITH THE GENERAL CONTRACTOR, DESIGN ENGINEER, ARCHITECT AND/OR OWNER TO CONFIRM THOSE RECOMMENDED.

5) COMPLY WITH ALL SAFETY REGULATIONS.

IT IS THE RESPONSIBILITY OF THE DESIGNER / CONTRACTOR / INSTALLER TO ENSURE THAT THE DETAILS AND INSTALLATION PROCEDURES ARE ADAPTED TO MEET PARTICULAR BUILDING REQUIREMENTS. THE METAL BUILDING / PANEL SUPPLIER SHALL NOT BE HELD LIABLE FOR ANY AND ALL CLAIMS ARISING FROM LACK OF PROPER INSTALLATION. THE DESIGNER / INSTALLER MUST BE AWARE OF AND ALLOW FOR EXPANSION AND CONTRACTION OF WALL PANELS WHEN DESIGNING AND/OR INSTALLING WALL PANELS.

SOME FIELD CUTTING IS PART OF NORMAL ERECTION WORK. WORKMANSHIP SHALL CONFORM TO THE HIGHEST INDUSTRY STANDARDS. A CERTAIN AMOUNT OF WAVINESS CALLED "OIL CANNING" MAY EXIST IN THE PANEL. MINOR WAVINESS IS NOT SUFFICIENT CAUSE FOR REJECTION AND DOES NOT AFFECT THE STRUCTURAL INTEGRITY OF THE PANEL. MINIMIZING OR ELIMINATION THIS EFFECT CAN BE ACCOMPLISHED BY USING SIMPLE INDUSTRY STANDARD PROCEDURES DURING SURFACE PREPARATION.

NOTES FOR HANDLING PANELS AND COMPONENTS:

INSULATED PANELS ARE CAREFULLY INSPECTED AND BUNDLED PRIOR TO LOADING FOR SHIPMENT. IT IS THE RESPONSIBILITY OF THE TRANSPORTATION COMPANY TO DELIVER THESE COMPONENTS UNDAMAGED. IT IS THE CONSIGNEE'S RESPONSIBILITY TO INSPECT THE SHIPMENT FOR DAMAGE AND SHORTAGES WHEN IT IS RECEIVED.

WHEN A SHIPMENT IS RECEIVED, CHECK EACH ITEM AGAINST THE BILL OF LADING FOR QUANTITY, LENGTH, DAMAGE, ETC. IF A SHORTAGE OR DAMAGE IS FOUND, MAKE SURE A NOTATION OF IT IS MADE ON THE BILL OF LADING AND SIGNED BY THE DRIVER. THE MANUFACTURE CANNOT BE RESPONSIBLE FOR SHORTAGES OR DAMAGED MATERIALS UNLESS THEY ARE NOTED ON THE BILL OF LADING.

IN THE CASE OF PACKAGED COMPONENTS (SUCH AS CLIPS, FASTENERS, AND SEALANTS, ECT.), THE QUANTITIES ARE MARKED ON THEIR CONTAINER AND SHOULD BE CHECKED AGAINST THE BILL OF MATERIALS.

IT IS THE CUSTOMER'S RESPONSIBILITY TO MAKE ANY DAMAGE CLAIM. IMMEDIATELY NOTIFY THE DESIGNATED CUSTOMER SERVICE COORDINATOR OF ANY SHORTAGES OR DAMAGED MATERIALS. THIS WILL HELP TO MINIMIZE ANY ERECTION DELAYS THAT MAY RESULT FROM THE SHORTAGE OR DAMAGED MATERIALS.

UPON ARRIVAL OF PANELS, FORKLIFTS OR HOISTING EQUIPMENT WILL BE REQUIRED TO UNLOAD AND POSITION THE PANEL BUNDLES AND ACCESSORY CRATES FOR JOBSITE STORAGE AND INSTALLATION.

EXTREME CARE SHOULD BE TAKEN TO AVOID BUMPING THE PANELS WHILE LIFTING AND MANEUVERING. IN ALL CASES PANELS SHOULD NOT DEFLECT SIGNIFICANTLY IN THE LIFTING PROCESS.

IN HANDLING PANELS INDIVIDUALLY, ALL PERSONNEL MUST WEAR THE PROPER CLOTHING, PROTECTIVE EYE WEAR, AND GLOVES.

TO HELP PREVENT DAMAGES TO THE SURFACES AND EDGES:
- ALWAYS LIFT THE PANELS WHEN REMOVING THEM FROM BUNDLES, NEVER DRAG THEM.
- NEVER LIFT THE PANEL FROM THE FLAT POSITION FROM THE HOOK OF THE VERTICAL SEAM.
- DO NOT CARRY PANELS IN THE FLAT POSITION.

UNLOADING:

PANELS ARE SPIRAL WRAPPED WITH STRETCH-FILM AND SHIPPED FLAT. PANEL BUNDLES ARE REINFORCED AT SPECIFIED LIFTING POINTS TO PREVENT DAMAGE WHEN LIFTING. SEE FIGURE'S 1 AND 2 IN THIS SECTION TO DETERMINE WHERE THE LIFTING POINTS ARE FOR THE PANEL BUNDLES.

UNLOADERS MUST TAKE CARE THAT FORKLIFT FORKS ARE LOCATED AT THE PARTICLE BOARD ON THE PANEL BUNDLES BEFORE LIFTING.

EXTREME CARE SHOULD BE TAKEN TO AVOID BUMPING OR DROPPING THE PANELS WHEN LIFTING AND MANEUVERING.

WHEN UNLOADING BUNDLES OF 36'-0" OR LONGER IN LENGTH, TWO OR MORE LIFTING POINTS MAY BE REQUIRED. OVER ENGAGEMENT OF FORKS WILL CAUSE DAMAGE TO THE MATERIALS LOCATED ON THE OPPOSITE SIDE OF THE BUNDLE BEING LIFTED.

WHEN AN OVERHEAD CRANE IS USED, REINFORCED NYLON SLINGS OR STRAPS SHOULD BE USED (NO CHAINS OR CABLES SHOULD COME IN CONTACT WITH THE PANELS), ALONG WITH SUITABLE STIFF INSERTS LOCATED AT TOP AND BOTTOM OF THE BUNDLES AT THE SLING POSITIONS TO PROTECT THE PANELS FROM DAMAGE. ALSO, PLACE FOAM BLOCKS ON THE SIDES OF BUNDLES AT ALL SLING LOCATIONS.

NOTES:

REINFORCED LIFTING POINTS ARE CLEARLY MARKED ON THE PANEL BUNDLE (SEE FIGURES 1 & 2)

LONG LENGTH PANELS HAVE TWO OR MORE LIFTING POINTS (SEE FIGURE 2).

USE EXTREME CARE TO AVOID BUMPING OR DROPPING THE PANELS WHILE LIFTING AND MANEUVERING.

HOIST THE PANELS TO THE ROOF WITH THE AID OF NYLON SLINGS AND A SPREADER BAR TO PREVENT ANY CHANCE OF BENDING OR BUCKLING THE PANELS.

UNLOADING WITH A FORKLIFT:

- OVER ENGAGEMENT OF FORKS WILL CAUSE DAMAGE TO THE MATERIALS LOCATED ON THE OPPOSITE SIDE OF THE BUNDLE BEING LIFTED
- PANELS SHOULD NOT DEFLECT SIGNIFICANTLY IN THE LIFTING PROCESS.
- ENSURE THE FORKS STRADDLE THE DESIGNATED LIFT POINT.
- LIFT BUNDLES ONE AT A TIME WITH THE FORKLIFT

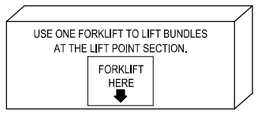

FIGURE 1
STANDARD LENGTH BUNDLES

- BE CAREFUL WHEN UNLOADING OR MOVING LONG LENGTH BUNDLES
- DO NOT POSITION YOUR LIFT AT THE CENTER OF THE BUNDLE, THIS MAY CAUSE PANEL DAMAGE.
- EACH FORKLIFT SHOULD STRADDLE ONE LIFT POINT.

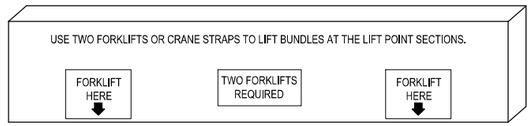

FIGURE 2
LONG LENGTH BUNDLES

UNLOADING WITH AN OVERHEAD CRANE:

- USE NYLON REINFORCED SLINGS OR STRAPS LOCATED AT A MINIMUM OF TWO POINTS ALONG THE LENGTH OF THE BUNDLE FOR CRANE LIFTING OF THE INDIVIDUAL BUNDLES.
- CHAINS OR CABLES SHOULD NOT COME IN CONTACT WITH THE PANELS.
- SUITABLY STIFF INSERTS SHOULD BE LOCATED AT TOP AND BOTTOM OF THE BUNDLES AT THE SLING POSITIONS TO PROTECT THE EDGES OF THE UPPER AND LOWER PANELS.
- PLACE FOAM BLOCKS ON THE SIDES OF BUNDLES AT ALL SLING LOCATIONS.
- WHEN BUNDLES ARE LONGER THAN 15'-0" IT IS SUGGESTED THAT A PROPERLY DESIGNED AND FABRICATED LIFTING BEAM IS USED.

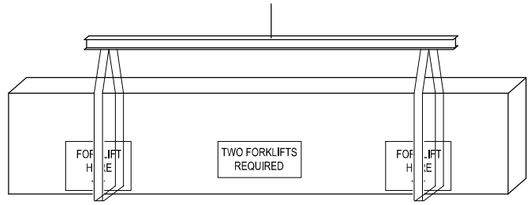

FIGURE 3
BUNDLES UNDER 4,000 LBS AND LESS THAN 44'-0"

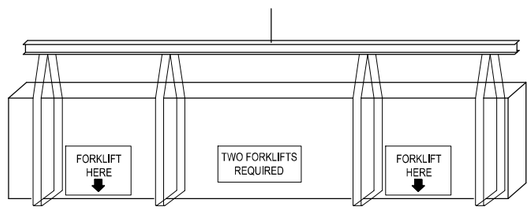

FIGURE 4
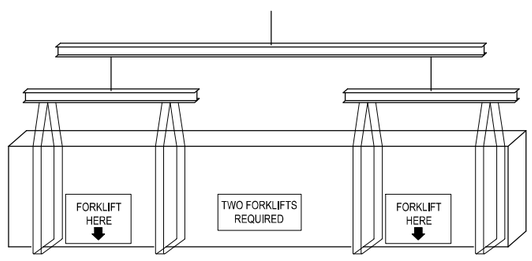
BUNDLES OVER 4,000 LBS AND LESS THAN 44'-0"



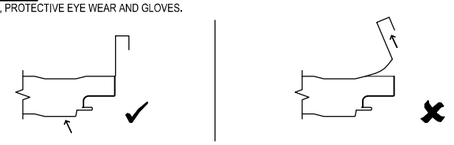


FIGURE 4
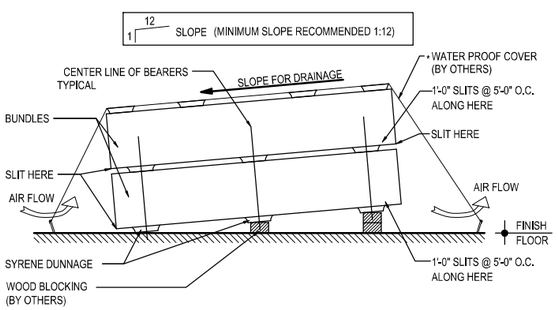
BUNDLES OVER 4,000 LBS AND MORE THAN 44'-0"

MANUALLY UNLOADING:
- ON SMALL PROJECTS UNLOADING OF THE PANELS MAY BE CARRIED OUT BY HAND.
- NOTE: SPECIAL CARE SHOULD BE TAKEN WHEN HANDLING. ALWAYS LIFT THE PANELS WHEN REMOVING FROM A BUNDLE, NEVER DRAG THEM.
- WARNING: TO PREVENT JOINT DAMAGE, NEVER LIFT THE PANEL FROM THE FLAT POSITION WITH THE HOOK OF THE VERTICAL SEAM. LIFT FROM THE BOTTOM SKIN.
- IT IS IMPORTANT THAT WHENEVER A PANEL IS HANDLED, PICKED-UP, MOVED OR CARRIED IT SHOULD BE TURNED ON EDGE FIRST. DO NOT CARRY PANEL WHILE FLAT.
- IMPORTANT NOTE: ALL PERSONNEL DOING THESE PROCEDURES MUST WEAR AT ALL TIMES THE PROPER CLOTHING, PROTECTIVE EYE WEAR AND GLOVES.



THE METAL BUILDING/PANEL SUPPLIER DOES NOT TAKE ANY RESPONSIBILITY FOR DAMAGE CAUSED FROM MISHANDLING OF PANELS. DAMAGED PANELS SHALL BE REPLACED OR CORRECTED TO APPROVAL OF THE ARCHITECT AND ANY COST INCURRED SHALL BE BORNE BY THE PARTIES RESPONSIBLE FOR THE DAMAGE.

JOBSITE STORAGE:

UPON ACCEPTANCE OF THE SHIPMENT, THE CUSTOMER IS RESPONSIBLE FOR PROPER HANDLING, STORAGE, AND SECURITY OF THE RECEIVED MATERIALS. THE MANUFACTURER IS NOT RESPONSIBLE FOR DAMAGE OR LOSS OF MATERIALS AT THE JOB SITE.

PANELS NOT REQUIRED FOR IMMEDIATE USE SHOULD BE:
- CAREFULLY UNLOAD AND PLACE DIRECTLY IN A PROTECTED STORAGE AREA ON A FIRM, LEVEL SURFACE CLEAR OF DEBRIS, PREFERABLY UNDER WATER PROOF COVER AND SLIT PLASTIC WRAP AT BASE TO ALLOW AIR FLOW, FOR NO LONGER THAN 30 DAYS.
- CUT / SLIT THE BOTTOM OF THE PLASTIC WRAP IN 1'-0" INCREMENTS AT 5'-0" O.C. ALONG THE LENGTH OF THE BUNDLES. A CONTINUOUS CUT / SLIT SHOULD BE MADE ALONG THE WIDTH OF THE BUNDLE.
- ELEVATE WITH WOOD BLOCKING, TO ALLOW AIR CIRCULATION UNDER THE BUNDLE, ON A FIRM, LEVEL SURFACE CLEAR OF DEBRIS, STANDING WATER, DIRECT SUN, AND DRIFTING SNOW.
- SEPARATE FLAT-LAID BUNDLES WITH THE STYRENE DUNNAGE PROVIDED WITH THE SHIPMENT.
- BUNDLES CAN BE STACKED, NO MORE THAN (2) BUNDLES HIGH.
- SLOPE AT A MINIMUM OF 1:12 FOR DRAINAGE OF MOISTURE FROM PANELS.
- INSPECTED DAILY FOR MOISTURE. INSURE NO SAGS ARE PRESENT. TRAPPED MOISTURE CAN DAMAGE THE PANEL FINISH AND VOID APPLICABLE FINISH WARRANTIES. IF PANEL BUNDLES CONTAIN MOISTURE OR SAGS, THE PANEL BUNDLE SHOULD BE DRIED AND RESTACKED. USE CARE IN RESTACKING TO AVOID DAMAGE TO PANELS.

PANELS FOR IMMEDIATE USE:
IF THE PANELS ARE TO BE USED IMMEDIATELY, THE BUNDLES SHOULD BE PLACED AT PRE-PLANNED STRATEGIC LOCATIONS AROUND THE PERIMETER OF THE BUILDING, AS CLOSE AS POSSIBLE TO THE PLANNED WORK AREAS, TO AVOID UNDUE SITE MANEUVERING.

WHEN MOVING PANEL BUNDLES, EXTREME CAUTION SHOULD BE TAKEN TO PREVENT DAMAGE TO THE PANEL SURFACES AND EDGES.

WHEN HANDLING PANELS INDIVIDUALLY, THEY SHOULD BE CARRIED IN A VERTICAL, NOT FLAT POSITION. NEVER DRAG PANELS WHEN REMOVING THEM FROM BUNDLES.

(SEE "HANDLING PANELS AND COMPONENTS)

INSTALLATION TOOLS:

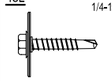
"READ BEFORE YOU START"

- SLIDING PANELS TOGETHER WILL SCUFF, DISCOLOR OR DAMAGE THE FINISH.
- IT IS IMPORTANT TO NOTE THAT, DUE TO THE HIDDEN FASTENER SIDE LAP CONNECTIONS OF THESE PANELS, EXTRA CARE SHOULD BE TAKEN WHEN HANDLING THESE COMPONENTS.
- THE FOLLOWING IS A LIST OF COMMON TOOL REQUIREMENTS. REFER TO "FIELD CUTTING" FOR PANEL CUTTING GUIDELINES.
- WEARING CLEAN GLOVES, HANDLING THE PANELS BY EDGES AND TAKING A LITTLE EXTRA CARE WILL PAY OFF BY PRODUCING A GOOD CLEAN FINISHED ROOF.

COMMON TOOL REQUIREMENTS:

CIRCULAR SAW	POWER DRILL	CARPENTER'S SQUARE
RIVET GUN	LEVEL	CHALK LINE
TAPE MEASURE	CAULK GUN	SCREW GUN
POWER SHEARS	HAMMER DRILL	POWER NIBBLER

CAUTION: ANY METAL FILINGS OR BURRS SHOULD BE CLEANED OFF THE FACE OF THE PANELS AS SOON AS POSSIBLE TO PREVENT RUST FROM FORMING ON THE PAINT. (SEE "CLEANING PROCEDURES")



ALIGNMENT & SHIMMING
PRIOR TO INSTALLATION, ROOF SECONDARY MEMBERS SHOULD BE CHECKED FOR OVERALL DIMENSIONS AND EVENNESS OF PLANE. THE ROOF SECONDARY MEMBERS SHOULD ALSO BE CHECKED TO VERIFY THE ROOF SYSTEM CAN BE INSTALLED WITHOUT INTERFERENCE. PRIOR TO INSTALLATION OF INSULATED PANEL, INSPECT ROOF FOR COMPONENT ALIGNMENT AND PLANE FLATNESS.

MISALIGNED SECONDARY STEEL MAY REQUIRE THE ERECTOR TO SHIM THE INSULATED ROOF PANELS AT SOME LOCATIONS. SHIMS AND LABOR FOR INSTALLING SHIMS ARE BY OTHERS.

FASTENERS:

INSULATED PANEL FASTENERS VARY BASED ON LOCATION AND PANEL THICKNESS. THE FASTENERS LISTED BELOW ARE TYPICAL FASTENERS. ADDITIONAL FASTENERS, WHEN REQUIRED BY DESIGN, WILL BE INDICATED ELSE WHERE ON THE ERECTION DRAWING SET.

DESIGN AND PERFORMANCE CRITERIA

ROOF SYSTEM
THE ROOF SYSTEM CONSISTS OF 24 GAUGE PANELS WITH A NOMINAL COVERAGE OF 1'-4" AND A PANEL SEAM THAT IS 2 1/2" OR 3 1/2" HIGH DEPENDING ON CLIP TYPE USED. REFER TO THE DETAILS AND SECTIONS FOR SPECIFIC PANEL CLIP TYPE.

PANEL CLIP SPACING
THE ROOF SYSTEM USES A CLIP TO ATTACH THE PANELS TO THE ROOF SECONDARY MEMBERS. PANEL CLIP SPACING REQUIREMENTS AS A STANDARD ARE REQUIRED AT EVERY PURLIN AND/OR ROOF JOIST.

PANEL CLIP FASTENING REQUIREMENTS
STANDARD CLIP FASTENERS ARE DESIGNED TO FASTEN TO A STEEL STRUCTURAL MEMBER OF .060" MINIMUM THICKNESS (16 GA.). A MINIMUM OF TWO FASTENERS ARE REQUIRED TO ENGAGE THE STRUCTURAL MEMBER AT EVERY PANEL CLIP LOCATION. IN CERTAIN INSTANCES, THREE FASTENERS MAY BE REQUIRED PER CLIP REQUIRED. LOOK ON CHART AT RIGHT AND IN THE ERECTION DRAWINGS FOR YOUR SPECIFIC FASTENER REQUIREMENTS. FASTENER PULLOUT VALUES ARE DEPENDENT UPON PROJECT LOCATION, SIZE, BUILDING CODE AND LOADING.

ROOF TOP UNITS AND CURB SUPPORTS
THE ROOF SYSTEM IS ELEVATED ABOVE THE TOP OF THE ROOF SECONDARY STRUCTURAL MEMBERS. THE ROOF CURB SUB-FRAMING IS LEVEL WITH THE SECONDARY STRUCTURAL MEMBERS. REFER TO THE DETAILS FOR PROPER JAMB LOCATIONS AND DIMENSIONS.

THE ROOF SYSTEM IS DESIGNED AS A FLOATING SYSTEM. CURB FRAMING AND FLASHING MUST BE DESIGNED ACCORDINGLY TO ALLOW THE CURB SYSTEM TO FLOAT WITH THE ROOF DURING THERMAL EXPANSION AND CONTRACTION. ROOF CURBS SHALL NOT SPAN THE RIDGE OF A BUILDING.

INSULATION REQUIREMENTS
INSULATION IS RECOMMENDED TO BE USED IN ALL ROOF APPLICATIONS TO AVOID PROBLEMS WITH CONDENSATION FORMING ON THE UNDERSIDE OF THE SHEETING. THIS ALSO PROVIDES A BUFFER BETWEEN THE PURLINS AND THE ROOF TO ELIMINATE NOISE AND POSSIBLE DAMAGE DUE TO METAL-TO-METAL CONTACT. NOISE REDUCING FOAM TAPE CAN BE SUPPLIED FOR USE IN LIMITED APPLICATIONS (CANOPIES, ETC.) WHEN INCLUDED AS PART OF THE ROOF ORDER. REFER TO THE DETAILS FOR FOAM TAPE REQUIREMENTS.

PAINTED ROOF
PAINTED Loc Seam ROOF PANELS ARE OFTEN PROVIDED BY MBS. IN THIS CASE, GUTTER BRACKETS AND OUTSIDE CLOSURES WILL BE PAINTED TO MATCH THE ROOF COLOR AS A STANDARD.

MASTIC APPLICATION

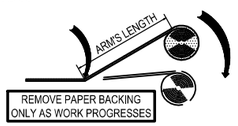
TEMPERATURE EXTREMES
TEMPERATURE EXTREMES MUST BE CONSIDERED DURING INSTALLATION OF THE ROOF DUE TO THE SENSITIVITY OF MASTICS. THE RECOMMENDED INSTALLATION TEMPERATURE RANGE IS 20-120 DEGREES FAHRENHEIT. AT COLDER TEMPERATURES, THE MASTIC STIFFENS RESULTING IN LOSS OF ADHESION AND COMPRESSIBILITY. AT HOTTER TEMPERATURES, THE MASTIC BECOMES TOO SOFT FOR PRACTICAL HANDLING. ON COLD BUT SUNNY DAYS, THE PANEL SURFACE MAY BECOME WARM ENOUGH TO ACCEPT THE APPLICATION OF HEATED MASTIC EVEN THOUGH THE AIR TEMPERATURE IS BELOW 20 DEGREES FAHRENHEIT.

WHEN OVERNIGHT TEMPERATURES FALL BELOW FREEZING, THE MASTIC SHOULD BE STORED IN A HEATED ROOM SO IT WILL BE WARM ENOUGH TO USE THE FOLLOWING DAY. ON HOT DAYS, THE MASTIC CARTONS SHOULD BE STORED OFF THE ROOF IN A COOL AND SHADED AREA. WHILE ON THE ROOF, MASTIC ROLLS SHOULD BE KEPT SHADED UNTIL ACTUAL USE.

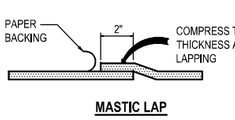
IN VERY COLD WEATHER, IT IS RECOMMENDED THAT THE FASTENERS BE TIGHTENED SLOWLY AND ONLY TIGHT ENOUGH THAT THE MASTIC IS IN FULL CONTACT WITH THE PANEL OR FLASHING. THEN ON THE NEXT SUNNY DAY, COMPLETE THE TIGHTENING PROCESS AFTER THE SUN WARMS THE PANEL AND FLASHING SURFACES.

CONTAMINATION
TO ASSURE PROPER ADHESION AND SEALING, THE MASTIC MUST HAVE COMPLETE CONTACT WITH ADJOINING SURFACES. CONTAMINANTS SUCH AS WATER OIL, DIRT AND DUST PREVENT SUCH CONTACT. THE PANEL AND FLASHING SURFACES MUST BE DRY AND THOROUGHLY CLEANED OF ALL CONTAMINANTS. BEFORE APPLYING TAPE MASTIC, THE MASTIC SHOULD BE CHECKED FOR CONTAMINANTS. IF THE MASTIC SURFACES ARE CONTAMINATED, IT MUST NOT BE USED.

DURING COOL WEATHER, CONDENSATION OR LIGHT MIST CAN ACCUMULATE ON THE PANEL AND FLASHING SURFACE AND NOT BE EASILY NOTICED. IT IS RECOMMENDED THAT THE MASTICS ALWAYS BE KEPT UNDER PROTECTIVE COVER AND THAT THE PANEL AND FLASHING SURFACES BE WIPED DRY IMMEDIATELY BEFORE INSTALLATION.



TAPE MASTIC IS PROVIDED WITH A PROTECTIVE PAPER TO REDUCE CONTAMINATION. INCOMPLETE REMOVAL OF THE PROTECTIVE PAPER WILL PREVENT THE MASTIC ADHESION TO THE PANEL OR FLASHING SURFACES. ALWAYS CHECK THAT THE PROTECTIVE PAPER IS COMPLETELY REMOVED. DO NOT REMOVE THE PROTECTIVE PAPER UNTIL IMMEDIATELY BEFORE THE PANEL OR FLASHING IS INSTALLED OVER THE MASTIC.



COMPRESSION
TO ASSURE PROPER COMPRESSION AND SEAL, THE TAPE MASTIC MUST BE COMPRESSED BETWEEN THE PANEL AND FLASHING SURFACES WITH FIRM AND UNIFORM PRESSURE. IN MOST CASES, THE REQUIRED PRESSURE IS APPLIED BY THE CLAMPING ACTION OF SCREWS PULLING THE ADJOINING SURFACES TOGETHER. HOWEVER, THE TAPE SEALANT'S RESISTANCE TO PRESSURE BECOMES GREATER IN COLD WEATHER.

DURING COLD WEATHER, THE FASTENERS MUST BE TIGHTENED SLOWLY TO ALLOW THE MASTIC TIME TO COMPRESS. IF THE FASTENERS ARE TIGHTENED TOO FAST, THE FASTENERS MAY STRIP OUT BEFORE THE MASTIC COMPRESSES ADEQUATELY, OR THE PANEL OR FLASHING MAY DEFORM IN THE IMMEDIATE AREA OF THE FASTENER, LEAVING THE REST OF THE MASTIC INSUFFICIENTLY COMPRESSED.

INSIDE CORNERS
AN INSIDE RADIUS, SUCH AS WHERE THE PANEL FLAT MEETS A RIB, IS USUALLY THE MOST CRITICAL AREA TO SEAL. A COMMON MISTAKE FOR THE INSTALLER IS TO BRIDGE THE MASTIC ACROSS THE INSIDE RADIUS.

WHEN THE LAPPING PANEL OR FLASHING IS PUSHED INTO PLACE, THE BRIDGED MASTIC IS STRETCHED AND THINNED. THE MASTIC MAY THEN BE TOO THIN TO ADEQUATELY SEAL THIS CRITICAL AREA. WHEN TAPE MASTIC IS APPLIED AT AN INSIDE RADIUS, IT IS RECOMMENDED THAT THE MASTIC BE FOLDED BACK, THEN PUSH THE MASTIC FOLD INTO THE RADIUS.

MASTIC LAP

ERECTORS RESPONSIBILITY

REGULATIONS
REGULATIONS SET FORTH BY THE OCCUPATIONAL SAFETY AND HEALTH ACT, LOCAL, STATE, AND/OR FEDERAL AGENCIES SHOULD BE ADHERED TO AT ALL TIMES. MBS IS NOT RESPONSIBLE FOR INJURY, DAMAGE, OR FAILURE, WHICH MAY BE THE RESULT FROM FAILING TO MEET ANY OF THESE REGULATIONS.

IN COMPLIANCE WITH THE HAZARD COMMUNICATION RULE 1910:1200, MATERIAL SAFETY DATA SHEETS (MSDS) HAVE BEEN PROVIDED FOR YOUR USE AND SAFETY. THESE DATA SHEETS SHOULD BE MADE AVAILABLE TO ALL PERSONNEL THAT COME IN CONTACT WITH THESE PRODUCTS. THESE DATA SHEETS WILL GIVE YOU THE NECESSARY INFORMATION TO PROPERLY HANDLE SUCH MATERIALS AND WHAT TO DO IN CASE OF AN EMERGENCY. (THE MSDS SHEETS ARE LOCATED ONLINE AND ARE AVAILABLE UPON REQUEST).

THE ERECTOR OF THE ROOF SYSTEM IS RESPONSIBLE FOR THE SAFE EXECUTION OF THIS DETAIL. THESE INSTRUCTIONS ARE INTENDED TO DESCRIBE THE SEQUENCE AND PROPER PLACEMENT OF PARTS. THEY ARE NOT INTENDED TO PRESCRIBE COMPREHENSIVE SAFETY PROCEDURES. THE PROCEDURES IN THIS DETAIL ARE BELIEVED TO BE RELIABLE. HOWEVER, MBS SHALL NOT BE RESPONSIBLE FOR INJURY, DAMAGE, OR FAILURE DUE TO THE MISAPPLICATION OF THESE PROCEDURES, IMPROPER ERECTION TECHNIQUES, OR NEGLIGENCE

WALKING AND WORKING ON ROOF PANELS
DO NOT PLACE BUNDLES OF PANELS ON THE ROOF STRUCTURE WITHOUT FIRST VERIFYING THE STRUCTURE WILL SAFELY SUPPORT THE CONCENTRATED WEIGHT OF THE PANELS AND THE WEIGHT OF THE INSTALLATION CREW. SOME ROOF STRUCTURES MAY NOT BE DESIGNED TO SUPPORT THE WEIGHT OF A FULL PANEL BUNDLE WITHOUT ADDITIONAL STRUCTURE SUPPORT.

DO NOT USE A ROOF PANEL AS A WORKING PLATFORM. AN UNSECURED PANEL COULD COLLAPSE UNDER THE WEIGHT OF A PERSON STANDING BETWEEN PURLINS OR AT THE PANEL END.

DO NOT WALK ON THE LAST INSTALLED PANEL RUN, AS THE UNSECURED EDGE COULD COLLAPSE UNDER A PERSON'S WEIGHT. WHEN INSTALLING CLIPS OR MAKING END LAP CONNECTIONS, ETC., STAND WHERE THE ROOF STRUCTURAL WILL SUPPORT YOUR WEIGHT.

AN APPROVED AND SAFE WALKING PLATFORM SHOULD BE USED IN HIGH TRAFFIC AREAS TO PREVENT THE ROOF PANEL FROM BEING DEFORMED, SCRATCHED, OR SCUFFED.

SAFETY EQUIPMENT
THE USE OF SAFETY EQUIPMENT FOR THE ROOF PANEL INSTALLATION IS RECOMMENDED AT ALL TIMES DURING THE INSTALLATION PROCESS. HOWEVER, WHEN USING LANYARDS, ENSURE THAT THE CLASP, BELT HOOKS AND WIRE CABLES ARE COVERED IN SUCH A MANNER THAT THEY WILL NOT SCRATCH THE PANEL SURFACE IF ACCIDENTALLY DRAGGED ALONG THE PANEL.

CREW SIZE
THE LENGTH OF THE INDIVIDUAL ROOF PANELS SHOULD BE CONSIDERED WHEN DETERMINING CREW SIZE. IT IS RECOMMENDED THAT UNDER NORMAL CONDITIONS, THERE BE ONE PERSON FOR EVERY TEN FEET OF PANEL LENGTH, PLUS ONE.

PANEL OVERHANG
DO NOT STAND ON THE END OF UNSUPPORTED (CANTILEVERED) PANELS AT THE EAVE OR RIDGE. STANDING ON THE CANTILEVER PORTION MAY RESULT IN PANEL COLLAPSE.

POINT LOADS
WHEN PROPERLY SUPPORTED BY THE STRUCTURAL STEEL, PANELS ARE DESIGNED TO SUPPORT UNIFORM LOADS, WHICH ARE EVENLY DISTRIBUTED OVER THE PANEL SURFACES. POINT LOADS THAT OCCUR IN SMALL OR CONCENTRATED AREAS, SUCH AS HEAVY EQUIPMENT, LADDER, OR PLATFORM FEET, ETC., MAY CAUSE PANEL DEFORMATION OR EVEN PANEL COLLAPSE.

SLICK SURFACES
PANEL SURFACES AND STRUCTURAL STEEL SURFACES ARE HARD, SMOOTH, AND NONABSORBENT, WHICH CAUSES THESE SURFACES TO BE VERY SLICK WHEN WET OR COVERED WITH SNOW OR ICE. EVEN BLOWING SAND OR HEAVY DUST CAN MAKE THESE SURFACES DIFFICULT TO WALK ON WITHOUT SLIPPING.

UNPAINTED PANEL SURFACES ARE OFTEN COATED WITH OIL TO ACCOMMODATE THE PANEL-FABRICATION PROCESS. ALTHOUGH DESIGNED TO WASH AWAY OR EVAPORATE DURING NORMAL WEATHER, THE OIL ON NEW PANELS CAN BE EXTREMELY SLICK, ESPECIALLY DURING PERIODS OF LIGHT RAIN AND DEW.
CAUTION MUST BE EXERCISED TO PREVENT SLIPPING AND FALLING ONTO THE ROOF SURFACE OR EVEN SLIDING OFF THE ROOF. NON-SLIP FOOTWEAR IS A NECESSITY AND NON-SLIP WORKING PLATFORMS ARE RECOMMENDED.

ELECTRICAL CONDUCTANCE
METAL PANELS ARE EXCELLENT ELECTRICAL CONDUCTORS. A COMMON CAUSE OF INJURY IS THE CONTACT OF METAL PANELS WITH POWER LINES DURING HANDLING AND INSTALLATION. THE LOCATION OF ALL POWER LINES MUST BE NOTED AND, IF POSSIBLE, FLAGGED. THE INSTALLATION PROCESS MUST BE ROUTED TO AVOID ACCIDENTAL CONTACT WITH ALL POWER LINES AND HIGH VOLTAGE SERVICES AND EQUIPMENT. ALL TOOLS AND POWER CORDS MUST BE PROPERLY INSULATED AND GROUNDED AND THE USE OF APPROVED GROUND FAULT CIRCUIT BREAKERS IS RECOMMENDED.

FALSE SECURITY OF INSULATION
BLANKET AND RIGID BOARD INSULATION BLOCK THE INSTALLER'S VIEW OF THE GROUND BELOW THE ROOF. SERIOUS INJURY CAN OCCUR WHEN THE INSTALLER GETS A FALSE SENSE OF SECURITY BECAUSE HE CANNOT SEE THE GROUND AND STEPS THROUGH THE INSULATION.

SHARP EDGES
SOME EDGES OR PANELS AND FLASHING ARE RAZOR SHARP AND CAN CAUSE SEVERE CUTS IF PROPER PROTECTIVE HAND GEAR IS NOT WORN. BE CAREFUL NOT TO INJURE OTHERS WHILE MOVING PANELS AND FLASHING.

COORDINATION WITH OTHER TRADES
SUPPORTS FOR THE ROOF SYSTEM SHALL BE PROVIDED AND ARE REQUIRED AS SHOWN IN THE SECTIONS AND AS NOTED IN THESE SPECIFICATIONS. ALL NECESSARY CLEARANCE DIMENSIONS FOR PROPER ELEVATIONS RELATIVE TO THE ROOF PANELS HAVE BEEN SHOWN. THE ERECTOR SHALL BE RESPONSIBLE FOR COORDINATING THESE DIMENSIONAL REQUIREMENTS WITH OTHER TRADES ASSOCIATED WITH THE BUILDING ROOF SYSTEM.

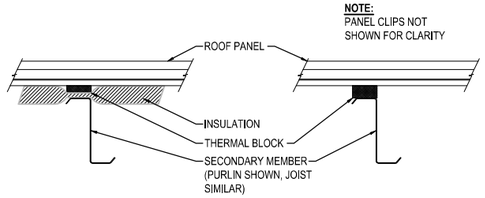
ERECTION CARE
THE ERECTOR MUST BE SKILLED IN THE ERECTION OF METAL BUILDING SYSTEMS AND IS RESPONSIBLE FOR COMPLYING WITH ALL APPLICABLE LOCAL, FEDERAL AND STATE CONSTRUCTION AND SAFETY REGULATIONS INCLUDING OSHA REGULATIONS AS WELL AS ANY APPLICABLE REQUIREMENTS OF LOCAL, NATIONAL OR INTERNATIONAL UNION RULES OR PRACTICES. THE ERECTOR REMAINS SOLELY RESPONSIBLE FOR THE SAFETY AND APPROPRIATENESS OF ALL TECHNIQUES AND METHODS UTILIZED BY ITS CREWS IN THE ERECTION OF THE METAL BUILDING SYSTEM AND/OR THE ROOF SYSTEM. THE ERECTOR IS ALSO RESPONSIBLE FOR SUPPLYING ANY SAFETY DEVICES SUCH AS SCAFFOLDS, RUNWAYS, NETS, ETC. WHICH MAY BE REQUIRED TO SAFELY ERECT THE METAL BUILDING SYSTEM AND/OR ROOF SYSTEM.

THE ERECTOR OF THE ROOF SYSTEM SHALL EXERCISE GREAT CARE AND ATTENTION TO THE DETAILS AS SHOWN ON THESE DRAWINGS TO INSURE A SECURE AND PROPER FIT OF ALL COMPONENTS. MBS SHALL NOT BE RESPONSIBLE FOR SUPERVISING AND/OR COORDINATING THE ERECTION OF THE ROOF SYSTEM WITH OTHER TRADES.

DUE CONSIDERATION MUST BE GIVEN BY THE ERECTOR TO THE EFFECTS OF THERMAL EXPANSION AND CONTRACTION WHEN ERECTING A ROOF TIE-IN TO AN EXISTING STRUCTURE TO INSURE A SAFE, SECURE, WEATHER TIGHT CONDITION. FLASHING FOR TIE-INS TO EXISTING BUILDINGS IS TYPICALLY NOT INCLUDED AS PART OF THE MATERIAL PROVIDED BY MBS. REFER TO THE SECTIONS/DETAILS FOR SPECIFIC MATERIALS PROVIDED BY MBS.

THERMAL BLOCKS

PURPOSE
THERMAL BLOCKS ARE USED IN BOTH INSULATED AND UN-INSULATED CONDITIONS. THEY PROVIDE IMPROVED THERMAL PERFORMANCE WERE INSULATION HAS BEEN COMPRESSED AT THE SECONDARY MEMBERS UNDER THE PANEL. THEY ALSO PROVIDE SUPPORT TO THE PANEL AND REDUCE PANEL FLUTTERING AND RUMBLE IN UN-INSULATED CONDITIONS. UN-INSULATED CONDITIONS UTILIZE THERMAL BLOCKS OR FOAM SPACERS THAT HAVE ADHESIVE TO ADHERE TO THE SECONDARY MEMBER TO PREVENT THEM FROM FALLING OUT OF PLACE.



LOCATIONS
THERMAL BLOCKS OR FOAM SPACERS ARE TO BE USED OVER ANY SECONDARY MEMBER WITH THE EXCEPTION OF THE EAVE MEMBER WHERE THE EAVE PLATE IS LOCATED.

ROOF SYSTEM COMPONENT WITH DETAILING

DEFINITION
COMPONENTS WITH DETAILING DEFINITION IS A CASE WHERE MBS IS PROVIDING THE ROOF SYSTEM TO BE USED IN CONJUNCTION WITH ANOTHER STRUCTURE. MBS REFERS TO THAT AS A "COMPONENTS WITH DETAILING." THIS SIMPLY MEANS THAT MBS SHALL CALCULATE THE QUANTITIES AND LENGTHS FOR THE MATERIAL REQUIRED. MBS IS PERFORMING NO ENGINEERING STUDY OF THE EXISTING STRUCTURE. THE ENGINEER OF RECORD ON THE PROJECT SHALL BE RESPONSIBLE FOR COORDINATING THE ROOF SYSTEM WITH THE OTHER TRADES OF THE PROJECT TO INSURE A SAFE, QUALITY AND PROPER APPLICATION OF THE ROOF SYSTEM.

DIAPHRAGM
THE ROOF IS DESIGNED TO ACCOMMODATE THERMAL EXPANSION AND CONTRACTION AND WILL NOT ACT AS A DIAPHRAGM FOR RESISTING LATERAL LOAD FORCES OR PROVIDING LATERAL STABILITY TO THE ROOF STRUCTURAL MEMBERS. DUE CONSIDERATION FOR THIS MUST BE ADDRESSED BY THE PROJECT ENGINEER OF RECORD. IN ADDITION, THE ROOF SYSTEM, BECAUSE IT IS DESIGNED TO FLOAT, WILL NOT SUPPORT STRUCTURAL MEMBERS LATERALLY. WHEN REPLACING AN EXISTING SCREW DOWN ROOF, ADDITIONAL BRACING MAY BE REQUIRED TO LATERALLY SUPPORT THE MEMBERS. ENGINEERING AND MATERIAL FOR THESE USES SHALL NOT BE PROVIDED BY MBS.

BUILDING & PANEL PREPARATION

STEP 1: PLUMB AND SQUARE
THE FIRST STEP IN THE SUCCESSFUL INSTALLATION OF WALL PANELS IS TO HAVE THE PRIMARY FRAMING PLUMB AND SQUARE. FOR BEST RESULTS, IT IS RECOMMENDED THAT A TRANSIT BE USED WHEN ERECTING THE STRUCTURAL STEEL. MAKE SURE THAT THE FOUNDATION AND BUILDING STRUCTURE IS SQUARE, LEVEL, AND CORRECT TO THE OUT-TO-OUT STEEL LINE DIMENSIONS.
SEE FIGURE "A"

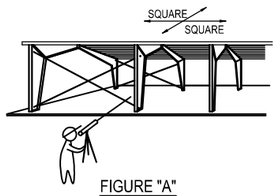

FIGURE "A"

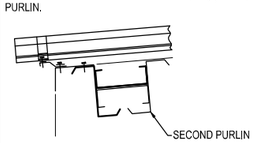
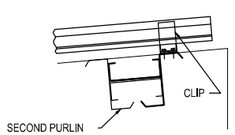


FIELD CUTTING PANELS

WHEN FIELD CUTTING OR MITERING WALL PANELS, NON-ABRASIVE CUTTING TOOLS SUCH AS NIBBLERS OR TIN-SNIPS SHALL BE USED. ABRASIVE CUTTING TOOLS SUCH AS MECHANICAL GRINDERS OR POWER SAWS CAN DAMAGE THE MATERIAL FINISH AND CREATE EXCESS METAL SHAVINGS THAT CAN CORRODE THE PANELS. THE USE OF NON-APPROVED CUTTING DEVICES MAY VOID THE FACTORY WARRANTY.



ANY METAL SHAVINGS THAT ARE CREATED NEED TO BE CLEANED FROM THE PANEL TO PREVENT SCRATCHING AND/OR CORROSION. THE MANUFACTURER WILL NOT ACCEPT CLAIMS FOR DAMAGE/DETERIORATION DUE TO USE OF UNAPPROVED TOOLS.

SPECIAL CONDITION AT A STRONG-BACK EAVE BEAM

IF THIS PROJECT HAS AN EAVE BEAM WITH (2) PURLINS, AS SHOWN, DO NOT ATTACH ROOF CLIPS TO THE "SECOND" PURLIN.

EAVE BEAM AT LOW EAVE

EAVE BEAM AT HIGH EAVE

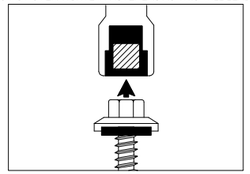
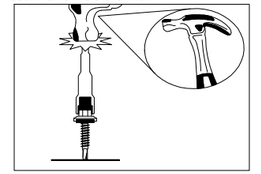
RECOMMENDED TOOL TYPES: SEE ALSO FASTENER SCHEDULE
4 AMP OR HIGHER RATED TOOLS (DO NOT USE IMPACTING TOOLS)
2000 - 2500 RPM SCREW GUN WITH TORQUE ADJUSTABLE CLUTCH
MANUAL OR ELECTRIC RIVET TOOL



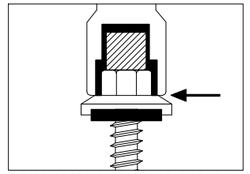
DO NOT USE IMPACTING TOOLS
TO ASSURE PROPER VOLTAGE TO THE TOOL, EXTENSION CORDS SHOULD BE CHECKED FOR PROPER WIRE SIZE/CHORD LENGTH.
16 GAGE WIRE, MAXIMUM CHORD LENGTH = 100'
14 GAGE WIRE, MAXIMUM CHORD LENGTH = 200'
12 GAGE WIRE, MAXIMUM CHORD LENGTH = 300'

DRIVING TIPS:
SET THE NUT DRIVER AS DESCRIBED BELOW PRIOR TO INSTALLING FASTENERS TO PREVENT FASTENER WOBBLE...

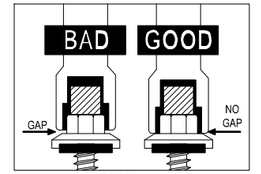


SOCKET EXTENSIONS (4" OR 6") ARE RECOMMENDED TO BE USED FOR INSTALLING PANEL CLIP FASTENERS TO MAINTAIN VERTICAL FASTENER INSTALLATION.

EXCESSIVE PRESSURE CAN CAUSE DRILL POINT FAILURE. LET THE FASTENER DO THE WORK.



DO NOT OVER TIGHTEN FASTENERS AS THIS WILL LEAD TO PANEL DIMPLING AND DISTORTION.



1. PUT THE TOP OF THE FASTENER INTO THE NUT DRIVER. NOTE: FOR PAINTED FASTENERS, PLACE A SINGLE OR DOUBLED LAYER OF PLASTIC BETWEEN THE FASTENER HEAD AND THE NUT DRIVER.

2. PLACE THE POINT OF THE FASTENER ONTO A HARD SURFACE AND FIRMLY HIT THE TOP OF THE NUT DRIVER 2-3 TIMES.

3. THE BASE OF THE NUT DRIVER SHOULD NOW BE CONTACTING THE TOP OF THE HEAD OF THE FASTENER WITH NO GAPS.

4. BAD SET VS. GOOD SET.

ROOF SHEETING DIRECTION

1.) THE ROOF SHEETING PLAN IS SHOWN WITH THE ROOF PANELS BEING ERECTED FROM "LEFT-TO-RIGHT". IF THE DESIRE IS TO ERECT THE ROOF PANELS FROM "LEFT-TO-RIGHT", FOLLOW THE ROOF SHEETING PLAN AS SHOWN. IF THE DESIRE IS TO ERECT THE ROOF PANELS FROM "RIGHT-TO-LEFT", FOLLOW THE INSTRUCTIONS SHOWN BELOW.

2.) WHEN SETTING BUNDLES OF PANELS ON THE ROOF, THE "MALE RIB" MUST ALWAYS BE AWAY FROM THE END OF THE BUILDING WHERE THE SHEETING WILL BEGIN.

BASIC INSTALLATION SEQUENCE

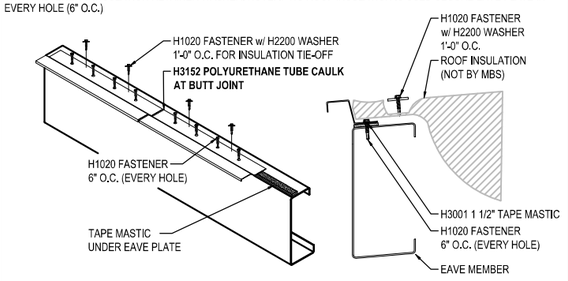
THE FOLLOWING STEPS OUTLINE THE BASIC INSTALLATION OF THE ROOF SYSTEM. REFERENCE THE SPECIFIC DETAILS WITHIN THIS ERECTION DRAWING SET FOR CONDITIONS SPECIFIC TO THIS PROJECT.

START PANEL PREPARATION
THE ROOF SYSTEM IS DESIGNED TO BE ELEVATED AND FLOAT ABOVE THE ROOF SUPPORT MEMBERS. BEGIN AT THE LOWER RAKE CORNER BY INSTALLING THE EAVE PLATE. (REFERENCE EAVE PLATE INSTALLATION BELOW)

AFTER EAVE PLATE HAS BEEN INSTALLED, STITCH THE FIRST ROLL OF ROOF INSULATION FROM RIDGE / HIGH EAVE TO LOW EAVE.

INSTALL THE RAKE CLIPS AND RAKE ANGLE TO SUPPORT / SECURE THE START PANEL. (REFERENCE RAKE ANGLE / RAKE CLIP PREPARATION TO THE RIGHT)

FIELD CUT AND INSTALL START PANEL
THE START PANEL IS SUPPLIED AS A FULL SHEET AND WILL NEED TO BE CUT. REFER TO THE ROOF SHEETING PLAN FOR START / FINISH DIMENSIONS AND RAKE DETAILS TO DETERMINE PROPER PANEL CUT. INSTALL THE START PANEL (LOW EAVE PANEL FIRST IF PANEL RUN IS LONG ENOUGH TO REQUIRE ENDLAPS) BY SECURING THE PANEL TO THE EAVE PLATE AND RAKE ANGLE. (REFERENCE LOW EAVE AND RAKE DETAILS). INSTALL PANEL CLIPS ON LEADING EDGE OF PANEL AS SHOWN IN THE PANEL CLIP DETAIL. CONTINUE TO INSTALL UPSLOPE START PANEL IF ENDLAPS ARE REQUIRED. REFERENCE THE BACKUP PLATE DETAIL AND ENDLAP DETAIL FOR ATTACHMENT OF START PANEL(S) AT RAKE ANGLE.



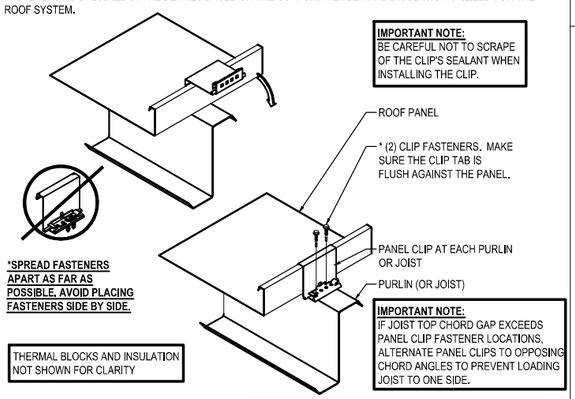
INTERMEDIATE PANEL & MODULARITY
THE INTERMEDIATE PANELS (FULL PANELS) SHOULD BE INSTALLED BY ROLLING THE PANEL INTO PLACE ENSURING THE SEAM IS FULLY ENGAGED. SECURE THE PANELS WITH PANEL CLIPS AND THE LOW EAVE ACROSS THE ROOF. IT IS RECOMMENDED TO INSTALL THE OUTSIDE CLOSURE AT THE HIGH EAVE / RIDGE AS THE ROOF PROGRESSES. THIS WILL HELP MAINTAIN MODULARITY. (REFERENCE HIGH EAVE / RIDGE DETAILS)

FINISH PANEL
THE FINISH PANEL IS SIMILAR TO THE START PANEL INSTALLATION. THE RAKE ANGLE CLIPS AND RAKE ANGLE NEEDS TO BE INSTALLED ON TOP OF THE INSULATION PRIOR TO INSTALLING THE FINISH PANEL. THE FINISH PANEL SHOULD BE FIELD CUT AND ROLLED INTO PLACE AND SECURED TO THE RAKE ANGLE SIMILAR TO THE START PANEL.

TRIM INSTALLATION
TRIM INSTALLATION CAN BE DONE AFTER THE ROOF PANELS ALL HAVE BEEN INSTALLED OR CAN BE INSTALLED AS ENOUGH PANELS HAVE BEEN INSTALLED FOR ATTACHMENT OF TRIMS. (REFERENCE TRIM DETAILS)

EAVE PLATE INSTALLATION

PLACE TAPE MASTIC ON TOP OF EAVE MEMBER PRIOR TO INSTALLING EAVE PLATE. INSTALL EAVE PLATE BY FASTENING EVERY HOLE TO EAVE MEMBER (6" O.C.) PRIOR TO INSULATION BEING INSTALLED. SECURE INSULATION WITH FASTENER & INSULATION RETAINER WASHER. NOTE: IF NO ROOF INSULATION IS USED SECURE EAVE PLATE IN EVERY HOLE (6" O.C.)



NOTE: H1020/H1070 (PURLIN/JOIST) FASTENER w/ H2200 WASHER

SHORT EAVE PLATE		TALL EAVE PLATE	
EPS108	BASIC EAVE / GUTTER	EPT108	BASIC EAVE / GUTTER

PANEL CLIP INSTALLATION

BEFORE INSTALLING THE PANEL CLIP, FEEL FOR THE SUPPORT MEMBER BELOW THE INSULATION. ALIGN CLIP CENTERED OVER THE SUPPORT MEMBER AND ROLL CLIP OVER THE MALE HOOK OF THE PANEL. FASTEN CLIP WITH FASTENERS AS SPECIFIED IN THE DETAILS BASED ON THE SUPPORT MEMBER AND INSULATION UTILIZED FOR THE ROOF SYSTEM.

IMPORTANT NOTE:
BE CAREFUL NOT TO SCRAPE OF THE CLIP'S SEALANT WHEN INSTALLING THE CLIP.

IMPORTANT NOTE:
IF JOIST TOP CHORD GAP EXCEEDS PANEL CLIP FASTENER LOCATIONS, ALTERNATE PANEL CLIPS TO OPPOSING CHORD ANGLES TO PREVENT LOADING JOIST TO ONE SIDE.

***SPREAD FASTENERS APART AS FAR AS POSSIBLE. AVOID PLACING FASTENERS SIDE BY SIDE.**

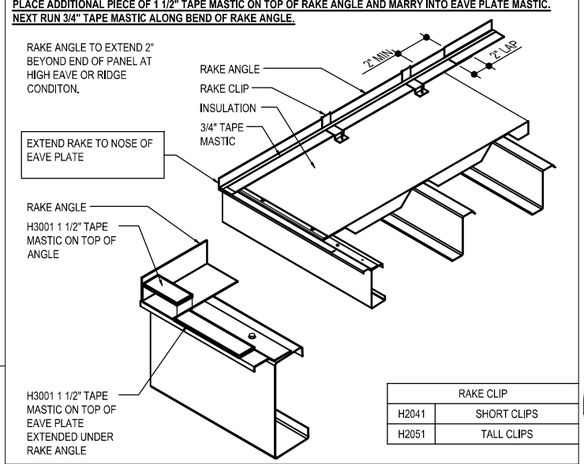
RAKE ANGLE / RAKE CLIP PREPARATION

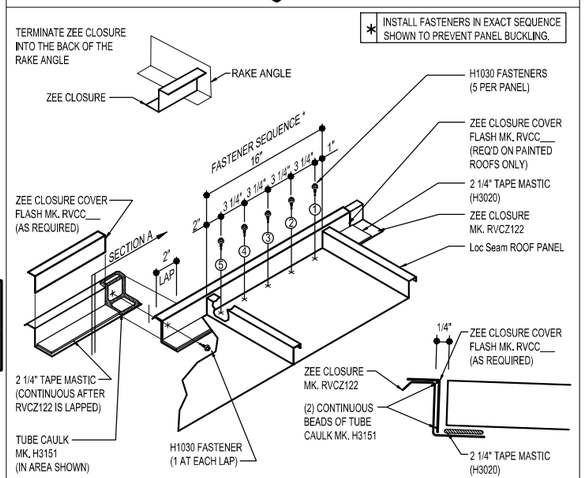
PRIOR TO INSTALLING THE ROOF INSULATION THE SECONDARY MEMBER WILL NEED TO BE PRE-DRILLED FOR THE RAKE CLIPS. PRE-DRILLING WILL MAKE INSTALLATION OF THE RAKE AND CLIPS MUCH EASIER AFTER INSULATION IS IN PLACE. DO NOT INSTALL RAKE CLIPS UNTIL INSULATION (IF REQUIRED) IS INSTALLED. **RAKE CLIP IS INSTALLED ON TOP OF THE INSULATION.**

SNAP A CHALK LINE AS SHOWN BELOW FROM HIGH EAVE / RIDGE TO LOW EAVE. DRILL 3/16" Ø HOLE CENTERED ON SECONDARY MEMBER. THIS IS HELPS TO ALIGN THE START PANEL.

NOTE: IMP WALL PANEL >4" THICK REQUIRE ANGLES ON TOP OF SECONDARY MEMBER EXTENDED BEYOND STEEL LINE TO ALLOW FOR RAKE CLIP ATTACHMENT. ATTACH WITH (1) H1020 / H1070 TO PURLIN / JOIST PRIOR TO RAKE CLIP INSTALLATION.



RAKE ANGLE / RAKE CLIP INSTALLATION



AFTER INSULATION IS IN PLACE AND PRIOR TO INSTALLING THE RAKE CLIPS AND RAKE ANGLE APPLY 1 1/2" TAPE MASTIC ON TOP OF THE EAVE PLATE BUT ONLY REMOVE PAPER BACKING WHERE THE RAKE ANGLE WILL REST. THIS WILL SEAL BETWEEN THE EAVE PLATE AND THE RAKE ANGLE.

SLIDE RAKE CLIPS ONTO RAKE ANGLE PRIOR TO SECURING THE RAKE CLIPS TO THE SECONDARY MEMBERS. PLACE THE RAKE CLIPS AND ANGLE OVER THE INSULATION USING A SMALL DRIFT PIN TO LOCATE THE PRE-DRILLED HOLE. INSTALL FASTENER THROUGH OPPOSITE CLIP HOLE INTO SECONDARY MEMBER. REMOVE DRIFT PIN AND INSTALL SECOND FASTENER TO SECURE CLIP. NOTE: (2) SCREWS ARE REQUIRED IN EVERY CLIP. DO NOT CUT INSULATION OUT FROM AROUND THE CLIP.

PLACE ADDITIONAL PIECE OF 1 1/2" TAPE MASTIC ON TOP OF RAKE ANGLE AND MARRY INTO EAVE PLATE MASTIC. NEXT RUN 3/4" TAPE MASTIC ALONG BEND OF RAKE ANGLE.

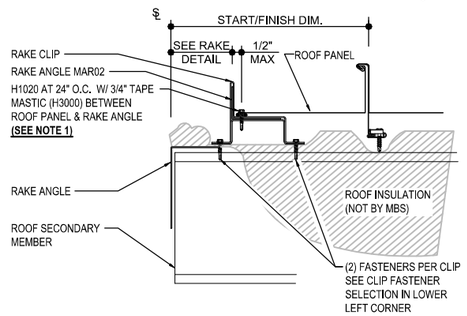
BACKUP PLATE INSTALLATION



THE BACKUP PLATE PROVIDES SUPPORT AT THE ENDLAP OF THE PANEL TO ALLOW FOR COMPRESSION OF SEALANTS. THE BACK UP PLATE HAS NOTCHES THAT SLIDE ONTO THE PANEL TO LOCATE AND HOLD THE BACKUP PLATE IN PLACE. AT THE RAKE CONDITION, THE BACKUP PLATE IS TO BE FIELD CUT FLUSH WITH THE HORIZONTAL LEG OF THE RAKE ANGLE. DO NOT EXTEND BACKUP PLATE ON TOP OF RAKE ANGLE.

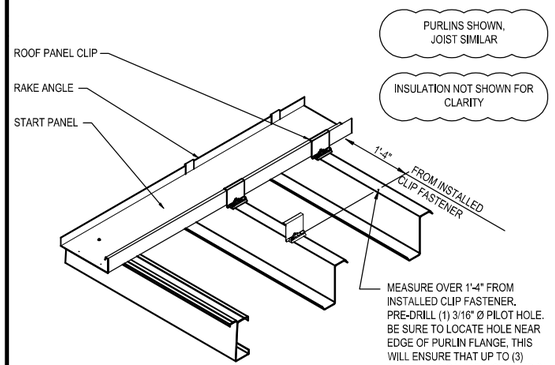
PANEL MODULARITY SEQUENCE

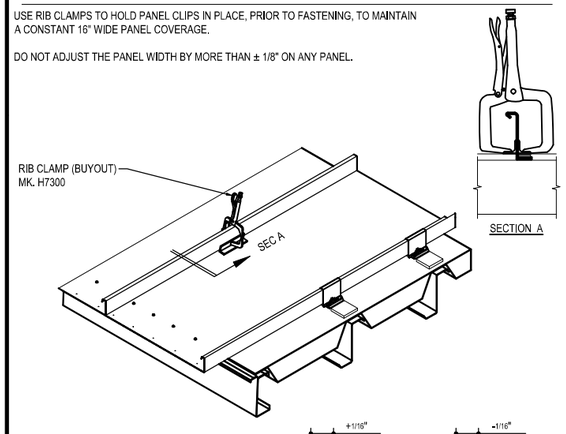
THE PROCEDURES AND SEQUENCE SHOWN ARE RECOMMENDED TO AID IN MAINTAINING PANEL MODULARITY.
THE TOOLS SHOWN ARE NOT REQUIRED BUT RECOMMENDED TO AID INSTALLATION.



SPECIAL ATTENTION MUST BE GIVEN TO INSULATION SAG AND RECOMMEND PRE-DRILLING TO LOCATE CLIPS. MODULARITY TOOLS ARE AVAILABLE TO AID IN MODULARITY.

ENSURE THE INSULATION IS PERMITTED TO SAG AT MID-SPAN BETWEEN ROOF SECONDARY MEMBERS AND EXPANDED TO THE FULL THICKNESS WHILE STILL KEEPING CONTACT WITH BOTTOM OF PANEL.

DO NOT PULL THE INSULATION TAUT AS THIS WILL SIGNIFICANTLY REDUCE THE THERMAL PERFORMANCE OF THE ROOF SYSTEM AND COULD CAUSE ROOF PANEL MODULARITY ISSUES.

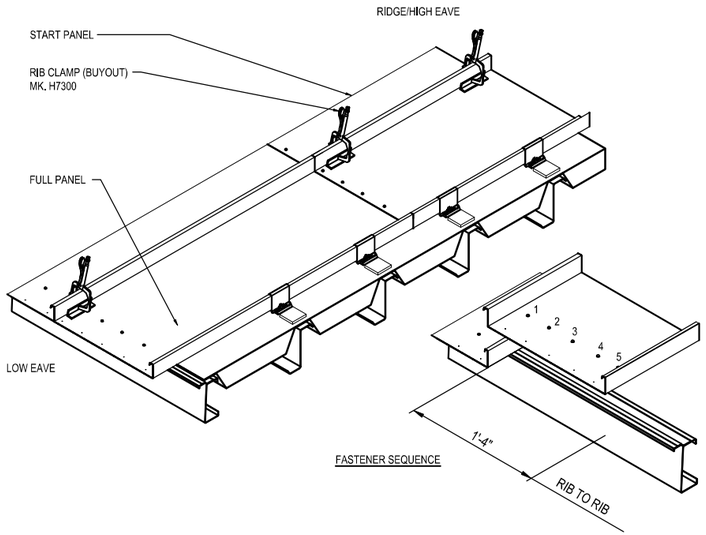


PRE-DRILL ONE PILOT HOLE FOR ROOF PANEL CLIPS AT MID-SPANS, HIGH SIDE OR RIDGE AND PANEL END LAPS, IF ANY.

MEASURE OVER 1'-4" FROM INSTALLED CLIP FASTENER. PRE-DRILL (1) 3/16" Ø PILOT HOLE. BE SURE TO LOCATE HOLE NEAR EDGE OF PURLIN FLANGE, THIS WILL ENSURE THAT UP TO (3) FASTENERS CAN BE INSTALLED IN CLIP BASE (IF REQ'D BY DESIGN. REF. ERECTION DRAWINGS FOR FASTENER REQUIREMENTS).

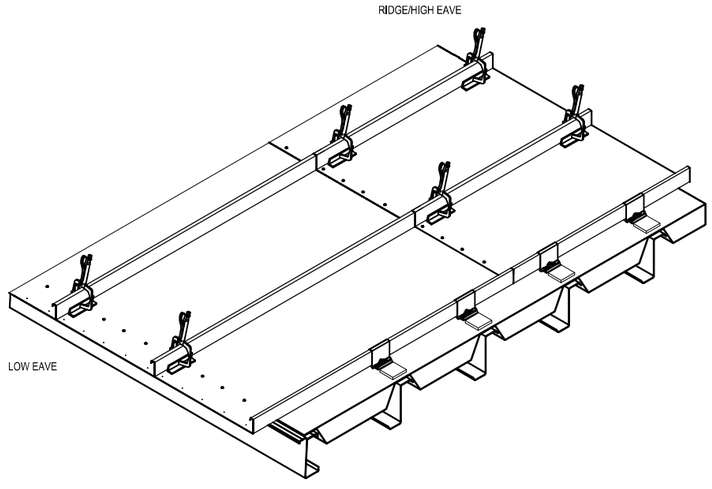
USE RIB CLAMPS TO HOLD PANEL CLIPS IN PLACE, PRIOR TO FASTENING, TO MAINTAIN A CONSTANT 16" WIDE PANEL COVERAGE.

DO NOT ADJUST THE PANEL WIDTH BY MORE THAN ± 1/8" ON ANY PANEL.



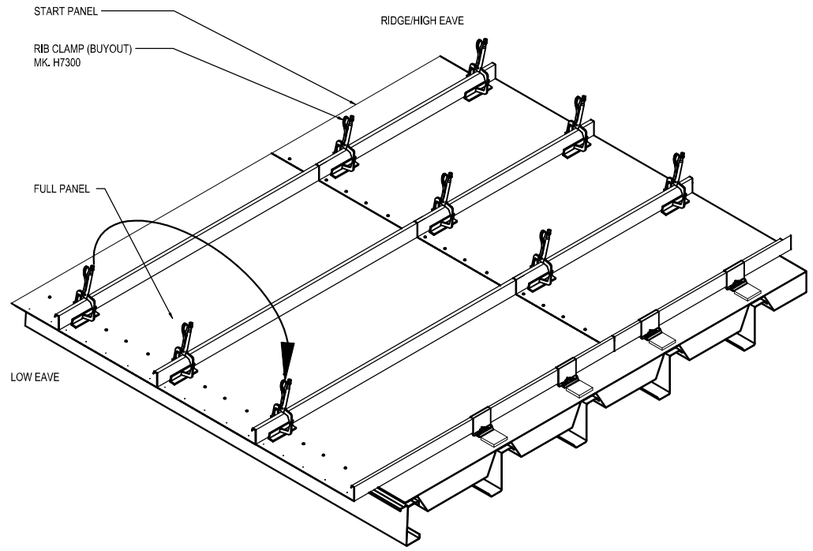
CORRECT PANEL MODULARITY

ADJUSTING PANEL MODULARITY



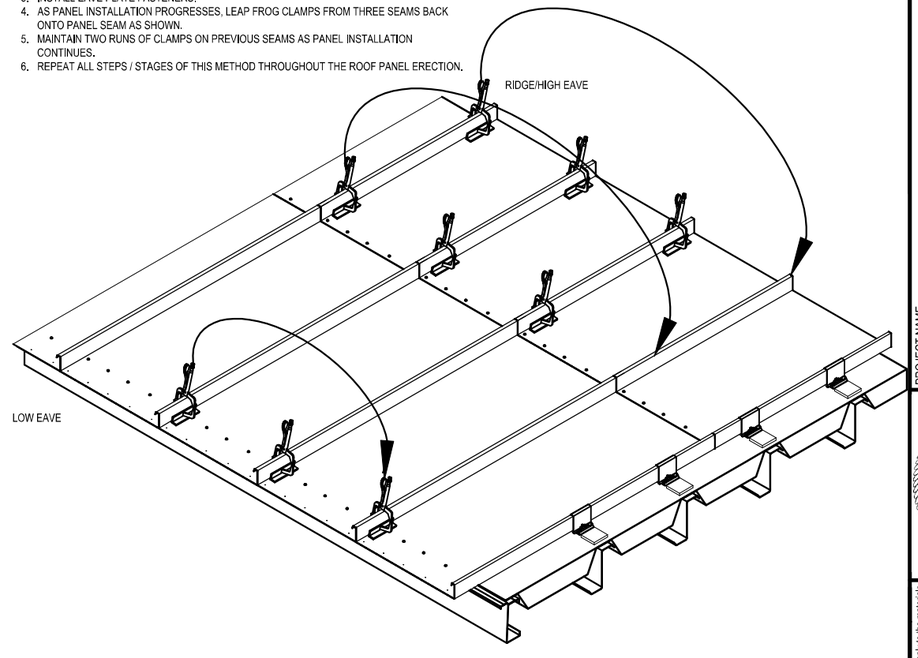
STAGE #1

1. ROLL FIRST FULL PANEL IN PLACE AND ALIGN CENTER OF PANEL FLAT TO SQUARE AS SHOWN BELOW.
2. APPLY THE LOW EAVE CLAMP AS SHOWN TO DRAW PANEL TIGHT TO CLOSURE.
3. INSTALL THE EAVE FASTENERS STARTING AT LEADING RIB.
4. AS PANEL INSTALLATION PROGRESSES, INSTALL MORE CLAMPS UPSLOPE AS SHOWN.
5. ADD, ADJUST OR LEAVE CLAMPS OFF TO MAINTAIN PANEL MODULARITY AS NECESSARY.
6. LEAVE CLAMPS ON FIRST FULL SEAM.



STAGE #2

1. INSTALL THE NEXT LOW EAVE PANEL AND ADD CLAMP.
2. REPEAT STEPS 2 THROUGH 6 FROM STAGE #1 NOTES.
3. LEAVE CLAMPS ON FIRST AND SECOND FULL SEAM.
4. INSTALL THE OUTSIDE CLOSURE IN THE FIRST FULL PANEL.



STAGE #3

1. KEEP CLAMPS IN PLACE ON THE FIRST TWO SEAMS WITH THE EXCEPTION OF THE LOW EAVE CLAMP.
2. INSTALL THE NEXT LOW EAVE PANEL AND LEAP FROG CLAMP AS SHOWN.
3. REPEAT STEPS 2 THROUGH 5 FROM STAGE #1 NOTES.

STAGE #4

1. KEEP CLAMPS IN PLACE ON THE FIRST TWO SEAMS WITH THE EXCEPTION OF THE LOW EAVE CLAMP.
2. INSTALL THE NEXT LOW EAVE PANEL AND LEAP FROG THE CLAMP AS SHOWN.
3. INSTALL EAVE PLATE FASTENERS.
4. AS PANEL INSTALLATION PROGRESSES, LEAP FROG CLAMPS FROM THREE SEAMS BACK ONTO PANEL SEAM AS SHOWN.
5. MAINTAIN TWO RUNS OF CLAMPS ON PREVIOUS SEAMS AS PANEL INSTALLATION CONTINUES.
6. REPEAT ALL STEPS / STAGES OF THIS METHOD THROUGHOUT THE ROOF PANEL ERECTION.

MODULARITY GUIDANCE

SPECIAL ATTENTION TO ABOVE STEPS TO MAINTAIN PROPER PANEL MODULARITY AND THERMAL PERFORMANCE IS CRITICAL. FAILURE TO DO SO WILL RESULT IN UNSIGHTLY PANEL APPEARANCE.

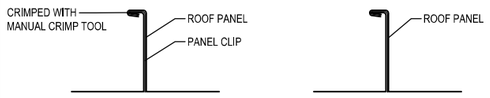
IMPORTANT NOTE:

THE INSTRUCTIONS ON THIS PAGE ONLY ADDRESS THE USE OF THE HAND CRIMPING TOOLS. INSTRUCTIONS FOR MECHANICAL SEAMING, IF REQUIRED, ARE OUTLINED IN THE SEAMING MANUAL, WHICH IS INCLUDED WITH THE MECHANICAL SEAMER KIT PROVIDED BY THE SEAMER RENTAL COMPANY.

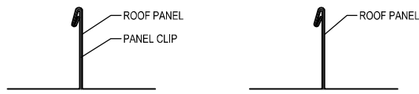
SPECIALIZED SEAMING AND HAND CRIMPING TOOLS
THE FINISHED SEAM OF THE ROOF PANELS REQUIRES SPECIAL SEAMING TOOLS THAT ARE AVAILABLE ONLY THROUGH THE MBS. CAUTION: THE USE OF OTHER SEAMING / CRIMPING EQUIPMENT WILL RESULT IN FAULTY AND / OR DAMAGED SEAMS AND SHALL INVALIDATE ANY OF THE ROOF SYSTEM'S MATERIAL AND WEATHER TIGHTNESS WARRANTIES.



SEAMING TOOL SOURCE
THE SEAMING TOOLS ARE PROVIDED BY MBS IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF THE ORDER DOCUMENTS. CONTACT YOUR SERVICE REPRESENTATIVE TO PURCHASE NECESSARY CRIMPING TOOLS. CONTACT THE SEAMER RENTAL COMPANY FOR RENTAL INFORMATION OF THE MECHANICAL SEAMER IF REQUIRED.

CRIMPING & SEAMING REQUIREMENTS

THE DESIGN OF THIS STRUCTURE REQUIRES SEAMING TO MEET DESIGN AND CODE REQUIREMENTS. SEE THE SEAMING PLAN FOR ROOF PLANE SPECIFIC SEAMING REQUIREMENTS.
THERE ARE THE TWO SEAM TYPES POSSIBLE WITH THE NBG Loc Seam AS NOTED BELOW. ALL OF THESE SEAM TYPES CAN BE ACHIEVED WITH THE AVAILABLE CRIMPERS. IT IS RECOMMENDED TO RENT A MECHANICAL SEAMER TO AID IN THE SEAMING PROCESS.



1. **NBG Loc Seam 90**
   THE Loc Seam 90 SEAM REQUIRES HAND CRIMPING THE ROOF PANEL WITH THE MANUAL SEAMING TOOL AT THE STARTING EAVE OR RIDGE END OF THE PANELS, AND AT THE END LAPS. ONCE THE HAND CRIMPING HAS BEEN COMPLETED, THEN SEAM THE FULL LENGTH OF THE ROOF PANELS WITH THE MOTORIZED SEAMING MACHINE.
2. **NBG Loc Seam 360**
   THE Loc Seam 360 SEAM IS ACHIEVED BY RUNNING THE SINGLE DIRECTIONAL SEAMER OVER THE ENTIRE ROOF. THE ERECTOR MUST FIRST HAND CRIMP ENTIRE ROOF PANEL IN THE Loc Seam 90 SEAM WITH THE MANUAL SEAMING TOOL. BEFORE THE SEAMER IS LOCKED ON, THE LOW END OF THE PANEL MUST BE HAND CRIMPED INTO A NBG Loc Seam 360 SEAM, UTILIZING THE HAND CRIMPER THAT IS SUPPLIED IN THE SEAMER KIT. THIS WILL ENABLE YOU TO LOCK THE SEAMER ONTO THE PANEL SEAM. THEN SEAM THE FULL LENGTH OF THE ROOF PANEL.

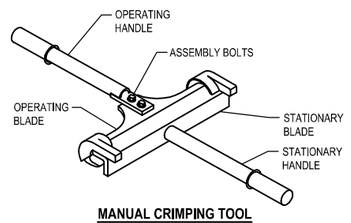
CHECK PANEL ASSEMBLY

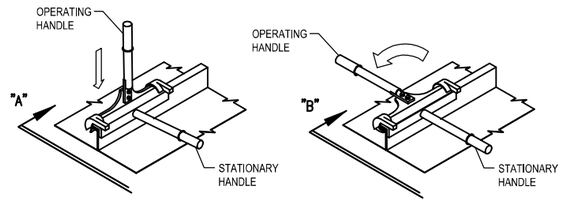
SIDE LAP FIT-UP
BEFORE SEAMING, INSPECT THE FULL LENGTH OF EACH ROOF PANEL SIDE LAP. CHECK THAT THE TWO PANELS ARE PROPERLY HAND CRIMPED AT ALL CLIP LOCATIONS, LOW EAVE, HIGH EAVE AND END LAPS. ANY CONDITIONS WHERE THE PANEL **IS NOT** CRIMPED PROPERLY **MUST** BE CORRECTED BEFORE ATTEMPTING TO SEAM THE ROOF PANELS. **UN-SEAMED ROOF PANELS CANNOT PROVIDE THEIR DESIGNED WIND LOAD AND WEATHER RESISTANCE.**

CLIP ALIGNMENT
BEFORE CRIMPING AND / OR SEAMING, INSPECT THAT EACH ROOF PANEL CLIP IS PROPERLY ENGAGED IN THE SIDE LAP ASSEMBLY. ANY DISPLACED CLIPS MUST BE CORRECTED BEFORE ATTEMPTING TO CRIMP / SEAM THE ROOF PANELS. PANEL CLIPS THAT ARE NOT PROPERLY ENGAGED AND ALIGNED CAN CAUSE FAULTY CRIMP / SEAM AND OBJECTIONABLE SEAM APPEARANCE. **THE MBS NOR THE SEAMER RENTAL COMPANY CAN BE HELD RESPONSIBLE FOR ANY CONCERNS RELATED TO IMPROPERLY ALIGNED CLIPS.**



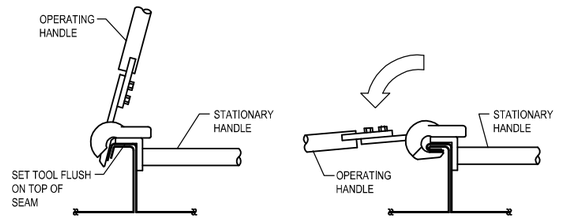
SEAM DAMAGE
BEFORE CRIMPING AND / OR SEAMING, INSPECT THAT EACH ROOF PANEL MALE AND FEMALE ARE FREE FROM DISTORTION AND KINKS WHICH CAN LEAD TO DIFFICULTY AND / OR DAMAGE TO THE PANEL WHILE ATTEMPTING TO CRIMP / SEAM THE PANEL. ANY DISTORTIONS / KINKS MUST BE CORRECTED BEFORE ATTEMPTING TO CRIMP / SEAM THE PANELS. **THE MBS NOR THE SEAMER RENTAL COMPANY CAN BE HELD RESPONSIBLE FOR ANY CONCERNS RELATED TO DAMAGE CAUSED IN THE FIELD.**

MANUAL CRIMPING TOOL OPERATION FOR Loc Seam 90 SEAM



ASSEMBLE THE SEAMING TOOL
WHEN RECEIVED, THE MANUAL CRIMPING TOOL MAY BE DISASSEMBLED. ASSEMBLE THE HANDLE TO THE TOOL BODY WITH THE PROVIDED BOLTS.

TOOL ORIENTATION TO SEAM
ORIENT THE TOOL TO FIT CORRECTLY ON THE ROOF PANEL SEAM (SEE SECTION A BELOW). THE STATIONARY HANDLE MUST BE IN THE HORIZONTAL POSITION AND THE OPERATING HANDLE MUST BE ROTATED UP TO THE OPEN OR VERTICAL POSITION



FORMING THE SEAM
WHEN THE TOOL IS CORRECTLY POSITIONED ON THE PANEL, PUSH THE STATIONARY BLADE SOLIDLY AGAINST THE TOP OF THE SEAM. WHILE HOLDING THE STATIONARY HANDLE IN THE HORIZONTAL POSITION, ROTATE THE OPERATING HANDLE DOWN TO THE HORIZONTAL POSITION. THIS WILL FORM THE SEAM (SEE SECTION B BELOW).

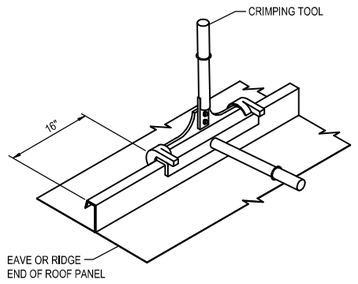
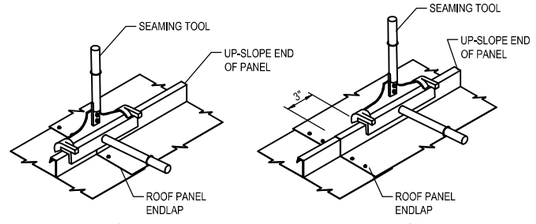
TOOL POSITION ON THE ROOF
WHEN HAND SEAMING AT THE LOW EAVE, RIDGE END, END LAP AND **ALL** ROOF CLIP LOCATIONS. THE SEAMING MUST BE DONE IN TWO STEPS.
STEP 1: POSITION THE CRIMPING TOOL AS SHOWN BELOW IN THE VARIOUS AREAS OF THE ROOF. ROTATE THE MOVEABLE HANDLE DOWN TO FORM A Loc Seam 90 SEAM. RELEASE HANDLE.

STEP 2: RE-POSITION THE CRIMPING TOOL AS SHOWN BELOW AND REPEAT STEP 1.



CHECKING THE FINISHED SEAM
ROTATE THE OPERATING HANDLE TO THE OPEN POSITION, REMOVE THE TOOL AND CHECK THAT THE SEAM IS CORRECTLY FORMED, AS SHOWN BELOW.



STEP 1 — STEP 2

MANUAL CRIMPING AT THE EAVE

ERECTOR NOTES:
THE ROOF SEAM PROFILE IS COMPLETE ONLY AFTER THE ENTIRE ROOF HAS BEEN MECHANICALLY SEAMED. IF BUILDING HAS LOC SEAM 360 SEAM, DO NOT SEAM / CRIMP THE PANEL INTO A LOC SEAM 360 SEAM 16" UP FROM THE LOW EAVE, OTHERWISE THE GUTTER BRACKET WILL NOT FIT UP PROPERLY.

SHEET: D14 of 20

SUGGESTED INITIAL PROCEDURES FOR INSTALLER:

1) CHECK ALL APPLICABLE FEDERAL, STATE AND LOCAL CODES TO VERIFY COMPLIANCE WITH THE CODE.

2) BE CERTAIN THAT SITE CONDITIONS ARE SUCH THAT SAFE WORKING PRACTICES ARE STRICTLY OBSERVED.

3) REVIEW ALL INSTALLATION DRAWINGS AND ASSOCIATED PROJECT DOCUMENTS.

4) CONSULT WITH THE GENERAL CONTRACTOR, DESIGN ENGINEER, ARCHITECT AND/OR OWNER TO CONFIRM THOSE RECOMMENDED.

5) COMPLY WITH ALL SAFETY REGULATIONS.

IT IS THE RESPONSIBILITY OF THE DESIGNER / CONTRACTOR / INSTALLER TO ENSURE THAT THE DETAILS AND INSTALLATION PROCEDURES ARE ADAPTED TO MEET PARTICULAR BUILDING REQUIREMENTS. THE METAL BUILDING / PANEL SUPPLIER SHALL NOT BE HELD LIABLE FOR ANY AND ALL CLAIMS ARISING FROM LACK OF PROPER INSTALLATION. THE DESIGNER / INSTALLER MUST BE AWARE OF AND ALLOW FOR EXPANSION AND CONTRACTION OF WALL PANELS WHEN DESIGNING AND/OR INSTALLING WALL PANELS.

SOME FIELD CUTTING IS PART OF NORMAL ERECTION WORK. WORKMANSHIP SHALL CONFORM TO THE HIGHEST INDUSTRY STANDARDS. A CERTAIN AMOUNT OF WAVINESS CALLED "OIL CANNING" MAY EXIST IN THE PANEL. MINOR WAVINESS IS NOT SUFFICIENT CAUSE FOR REJECTION AND DOES NOT AFFECT THE STRUCTURAL INTEGRITY OF THE PANEL. MINIMIZING OR ELIMINATION THIS EFFECT CAN BE ACCOMPLISHED BY USING SIMPLE INDUSTRY STANDARD PROCEDURES DURING SURFACE PREPARATION.

NOTES FOR HANDLING PANELS AND COMPONENTS:

INSULATED PANELS ARE CAREFULLY INSPECTED AND BUNDLED PRIOR TO LOADING FOR SHIPMENT. IT IS THE RESPONSIBILITY OF THE TRANSPORTATION COMPANY TO DELIVER THESE COMPONENTS UNDAMAGED. IT IS THE CONSIGNEE'S RESPONSIBILITY TO INSPECT THE SHIPMENT FOR DAMAGE AND SHORTAGES WHEN IT IS RECEIVED.

WHEN A SHIPMENT IS RECEIVED, CHECK EACH ITEM AGAINST THE BILL OF LADING FOR QUANTITY, LENGTH, DAMAGE, ETC. IF A SHORTAGE OR DAMAGE IS FOUND, MAKE SURE A NOTATION OF IT IS MADE ON THE BILL OF LADING AND SIGNED BY THE DRIVER. THE MANUFACTURE CANNOT BE RESPONSIBLE FOR SHORTAGES OR DAMAGED MATERIALS UNLESS THEY ARE NOTED ON THE BILL OF LADING.

IN THE CASE OF PACKAGED COMPONENTS (SUCH AS CLIPS, FASTENERS, AND SEALANTS, ECT.), THE QUANTITIES ARE MARKED ON THEIR CONTAINER AND SHOULD BE CHECKED AGAINST THE BILL OF MATERIALS.

IT IS THE CUSTOMER'S RESPONSIBILITY TO MAKE ANY DAMAGE CLAIM. IMMEDIATELY NOTIFY THE DESIGNATED CUSTOMER SERVICE COORDINATOR OF ANY SHORTAGES OR DAMAGED MATERIALS. THIS WILL HELP TO MINIMIZE ANY ERECTION DELAYS THAT MAY RESULT FROM THE SHORTAGE OR DAMAGED MATERIALS.

UPON ARRIVAL OF PANELS, FORKLIFTS OR HOISTING EQUIPMENT WILL BE REQUIRED TO UNLOAD AND POSITION THE PANEL BUNDLES AND ACCESSORY CRATES FOR JOBSITE STORAGE AND INSTALLATION.

EXTREME CARE SHOULD BE TAKEN TO AVOID BUMPING THE PANELS WHILE LIFTING AND MANEUVERING. IN ALL CASES PANELS SHOULD NOT DEFLECT SIGNIFICANTLY IN THE LIFTING PROCESS.

IN HANDLING PANELS INDIVIDUALLY, ALL PERSONNEL MUST WEAR THE PROPER CLOTHING, PROTECTIVE EYE WEAR, AND GLOVES.

TO HELP PREVENT DAMAGES TO THE SURFACES AND EDGES:
- ALWAYS LIFT THE PANELS WHEN REMOVING THEM FROM BUNDLES, NEVER DRAG THEM.
- NEVER LIFT THE PANEL FROM THE FLAT POSITION BY THE OVERLAPPING RIB.
- DO NOT CARRY PANELS IN THE FLAT POSITION.

UNLOADING:

PANELS ARE SPIRAL WRAPPED WITH STRETCH-FILM AND SHIPPED FLAT. PANEL BUNDLES ARE REINFORCED AT SPECIFIED LIFTING POINTS TO PREVENT DAMAGE WHEN LIFTING. SEE FIGURE'S 1 AND 2 IN THIS SECTION TO DETERMINE WHERE THE LIFTING POINTS ARE FOR THE PANEL BUNDLES.

UNLOADERS MUST TAKE CARE THAT FORKLIFT FORKS ARE LOCATED AT THE PARTICLE BOARD ON THE PANEL BUNDLES BEFORE LIFTING.

EXTREME CARE SHOULD BE TAKEN TO AVOID BUMPING OR DROPPING THE PANELS WHEN LIFTING AND MANEUVERING.

WHEN UNLOADING BUNDLES OF 36'-0" OR LONGER IN LENGTH, TWO OR MORE LIFTING POINTS MAY BE REQUIRED. OVER ENGAGEMENT OF FORKS WILL CAUSE DAMAGE TO THE MATERIALS LOCATED ON THE OPPOSITE SIDE OF THE BUNDLE BEING LIFTED.

WHEN AN OVERHEAD CRANE IS USED, REINFORCED NYLON SLINGS OR STRAPS SHOULD BE USED (NO CHAINS OR CABLES SHOULD COME IN CONTACT WITH THE PANELS), ALONG WITH SUITABLE STIFF INSERTS LOCATED AT TOP AND BOTTOM OF THE BUNDLES AT THE SLING POSITIONS TO PROTECT THE PANELS FROM DAMAGE. ALSO, PLACE FOAM BLOCKS ON THE SIDES OF BUNDLES AT ALL SLING LOCATIONS.

NOTES:

REINFORCED LIFTING POINTS ARE CLEARLY MARKED ON THE PANEL BUNDLE (SEE FIGURES 1 & 2)

LONG LENGTH PANELS HAVE TWO OR MORE LIFTING POINTS (SEE FIGURE 2).

USE EXTREME CARE TO AVOID BUMPING OR DROPPING THE PANELS WHILE LIFTING AND MANEUVERING.

HOIST THE PANELS TO THE ROOF WITH THE AID OF NYLON SLINGS AND A SPREADER BAR TO PREVENT ANY CHANCE OF BENDING OR BUCKLING THE PANELS.

UNLOADING WITH A FORKLIFT:

- OVER ENGAGEMENT OF FORKS WILL CAUSE DAMAGE TO THE MATERIALS LOCATED ON THE OPPOSITE SIDE OF THE BUNDLE BEING LIFTED
- PANELS SHOULD NOT DEFLECT SIGNIFICANTLY IN THE LIFTING PROCESS.
- ENSURE THE FORKS STRADDLE THE DESIGNATED LIFT POINT.
- LIFT BUNDLES ONE AT A TIME WITH THE FORKLIFT

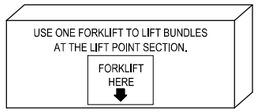

FIGURE 1
STANDARD LENGTH BUNDLES

- BE CAREFUL WHEN UNLOADING OR MOVING LONG LENGTH BUNDLES
- DO NOT POSITION YOUR LIFT AT THE CENTER OF THE BUNDLE, THIS MAY CAUSE PANEL DAMAGE.
- EACH FORKLIFT SHOULD STRADDLE ONE LIFT POINT.

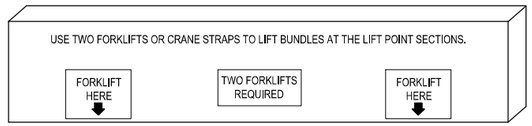

FIGURE 2
LONG LENGTH BUNDLES

UNLOADING WITH AN OVERHEAD CRANE:

- USE NYLON REINFORCED SLINGS OR STRAPS LOCATED AT A MINIMUM OF TWO POINTS ALONG THE LENGTH OF THE BUNDLE FOR CRANE LIFTING OF THE INDIVIDUAL BUNDLES.
- CHAINS OR CABLES SHOULD NOT COME IN CONTACT WITH THE PANELS.
- SUITABLY STIFF INSERTS SHOULD BE LOCATED AT TOP AND BOTTOM OF THE BUNDLES AT THE SLING POSITIONS TO PROTECT THE EDGES OF THE UPPER AND LOWER PANELS.
- PLACE FOAM BLOCKS ON THE SIDES OF BUNDLES AT ALL SLING LOCATIONS.
- WHEN BUNDLES ARE LONGER THAN 15'-0" IT IS SUGGESTED THAT A PROPERLY DESIGNED AND FABRICATED LIFTING BEAM IS USED.

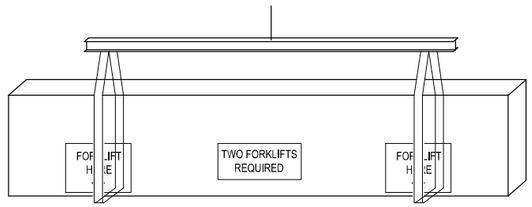

FIGURE 3
BUNDLES UNDER 4,000 LBS AND LESS THAN 44'-0"

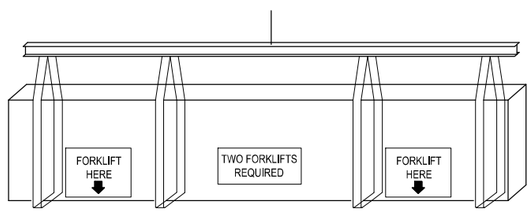

FIGURE 4
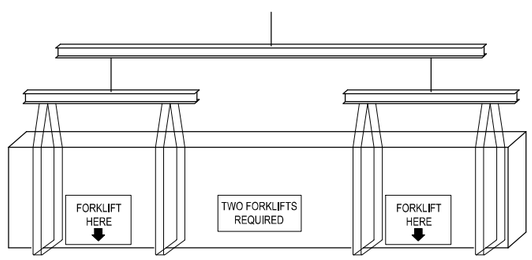
BUNDLES OVER 4,000 LBS AND LESS THAN 44'-0"



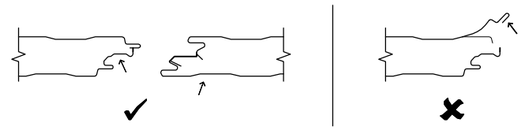


FIGURE 4
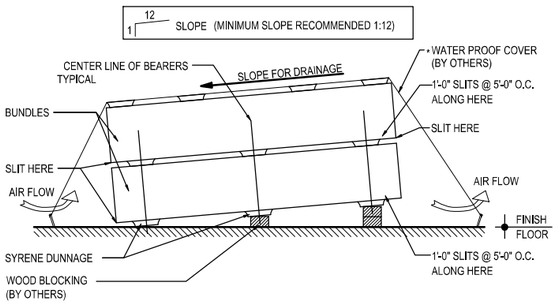
BUNDLES OVER 4,000 LBS AND MORE THAN 44'-0"

MANUALLY UNLOADING:
- ON SMALL PROJECTS UNLOADING OF THE PANELS MAY BE CARRIED OUT BY HAND.
- NOTE: SPECIAL CARE SHOULD BE TAKEN WHEN HANDLING. ALWAYS LIFT THE PANELS WHEN REMOVING FROM A BUNDLE, NEVER DRAG THEM.
- WARNING: TO PREVENT JOINT DAMAGE, NEVER LIFT THE PANEL FROM THE FLAT POSITION FROM THE OVERLAPPING RIB. LIFT PANELS FROM THE BOTTOM SKIN.
- IT IS IMPORTANT THAT WHENEVER A PANEL IS HANDLED, PICKED-UP, MOVED OR CARRIED IT SHOULD BE TURNED ON EDGE FIRST. DO NOT CARRY PANEL WHILE FLAT.
- IMPORTANT NOTE: ALL PERSONNEL DOING THESE PROCEDURES MUST WEAR AT ALL TIMES THE PROPER CLOTHING, PROTECTIVE EYE WEAR AND GLOVES.



THE METAL BUILDING/PANEL SUPPLIER DOES NOT TAKE ANY RESPONSIBILITY FOR DAMAGE CAUSED FROM MISHANDLING OF PANELS. DAMAGED PANELS SHALL BE REPLACED OR CORRECTED TO APPROVAL OF THE ARCHITECT AND ANY COST INCURRED SHALL BE BORNE BY THE PARTIES RESPONSIBLE FOR THE DAMAGE.

JOBSITE STORAGE:

UPON ACCEPTANCE OF THE SHIPMENT, THE CUSTOMER IS RESPONSIBLE FOR PROPER HANDLING, STORAGE, AND SECURITY OF THE RECEIVED MATERIALS. THE MANUFACTURER IS NOT RESPONSIBLE FOR DAMAGE OR LOSS OF MATERIALS AT THE JOB SITE.

PANELS NOT REQUIRED FOR IMMEDIATE USE SHOULD BE:
- CAREFULLY UNLOAD AND PLACE DIRECTLY IN A PROTECTED STORAGE AREA ON A FIRM, LEVEL SURFACE CLEAR OF DEBRIS, PREFERABLY UNDER WATER PROOF COVER AND SLIT PLASTIC WRAP AT BASE TO ALLOW AIR FLOW, FOR NO LONGER THAN 30 DAYS.
- CUT / SLIT THE BOTTOM OF THE PLASTIC WRAP IN 1'-0" INCREMENTS AT 5'-0" O.C. ALONG THE LENGTH OF THE BUNDLES. A CONTINUOUS CUT / SLIT SHOULD BE MADE ALONG THE WIDTH OF THE BUNDLE.
- ELEVATE WITH WOOD BLOCKING, TO ALLOW AIR CIRCULATION UNDER THE BUNDLE, ON A FIRM, LEVEL SURFACE CLEAR OF DEBRIS, STANDING WATER, DIRECT SUN, AND DRIFTING SNOW.
- SEPARATE FLAT-LAID BUNDLES WITH THE STYRENE DUNNAGE PROVIDED WITH THE SHIPMENT.
- BUNDLES CAN BE STACKED, NO MORE THAN (2) BUNDLES HIGH.
- SLOPE AT A MINIMUM OF 1:12 FOR DRAINAGE OF MOISTURE FROM PANELS.
- INSPECTED DAILY FOR MOISTURE. INSURE NO SAGS ARE PRESENT. TRAPPED MOISTURE CAN DAMAGE THE PANEL FINISH AND VOID APPLICABLE FINISH WARRANTIES. IF PANEL BUNDLES CONTAIN MOISTURE OR SAGS, THE PANEL BUNDLE SHOULD BE DRIED AND RESTACKED. USE CARE IN RESTACKING TO AVOID DAMAGE TO PANELS.

PANELS FOR IMMEDIATE USE:
IF THE PANELS ARE TO BE USED IMMEDIATELY, THE BUNDLES SHOULD BE PLACED AT PRE-PLANNED STRATEGIC LOCATIONS AROUND THE PERIMETER OF THE BUILDING, AS CLOSE AS POSSIBLE TO THE PLANNED WORK AREAS, TO AVOID UNDUE SITE MANEUVERING.

WHEN MOVING PANEL BUNDLES, EXTREME CAUTION SHOULD BE TAKEN TO PREVENT DAMAGE TO THE PANEL SURFACES AND EDGES.

WHEN HANDLING PANELS INDIVIDUALLY, THEY SHOULD BE CARRIED IN A VERTICAL, NOT FLAT POSITION. NEVER DRAG PANELS WHEN REMOVING THEM FROM BUNDLES.

(SEE "HANDLING PANELS AND COMPONENTS)

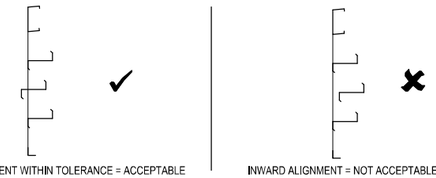
INSTALLATION TOOLS:

"READ BEFORE YOU START"

- SLIDING PANELS TOGETHER WILL SCUFF, DISCOLOR OR DAMAGE THE FINISH.
- IT IS IMPORTANT TO NOTE THAT, DUE TO THE HIDDEN FASTENER SIDE LAP CONNECTIONS OF THESE PANELS, EXTRA CARE SHOULD BE TAKEN WHEN HANDLING THESE COMPONENTS.
- THE FOLLOWING IS A LIST OF COMMON TOOL REQUIREMENTS. REFER TO "FIELD CUTTING" FOR PANEL CUTTING GUIDELINES.
- WEARING CLEAN GLOVES, HANDLING THE PANELS BY EDGES AND TAKING A LITTLE EXTRA CARE WILL PAY OFF BY PRODUCING A GOOD CLEAN FINISHED WALL.

COMMON TOOL REQUIREMENTS:

CIRCULAR SAW	POWER DRILL	CARPENTER'S SQUARE
RIVET GUN	LEVEL	CHALK LINE
TAPE MEASURE	CAULK GUN	SCREW GUN
POWER SHEARS	HAMMER DRILL	POWER NIBBLER



CAUTION: ANY METAL FILINGS OR BURRS SHOULD BE CLEANED OFF THE FACE OF THE PANELS AS SOON AS POSSIBLE TO PREVENT RUST FROM FORMING ON THE PAINT. (SEE "CLEANING PROCEDURES")

ALIGNMENT & SHIMMING
PRIOR TO INSTALLATION, WALL SECONDARY MEMBERS SHOULD BE CHECKED FOR OVERALL DIMENSIONS AND EVENNESS OF PLANE. THE WALL SECONDARY MEMBERS SHOULD ALSO BE CHECKED TO VERIFY THE WALL SYSTEM CAN BE INSTALLED WITHOUT INTERFERENCE. PRIOR TO INSTALLATION OF INSULATED PANEL, INSPECT EACH WALL FOR COMPONENT ALIGNMENT AND PLANE FLATNESS.

CHECK SUPPORT ALIGNMENT AGAINST THESE TOLERANCES:
< 8'-0" SPACING: +1/8", -0"
≥ 8'-0" SP[ACING: +1/4", -0"

(ARCHITECTURAL FLAT PANELS) < 4'-0" SPACING: +1/16", -0"

MISALIGNED SECONDARY STEEL MAY REQUIRE THE ERECTOR TO SHIM THE INSULATED WALL PANELS AT SOME LOCATIONS. SHIMS AND LABOR FOR INSTALLING SHIMS ARE BY OTHERS.

OUTWARD ALIGNMENT WITHIN TOLERANCE = ACCEPTABLE

INWARD ALIGNMENT = NOT ACCEPTABLE

FASTENERS:

INSULATED WALL PANEL FASTENERS VARY BASED ON LOCATION AND PANEL THICKNESS. THE FASTENERS LISTED BELOW ARE TYPICAL FASTENERS. ADDITIONAL FASTENERS, WHEN REQUIRED BY DESIGN, WILL BE INDICATED ELSE WHERE ON THE ERECTION DRAWING SET.

SHEET: D15 of 20

INSTALLATION PROCEDURES:

NOTE: INSULATED PANELS, DUE TO THEIR JOINERY, DO NOT PROVIDE DIAPHRAGM STIFFNESS FOR THE BUILDING WALL TO RESIST LATERAL FORCES INCLUDING WIND. LATERAL BRACING IS TO BE PROVIDED BY CROSS BRACING SYSTEMS CONNECTED TO THE PRIMARY BUILDING FRAMING.

PRIOR TO PANEL INSTALLATION VERIFY:

BUILDING WALLS ARE PLUMB: INSURE BUILDING WALLS TO BE SHEETED ARE PLUMB AND THAT ANY CROSS-BRACING REQUIRED IS IN PLACE AND SNUG TO PREVENT WALL MOVEMENT DURING PANEL INSTALLATION. ALL SECONDARY MEMBERS ARE IN PLACE AND PLUMB.

SAG BRACING: IF SAG BRACING IS REQUIRED FOR YOUR JOB, THEN IT NEEDS TO BE INSTALLED PRIOR TO PANEL INSTALLATION. INSULATED PANELS ARE NOT DESIGNED TO CARRY THOSE LOADS.

WALL PLANE IS FREE OF OBSTRUCTIONS - SEE "INSTALLATION GUIDELINES"

PANEL LAYOUT - REVIEW CUT DIMENSIONS FOR INSULATED PANELS AT ERECTION DRAWING PANEL LAYOUTS AND BECOME FAMILIAR WITH STARTING AND ENDING PANEL REQUIREMENTS.

WALL OPENING LOCATIONS - LOCATIONS OF OPENINGS MAY NEED TO BE ADJUSTED SLIGHTLY (INCHES) DUE TO PANEL JOINERY. TYPICALLY, PANELS ABOVE AND BELOW OPENINGS ARE TO BE INSTALLED AS WORK PROGRESSES. IF POSSIBLE, KEEP SIDE PANEL JOINTS 6" AWAY FROM FRAMED OPENINGS AS A MINIMUM.

PERSONNEL WALK DOORS – INSTALL PRIOR TO PANEL INSTALLATION. NOTIFY YOUR CUSTOMER SERVICE COORDINATOR IF YOU FIND A POTENTIAL ERECTION PROBLEM.

ONCE ALL OF THE ABOVE ITEMS HAVE BEEN VERIFIED, BEGIN INSTALLATION PROCESS:

1. TO ENSURE A PROPER VAPOR BARRIER AND WATER TIGHTNESS, APPLY A 3/8" BEAD OF BUTYL TUBE CAULK (MK. H3151 TYP.) AT MALE EDGE OF THE PANEL IF CAULK IS NOT PRESENT. ALSO, APPLY A CONTINUOUS 3/8" BEAD OF BUTYL TUBE CAULK RUN AT ALL PERIMETER SUPPORT MEMBERS; BASE, EAVE, HEADER, SILL, AND HORIZONTAL TRANSITIONS. NOTE: THIS CAULK IS NOT REQUIRED AT MID-SPAN (INTERMEDIATE) MEMBERS.
2. OBTAIN FIRST PANEL, STARTING PANEL CUT DIMENSION WILL BE SUPPLIED ON ERECTION DRAWINGS. REFER TO "FIELD CUTTING".
3. PLACE THE FIRST PANEL IN THE LOCATION AS DETAILED ON THE SHEETING DRAWINGS WITH THE BASE OF THE FIRST PANEL IN THE PROPER POSITION, PLUMB THE PANEL AND SECURE IN PLACE.
4. PREPARE ADJACENT PANEL EDGE (VERIFY/ADD BUTYL CAULK, ETC.) PLACE INTO POSITION.
5. MAINTAIN AN EVEN AND UNIFORM GAP AT THE PANEL SIDE JOINT (0.125" MAX), THEN FASTEN PANEL INTO POSITION USING ALL REQUIRED SIDE JOINT FASTENERS. REFER TO "WALL OPENINGS" FOR SPECIFIC INFORMATION AT OPENINGS.
6. REPEAT THE INSTALLATION PROCESS OCCASIONALLY CHECKING FOR PLUMB. IF ANY MINOR 'OUT-OF-PLUMB' IS DETECTED, TAKE CORRECTIVE ACTION IN MINOR STEPS WITH SUBSEQUENT PANELS TO BRING THE SHEETING PROCESS BACK TO PLUMB.

INSTALLATION GUIDELINES:

INSULATED PANELS PROVIDE INSULATION PERFORMANCE SUPERIOR TO CONVENTIONAL METAL WALL PANELS WITH FIELD ASSEMBLED INSULATION SYSTEMS. THE FULL ENERGY SAVINGS POTENTIAL CAN ONLY BE REALIZED WHEN THE INSULATED PANELS ARE INSTALLED WITH CAREFUL ATTENTION TO THE DETAILS AFFECTING THE QUALITY OF AIR AND MOISTURE SEAL.

TO ENSURE A PROPER VAPOR BARRIER AND WATER TIGHTNESS 3/8" BEAD OF BUTYL CAULK IS REQUIRED AT LOCATIONS INDICATED ON THE ERECTION DRAWINGS, SIDELAP CAULK MAY BE FACTORY OR FIELD APPLIED. IT IS HOWEVER, THE INSTALLERS RESPONSIBILITY TO FIELD APPLY CONTINUOUS BUTYL CAULK AT AREAS WITH VOIDS OR MISSING CAULK. CONTINUITY, SIZE AND PROPER BEAD PLACEMENT ARE CRITICAL IN OBTAINING A SATISFACTORY SEAL AT EACH PANEL EDGE. DETAILS FOR PLACEMENT OF CAULK AT PANEL EDGES SHOULD BE REVIEWED IN ADVANCE. APPLICATION OF CAULK SHOULD BE CONTINUOUS.

SPECIAL CARE IN HANDLING IS REQUIRED TO PREVENT DAMAGE OR CONTAMINATION BY FIELD DEBRIS WITHIN THE PANEL SIDE JOINT. ALL SECONDARY SUPPORT STEEL SHOULD BE IN PLACE FOR CONTINUOUS ATTACHMENT OF PANELS ACROSS THE SURFACE OF PRIMARY FRAMING MEMBERS, INCLUDING OUTER EXTREMES OF CORNERS, OPENINGS, GABLES, ETC.

PANEL ENGAGEMENT AT SIDE JOINTS SHOULD BE AS INDICATED ON DETAILS.

PRIOR TO INSTALLATION OF INSULATED PANEL, INSPECT EACH WALL FOR COMPONENT ALIGNMENT AND PLANE FLATNESS. WALL COMPONENTS SHOULD NOT VARY MORE THAT 1/8" OVER THE ENTIRE WALL SURFACE, INCLUDING FASTENER HEADS AND OTHER OBSTRUCTIONS THAT WOULD INTERFERE WITH CONTINUOUS BEARING OF THE INSULATED PANEL LINER FACE.

ALIGNMENT AT TRANSITION AREAS, SUCH AS CORNERS AND EAVE, SHALL BE WITHIN 1/8" OF THE THEORETICAL PLANE TO ACCOMMODATE CORNER PANELS AND FORMED FLASHING.

MISALIGNED SECONDARY STEEL MAY REQUIRE THE ERECTOR TO SHIM THE INSULATED WALL PANELS AT SOME LOCATIONS. SHIMS AND LABOR FOR INSTALLING SHIMS ARE NOT BY NBG.

DO NOT OVERDRIVE FASTENERS: OVERDRIVING FASTENERS CAN CAUSE DAMAGE AND DISTORTION OF THE PANEL FACE.

DO NOT SKIP ATTACHMENTS AT SECONDARY SUPPORT MEMBERS: PANELS MUST BE ATTACHED AT EACH GIRT LINE IN PROGRESSION. SECURING PANELS AT TOP AND BOTTOM ONLY CAN CAUSE PANELS TO BOW AND IT MIGHT BE IMPOSSIBLE FOR THEM TO RETURN TO THEIR NORMAL POSITION.

WEATHER TIGHTNESS REQUIREMENTS

TO PREVENT CONDENSATION ISSUES CARE MUST BE TAKEN BY THE INSULATED PANEL INSTALLER TO ENSURE PROPER SEALING OF THE BUILDING.

NOTE THE FOLLOWING:

ALL MATERIALS MUST BE INSTALLED AS SHOWN ON THE PROVIDED ERECTION DETAILS.

ALL PERIMETER CAULKING AND BUTYL SEALANT APPLICATIONS MUST BE INSTALLED AS AS SHOWN ON THE ERECTION DETAILS.

- CONTINUOUS CAULK AND TAPE MASTIC APPLICATIONS (FACTORY OR FIELD) MUST BE CAREFULLY INSPECTED AND ANY VOIDS FOUND MUST BE FIELD APPLIED.
- GAPS, VOIDS OR AIR SPACE CREATED AT PANEL TO PANEL TRANSITIONS; AS AT RAKE, LOW EAVE, RIDGE, HIGH SIDE EAVE, ROOF TO WALL OR CORNERS MUST BE FIELD FILLED WITH FOAM SPRAY IN PLACE INSULATION (BY OTHERS).

NBG WILL NOT BE RESPONSIBLE FOR ANY CONDENSATION ISSUES THAT MAY OCCUR DUE TO IMPROPER INSTALLATION.

IF THE ERECTOR IS NOT EXPERIENCED WITH THE INSULATED PANELS SUPPLIED BY NBG, IT IS STRONGLY RECOMMENDED THAT A FIELD TECHNICIAN BE ON SITE BEFORE BEGINNING PANEL INSTALLATION. PANEL INSTALLATION. CONTACT YOUR PROJECT COORDINATOR TO REQUEST AND SCHEDULE A FIELD TECHNICIAN.

FIELD CUTTING:

SOME FIELD CUTTING OF PANELS AND FLASHING WILL BE REQUIRED. IT IS THE WORKERS RESPONSIBILITY TO MAKE SURE ALL SAFETY PRECAUTIONS ARE FOLLOWED. SOME SAFETY PRECAUTIONS INCLUDE, BUT ARE NOT LIMITED TO; EYE PROTECTION, ADEQUATE VENTILATION, NO SMOKING AND AVOID EXPOSING PANELS TO HIGH HEAT.

PANELS ARE TO BE CUT ONE METAL SIDE AT A TIME AND THE INSULATION CAN BE REMOVED WITH A SERRATED KNIFE. A CIRCULAR SAW WITH AN APPROPRIATE BLADE SET TO CUT THROUGH THE METAL SKIN ONLY CAN BE USED. CIRCULAR SAWS WITH ABRASIVE BLADES ARE NOT ACCEPTABLE. BE SURE TO CUT COMPLETELY THROUGH THE METAL SKIN AT THE PANEL SIDE JOINTS. A CIRCULAR SAW WITH A **PROPER CARBIDE BLADE** MAY BE USED. **CHECK THE SAW BLADE MANUFACTUER'S SPECIFICATIONS FOR PROPER APPLICATION.**

RECOMMENDED CUTTING TOOLS INCLUDE:

(1) CIRCULAR SAW
(2) PANEL NIBBLER
(3) PANEL SAW
(4) SERRATED KNIFE
(5) BLADE OF A CARPENTER'S HAND SAW

IMP CUTTING PROCEDURES:

- MEASURE THE AREA TO CUT & MARK A LINE ON PANEL SURFACE (DO NOT USE GRAPHITE TO MARK PANEL).
- USE ADHESIVE TAPE ON BOTH SIDES OF THE CUTTING LINE TO PROTECT PANEL SURFACE.
- CONFIRM MEASUREMENT, AND PROCEED WITH CUTTING OPERATION.
- ALWAYS PROMPTLY CLEAN PANEL SURFACES TO REMOVE ANY METAL DUST OR FILINGS FROM CUTTING OPERATIONS.
- IF NECESSARY TURN PANEL OVER AND REPEAT STEPS ABOVE ON OPPOSITE SIDE.
- FILE OR SAND OFF ANY BURRS ON THE CUT EDGE OF THE PANEL. THE PANEL WILL THEN BE READY FOR INSTALLMENT. THE INSTALLER MUST CONSIDER THE APPLICATION OF THE CONTINUOUS BEAD OF SEALANT, & IF NECESSARY, THE CUTTING OF THERMAL BREAKS PRIOR TO INSTALLATION; SUCH TASKS SHALL BE DONE ON THE GROUND.
- FIELD-CUT EDGES SHOULD ALWAYS BE COVERED WITH TRIMS.

THE PANEL/BLDG MANUFACTURER **WILL NOT** BE RESPONSIBLE FOR DAMAGE TO PANELS CAUSED BY IMPROPER CUTTING METHODS.

- **NEVER** USE A RECIPROCATING SAW TO CUT INSULATED PANELS. RECIPROCATING SAWS CAN CAUSE STRUCTURAL DAMAGE TO THE INSULATED PANELS BY DELAMINATING THE PANEL FACE METAL FROM THE FOAM CORE MATERIAL.
- **NEVER** USE ANY TYPE OF TORCH TO CUT INSULATED PANEL.
- **NEVER** SUBJECT AN INSULATED PANEL TO THE HEAT OF A TORCH EVEN WHEN CUTTING NEARBY STEEL. HIGH HEAT WILL DAMAGE THE PANEL FINISH AND CAN CAUSE THE FOAM CORE TO PRODUCE FUMES WHICH MAY BE IRRITATING TO SOME INDIVIDUALS.
- **NEVER** BURN REMNANTS, DISPOSE OF INSULATED PANEL REMNANTS BY DEPOSITING IN PROPER GARBAGE FACILITIES.

ACCESSORIES:

- TRIMS LENGTHS SUPPLIED WILL VARY AND MAY REQUIRE SOME FIELD CUTTING.
- TRIM COLOR AVAILABILITY MATCHES PANEL COLOR AVAILABILITY.

TRIM ATTACHMENT:

TRIMS ARE FASTENED WITH BLIND RIVETS OR STITCH SCREWS, PAINTED TO MATCH TRIM COLOR. REFER TO THE ERECTION DETAILS AND THE ERECTION DRAWINGS FOR LOCATIONS AND FASTENING SPACING.

THERMAL WINDOW:

DUE TO THE ISOLATIVE PROPERTIES AND CONNECTION REQUIREMENTS OF THE WALL SYSTEM, THERMAL BREAK WINDOWS ARE RECOMMENDED FOR USE WITH INSULATED WALL PANELS.

SURFACE CLEANING PROCEDURES:

GENERAL:

DIRT, OIL, GREASE, FINGERPRINTS OR ANY OTHER TYPE ON CONTAMINATE MUST BE COMPLETELY REMOVED WHEN INSTALLATION IS COMPLETE IN ORDER TO MAXIMIZE COATING PERFORMANCE.

STEEL FILINGS FROM ADJACENT WORK MAY BECOME EMBEDDED IN THE PAINT SURFACE. THESE FILINGS WILL RUST AND FORM UNSIGHTLY RED SPOTS ON THE PAINTED SURFACE THAT CAN BECOME LARGER THAN THE ORIGINAL FILING. WHEN USING SAWS, DRILLS OR CUTTING DISCS, PROTECT THE PAINTED SURFACED WITH A NON-FLAMMABLE COVER AND REMOVE OR COVER ADJACENT OR NEARBY PANELS IF POSSIBLE.

BRUSH ANY FILINGS OF STEEL OFF THE PAINTED SURFACE. EMBEDDED FILINGS SHOULD BE REMOVED MECHANICALLY. CARE SHOULD BE TAKEN BY WORKMEN TO AVOID STEPPING ON OR EXERTING PRESSURE AGAINST ANY STEEL FILINGS WHICH MAY BECOME EMBEDDED IN THE PAINTED SURFACE.

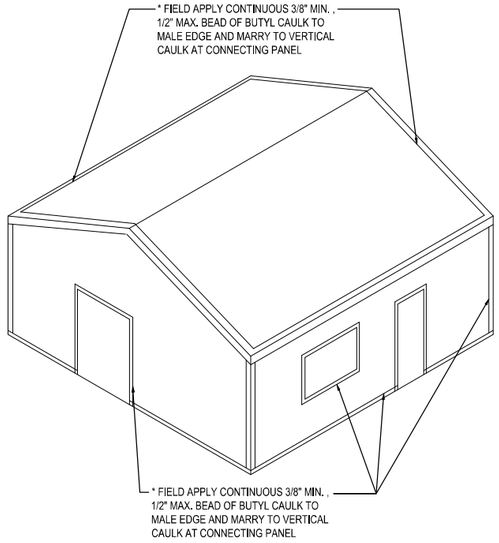
THINGS TO REMEMBER WHEN CLEANING:

USE ONLY MILD DETERGENTS	(NO LEMON, ALCOHOL OR AMMONIA INGREDIENTS)
USE ONLY SOFT BRISTLE BRUSHES	(NO SCRUB TYPE OR WIRE BRISTLES)
USE ONLY LUKEWARM WATER	(NO HOT WATER)

LIGHT OR PERIODIC CLEANING MAY BE ACCOMPLISHED ON A REGULAR BASIS BY WASHING WITH PLAIN WATER USING A STANDARD GARDEN HOSE OR LOW PRESSURE SPRAYER IS USUALLY SUFFICIENT TO REMOVE MOST CONTAMINATION.

CAULKING COMPOUNDS, OIL, GREASE, TARS, WAX AND SIMILAR SUBSTANCES CAN BE REMOVED BY WIPING WITH A CLOTH SOAKED IN MINERAL SPIRITS. WIPE ONLY CONTAMINATED AREAS AND FOLLOW WITH DETERGENT AND THOROUGHLY CLEAN WITH WATER.

SURFACE REPAIR PROCEDURES:



IF "TOUCH UP" PAINT IS REQUIRED CONTACT YOUR PROJECTS CUSTOMER SERVICE COORDINATOR.

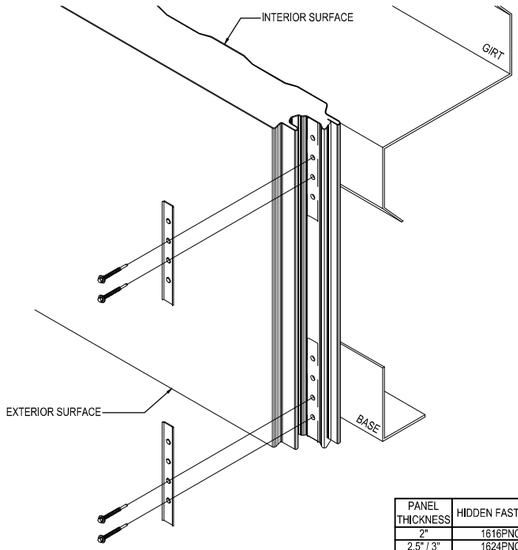
PRECAUTIONS:

PROTECT EYES, FACE, AND HANDS FROM DIRECT CONTACT WITH TOUCH-UP PAINT AND/OR SOLVENTS. PROVIDE GOOD VENTILATION IN WORK AREA. ENFORCE NO SMOKING. REMOVE ALL SOURCES OF IGNITION. THESE COATINGS AND SOLVENTS ARE FLAMMABLE.

1. LIGHTLY SAND OR FEATHER EDGES OF DEEP SCRATCHES USING #400 GRIT SAND PAPER
2. WIPE SCRATCHES AND ADJACENT AREAS USING A LINT FREE CLOTH DAMPENED IN MINERAL SPIRITS.
3. ALLOW AREA TO DRY THOROUGHLY BEFORE APPLYING TOUCH-UP PAINT.
4. SHAKE / STIR PAINT TO MIX THOROUGHLY BEFORE APPLYING.
5. CHECK TOUCH-UP PAINT FOR CORRECT MATCH BEFORE APPLYING.
6. APPLY THIN LAYER OF TOUCH-UP PAINT TO DAMAGED AREA. REPEAT LAYERS AS REQUIRED.

PERIMETER CAULKING:

PERIMETER CAULKING IS A CRITICAL PART OF THE PANEL INSTALLATION. NOT INSTALLING THE PERIMETER CAULKING WILL LEAD TO AIR LEAKS, WHICH WILL LEAD TO CONDENSATION AND / OR FROST. REFERENCE THE DETAILS AND THE ERECTION MANUAL FOR PROPER CAULKING PLACEMENT.



FIELD INSTALLED INSULATION NOTE

IT IS THE RESPONSIBILITY OF THE ERECTOR TO FIELD FILL ALL AIR VOIDS WITH INSULATION. UNINSULATED AREAS WILL CAUSE HOT AND COLD SPOTS THAT CAN CAUSE CONDENSATION AND/OR FROST. THESE VOIDS COMMONLY HAPPEN AROUND THE PERIMETER OF THE BUILDING. FAILURE TO DO SO WILL CAUSE FUTURE PROBLEMS.

ERECTOR NOTES:
1. THE USE OF A CENTER PUNCH TO SLIGHTLY DIMPLE THE PANEL FACE PRIOR TO INSTALLING THE THROUGH FASTENERS IS RECOMMENDED TO PREVENT "WALKING" OF THE FASTENERS. EXCESIVE DAMAGE OF THE PANEL FINISH CAUSED DURING INSTALLATION MAY VOID THE PANEL FINISH WARRANTY.
2. • ENSURE CAULK IS CONTINUOUS, IF NO CAULK IS PRESENT OR IF CAULK IS NOT CONTINUOUS. FIELD APPLY CONTINUOUS CAULK MK# H3151.
3. FIELD MITERING OF FRAMED OPENING TRIM(S) WILL BE REQUIRED BY THE ERECTOR. FIELD CAULK TRIMS TO ENSURE WEATHER TIGHTNESS AS REQUIRED.

WEST WENDOVER FIRE STATION #13 REPLACEMENT

PHASE 1A PRE-DESIGN + PROGRAM VALIDATION REPORT

EXECUTIVE SUMMARY

This Phase 1A package provides The City of West Wendover Community Development and Fire Department with a resulting analysis from a variety of program considerations to establish a baseline understanding of the unique needs of the Fire Station #13 replacement facility.

The Design|Build collaboration between CORE Construction | TSK Architects and supporting engineering teams has developed the following project concept for program verification and cost analyis (cost analysis in separate document).

Following a series of stakeholder meetings throughout 2022, a reduced scope was agreed upon in consideration of current cost escalation. This scope no-longer includes the residential component of the Initial Basis of Design; however, the full scope for the apparatus bays and support offices were maintained.

The resulting programmatic adjacencies informed the concept floor and site plans as exhibited in the “Concept Design” portion of this package.

The project team appreciates the continued support and input of both City of West Wendover teams as we continue with this process.

PROGRAM SUMMARY

Overview

The following programmatic findings establish the basis of design for the concept presented within this document. The determniation of these spatial allocations were confirmed throughout the program validation process and confirmed following regular OAC meetings. This concept provides a station with 5 double-deep apparatus bays and an office component with staff amenities. Detailed tabluations are outlined in the subsequent pages.

CIVIL DESIGN NARRATIVE

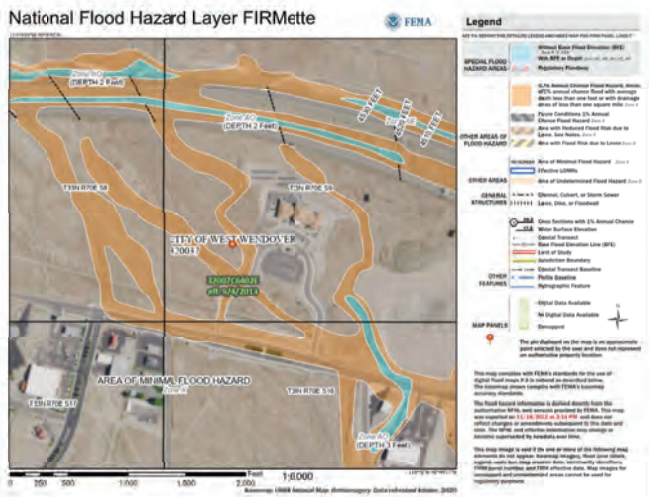
SUMMIT ENGINEERING CORPORATION™

WEST WENDOVER FIRE STATION #13
Narrative (Civil Engineering)

The proposed fire station, when fully graded out will sit on a site slightly greater than 1 acre. The new building will be located next to the existing City Hall building with access off the looped road N. Gene L Jones Way. The Civil Engineering design will be based in accordance with the "Standard Specification for Public Works Construction" Latest Edition.

SITE GRADING

- The proposed site for the building currently slopes from northwest to southeast with a moderate slope between 5%~6% grade. There is an existing drainage swale that crosses the site form a culvert that drains under Interstate 80 (I-80). This drainage swale will need to be re-aligned around the site to drain to the existing 36" culvert that crosses N. Gene L Jones Way, ref site plan.



- A new access road approx 250' long 26' pavement width with curb, gutter and sidewalk will need to be designed and constructed towards the west off of N. Gene L. Jones Way for Fire Apparatus to maneuver through the site and building bays.

- Both concrete driveway aprons on the west and east sides of the building are tentatively planned to be concrete with rebar reinforcement on Structural type 2 base compacted, with all employee and visitor parking to be asphalt on structural type 2 base compacted.

- Existing curb, gutter & sidewalk will need to be removed for construction of access aprons to building driveway bays.

- Based on the flood insurance rate map for the city of West Wendover, 32007C6402E, dated September 4. 2013, a portion of the site along the existing drainage swale does lie within the 100 year flood plain. As described on the FIRM Map (0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile, Zone X)

- Site ADA parking will be required and needs to be van accessible

UTILITY

- Currently, the site does have existing sewer and water service to the site, please reference site plan for approximate location of existing water and sewer utilities. Above ground visible utilities were shot by survey crew and are shown on the plans, some utility locations were provided by City of West Wendover Public Works and Community Development departments.

- With the proposed building layout and concrete apron locations, there are a few existing utilities (Fire Hydrants, Light poles, utility boxes) that will have to be removed and relocated to provide access for fire apparatus vehicles.

- All apparatus bays drains will flow into a sand oil separator and then be tied into the existing sanitary sewer system.

Subject: West Wendover Fire Station #13 Mechanical and Plumbing Schematic Design Narrative

Mechanical and Plumbing Overview

Kimley-Horn has outlined the expected mechanical, and plumbing systems that should be considered for the planning purposes of this project. Please note, the system listed in this narrative are a general guideline as to the equipment / systems that are anticipated on this project. This does not identify all design aspects of the of the system that will be required, and all pricing evaluations must account for all systems being installed in accordance with code requirements.

Design Codes

- 2018 Uniform Plumbing Code
- 2018 Uniform Mechanical Code
- 2018 International Energy Conservation Code
- 2019 NFPA 13

Mechanical Basis of Design

Per the West Wendover Resolution 2020-17 the preliminary HVAC loads for the proposed building were calculated using the following criteria:

Frost Depth: 24 inches
Winter Design Temperature: 10 degrees F
Air Freezing Index: 594
Mean Annual Temperature: 49.4 degrees F

The HVAC heating and cooling equipment system will consist of three temperature control zones for the facility. Two of the zones will serve the indoor office space. The zones office areas will be maintained at 72°F for cooling and 68°F for heating.

The Apparatus Bay will not have a cooling system but will have HVLS fans installed throughout the bays. The heating system shall be designed to maintained 60°F-65°F (adjustable) during winter design temperatures.

Below is a brief description of the mechanical HVAC systems expected for the West Wendover FS #13.

1. Office Space:
   a. Heating / Cooling: The office and breakroom spaces will have two zones each with a gas furnace and matching cooling coil horizontally mounted in the ceiling space. These indoor units will be connected to two 3-ton outdoor condensing units located on the north side of the building.
   b. All mechanical equipment, ducting, return grilles and supply diffusers mounted throughout the office space will be mounted in the ceiling space above the occupied offices. The outside air duct connection will come from a roof hood inlet down to each unit. Frames on diffusers and grilles will match the reflected ceiling plan proposed by the architectural drawings
   c. Exhaust fans: There will be general exhaust fans provided in the restrooms and the decontamination rooms. Each exhaust fans will be no more than ½ hp and will be ceiling mounted.
2. Apparatus Bay:
   a. The apparatus bays will be heated by ten individual gas fired infrared tube heaters located to the side of each fire truck in the bays. The current layout does not include a cooling system for the apparatus bay. The combustion air will be required for the heater will come from the bay itself and will not required an outside air intake. The flues for each tube heater will penetrate the roof and will be terminated with a weathertight roof cap.
   b. The apparatus bay will contain a source capture vehicle exhaust system serving each truck in the bay. Each bay will be fitted with an individual Nederman Magna Rail Track exhaust system at each truck to remove the exhaust from the trucks as they are started and drive out of the bays. Each rail will have a dedicated high pressure exhaust fan blower that will have a termination up through the roof. Each exhaust fans will have approximately a 3 hp fan mounted from the structure in the bay.
   c. Each bay will include high volume low speed (HVLS) fans per the architectural layout.

Alternative Options to the proposed HVAC systems that could be considered include the following:

1. Use of a radiant floor heating system in the the bays could be an alternative option for heating. The heating system would need to include a space for the mechanical heating equipment, boilers, pumps, manifold headers, zone valves, expansion tank, air separator and the basic boiler system components would need to be included in the design. In addition to the required equipment, all floors would need to have oxygen barrier PEX piping install in the bay slab floors. The design would likely include ¾" PEX piping laid out at 9 inches on center circuits.
2. Cooling alternatives for the bay could include evaporative cooling units that could be mounted on the south wall of the bays and ducted the length of the bay with supply diffusers mounted in the ducts. These units would need to be sized to accommodate an air change of the space in 3 minutes, or 20 air changes per hour. Air relief hoods would need to be added for the evaporative cooling option.
3. Regardless of any alternative options presented for the Apparatus Bay, the vehicle exhaust system would not change in design criteria.

Plumbing Basis of Design

The plumbing design will consist of both the water and sanitary waste systems within the machine room and restrooms with one water spigot located outside. The water heaters will be electric point of use tankless type provided beneath each fixture requiring hot water. Each water heater will be selected to serve the specific plumbing fixture type and commercial grade.

Below is a brief description of each plumbing system expected for the West Wendover FS #13.

- Domestic Water: The building will be served with a tankless instantaneous water heater for the lavatories and the break area sink, as well as the gear turnout and decontamination rooms in the apparatus bay.
- Assume meters with reporting capabilities for the water piping serving the building. Water will be brought to the building from the water main to ¾" piping to the water closets, lavatories and sinks, water fountains, and the washing machines.
- Waste piping system: Waste from the bathrooms, sinks, and washing machines will be a 4in pipe connected to the sewage line.
- Gas Piping System: 2-inch gas piping will be routed from the gas meter at the north side of the building to each indoor furnace serving the office space and to each infrared tube heater located in the bays as shown on the plans.
- Drain system for the Apparatus Bays: Each bay will have trench drains with piping connect and routes to a sand oil interceptor.
- Storm Drain System: The storm drainage from the roof will be handled via rain gutters with downspouts that will drain on grade and sheet flow to the storm drain inlets on site.

Automatic Fire Sprinkler Basis of Design

The fire sprinkler system requirements for the building design will be provide as a performance specification and will be required to be installed in accordance with the currently adopted NFPA 13 code. The system will require the backflow provisions on the system along with a fire riser and all required tamper proof and reporting provisions per the code and Authority Having Jurisdiction.

ELECTRICAL DESIGN NARRATIVE

Kimley»Horn

West Wendover Fire Station

Narrative (Electrical)

Overview

The intent of this narrative is to summarize the basis of design of the electrical systems of the fire station and office. The design criteria and electrical systems selection will be discussed.

Design Criteria

- 2018 Nevada Building Code (IBC) with 2018 West Wendover Amendments
- 2018 International Energy Conservation Code (IECC)
- 2018 International Fire Code (IFC)
- 2017 National Electrical Code (NEC)
- 2019 NFPA 72 National Fire Alarm Code

Electrical Distribution

The fire station will have a 600A, 120/208V, 3-phase service. It is anticipated that the local electric utility, Wells Rural Electric Co. (WRE) will provide a 112.5-kVA transformer and that the conduit infrastructure and pad for the transformer are to be provided by the contractor. The electrical system architecture features a main disconnect with meter CTs, a 600A automatic transfer switch (ATS) ahead of the distribution panelboard 'MDP', and a 150-kW emergency generator backing up all building loads. The system includes three (3) branch panelboards, one each for general loads, mechanical and apparatus bay loads, and IT and telecommunications loads featuring an isolated ground.

Further research and utility coordination are required to identify the exact location for the utility interconnection. Additionally, voltage drop and fault current calculations are to be completed at a later stage of design. The current assumptions are that the main switch will require a withstand rating of 42k AIC and the remaining equipment will require 22k AIC ratings.

The apparatus bay will feature electric vehicle service equipment (EVSE). The basis of design for this system is the ChargePoint CPE250. This equipment provides charging capacity of up to 66.5 kW. Further coordination with the end user and what their specific needs may be required to confirm that this is sufficient for their anticipated future need. Please note that this equipment requires a 75-kVA step-up transformer to provide the necessary 480V, 3-phase power at the EVSE inputs. At 120/208V, 3-phase, this is approximately 200A worth of load.

Lighting and Lighting Controls Systems

The lighting systems in the facility will feature the following: industrial high bay fixtures in the apparatus bay; lay-in troffers, surface mounted strip lighting fixtures, and recessed downlights in the office area; wall packs and recessed downlights mounted on the building exterior; and site area pole mounted fixtures on the

exterior. All exterior fixtures shall be full cut off and dark sky compliant. The pole mounted fixtures shall have a maximum mounting height of 20 feet and shall be mounted on a 3-foot pier.

The lighting controls system shall comply with the requirements of the 2018 International Energy Conservation Code (IECC) and will feature an astronomical time clock, occupancy sensors, and photocell control inputs. The lighting in some areas of the building, including the apparatus bay, meet the criteria for exceptions in the code as an emergency operations area. Where feasibility, the lighting controls devices shall be incorporated into the wall-mounted switches. Lighting controls shall include additional interior photocell control input devices to allow for daylight harvesting. Daylighting harvesting zones have been indicated on the schematic lighting plans for reference.

Telecommunications Systems

The fire station features an IT/Communications room which will be equipped with ½" thick plywood to serve as the telecommunications termination board.

This space will house three four-post racks, one of which will house a rack mounted UPS with external maintenance bypass. The sufficiency of the rack space is yet to be determined pending coordination with the end user.

Further research and utility coordination are required to identify the exact location for the utility interconnection and establish the telecommunications demarcation.

Telecommunications devices are shown in the schematic design plans, including wall-mounted data ports and ceiling-mounted wireless access points.

Fire Alarm Systems
